WILSON'S FRECKLE CREAM
It will remove your freckles or cause them to fade and two jars will even in the most severe cases completely cure them. We are willing to personally guarantee this and to return your money without argument if your complexion is not fully restored to its natural beauty. WILSON'S FRECKLE CREAM is fine, fragrant and absolutely harmless. Will make hair grow but will positively remove TAN, PIMPLES and FRECKLES. Come in today and try it. The jars are large and results absolutely certain. Sent by mail if desired. Price 50c. MAMMOTH JARS \$1.00. WILSON'S FAIR SKIN SOAP 25c. For sale by
GRAHAM DRUG COMPANY.

DR. KING'S New Life Pills

Chronic Stomach Trouble Cured.
There is nothing more discouraging than a chronic disorder of the stomach. It is not surprising that many suffer for years with such an ailment when a permanent cure is within their reach and may be had for a trifle? "About one year ago," says H. Beck, of Wake County, "I bought a package of Chamberlain's Tablets, and since using them I have felt perfectly well. I had previously used any number of different medicines but none of them were of any lasting benefit. For sale by all dealers.

The city meat and milk inspector at Winston-Salem analyzed some buttermilk last week, and found it adulterated with soda, flour and water to the extent of about 40 per cent.

Chamberlain's Tablets for Constipation. For constipation Chamberlain's Tablets are excellent. Easy to take, mild and gentle in effect. Give them a trial. For sale by all dealers.

POULTRY FACTS.

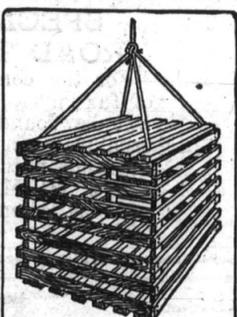

TO DISCOURAGE BROODY HENS

There are Many Ways of Breaking Up Broodiness—Coop With Slatted Bottom is Excellent.

The end of the breeding season seems to be the appointed time for hens to get broody. Earlier in the year when their services would have been most welcome great difficulty was experienced in finding sufficient to sit on the desired number of eggs. August is too late for the sitting of their broodiness, unless a few duck eggs be set under some of them. At this time, too, the scarcity of eggs makes it the desire of all poultry keepers to break up their "broodies" and have them laying again as soon as possible.

There are many ways of breaking hens of broodiness, and the more barbarous ones such as tying the hen up by one leg, throwing cold water over her, or making her stand in water should be forgotten and practiced no longer. The same and better results can be obtained by more humane methods.

Placing the hen in an ordinary coop, with a slatted bottom, and suspending the coop from the ceiling of the

Coop for Broody Hens.

scratching pen about a foot above the floor by wires or chains attached to the four corners has been found efficacious. A gentle swing whenever entering the pen will soon make the birds desirous of joining their more busy companions. A little Epsom salts given in a mash and an abundant supply of green food should be given. All foods which have the slightest tendency toward heat production, such as corn, meat scraps, etc., must be withheld for a few days. Take the bird in time. It is practically impossible to break a hen after allowing her to sit on a nest for two or three days. It should always be remembered that in the ordinary course of nature a hen that has laid persistently all winter and spring, demands a short rest, which broodiness gives.

ONE HOT WEATHER TROUBLE

When Diarrhea First Makes Its Appearance It May Be Checked by Use of Charcoal.

(By H. B. SPECK.)
Diarrhea is one of the most common hot weather troubles in poultry of all ages, and when it makes its first appearance, charcoal freely fed may check or control the disorder. Diarrhea may be due to food or drinking water being foul with droppings or other filth; to feeding impure, musty and moldy food; to overheating; to feeding in dusty, musty or moldy litter; to unclean quarters and dampness; to overfeeding on meat food or feeding spoiled meat; to eating poisonous substances or to indigestion from any cause. The first thing to do when diarrhea makes its appearance is to find the cause and remove it. Drinking from filthy pools in unclean runs after a sudden shower, or drinking barnyard seepage is a common cause of diarrhea in hot weather.

POULTRY NOTES

Watch the grit box. See that all your houses wide open day and night. Don't crowd your birds. Give them all the range you can. See that your little chicks have plenty of shade and water. Sell the rooster and buy an alarm clock. It's more useful now. Wheat and oats are better hot weather feeds than corn and Kaffir. Don't forget to keep down the flies; just a little grease on top of chick's head is good. Be sure to store away some clover or alfalfa this summer for the layers in cold weather. The cost of pure-bred stock is not so prohibitive but that it may be had by all who wish poultry. Don't forget to sprinkle lime on drop boards, not too much, for it is hard on the chickens' feet. The water vessel now needs a shelter from the sun instead of a heater under it. Warm water is no better in summer than in winter as a drink.

The J. C. U. A. M. of Mt. Airy is preparing to build a modern hospital in that town. Superintendent S. L. Sheep of the Elizabeth City Graded Schools, has notified the trustees that he will not be a candidate for re-election. Prof. Sheep has been engaged in school work in Elizabeth City for the past 30 years.

SOME POSTSCRIPTS

Five entirely separate compartments which are fastened together by rods from the handle feature a new dinner pail.

In an indoor golf game patented in England players drive balls through an arch and ring a bell instead of into a hole.

The government of Ecuador will equip two war vessels with wireless telegraphy and establish four shore stations.

Boston's new custom house will be 695 feet high and has been designed to virtually crown the city's pyramidal skyline.

The first electric street railway in any Chinese city outside of Shanghai was inaugurated in Fongshing in August.

The United States imported fruits and nuts worth \$90,000,000 in the last fiscal year, twice the quantity imported ten years ago.

Electrically illuminated signs to be carried on the roofs to show whether taxicabs are vacant or occupied have been patented in England.

Individual glass rooms, with private telephones, will be provided patients recovering from infectious diseases in a new Chicago hospital.

A new soft collar for men or women recently patented in England has loops under the ends through which to pass a necktie for drawing the ends together.

LANGUAGE OF GIFTS

A Valise—Please, travel.

A Bouquet—Try to imitate these.

A Necktie—Your own taste is excusable.

A Piece of Jewelry—You are painfully plain.

A Chair—You should stay at home more than you do.

A Box of cigars—You can't tell a good cigar from a vile one.

A Smoking Jacket—Your clothes smell dreadfully of tobacco.

A Purse—Better care should be taken of what money you have.

A Waste-Paper Basket—You should throw away more of your work.

A Book of Poems—Your nature stands sadly in need of softening.

A Cut Glass Bottle—I think you know a good thing when you see it.

A Fountain Pen—You should cultivate more carefully a spirit of Christianity.

A Book of Prose—I wish to put you to some trouble. You will take this out and dust it whenever I am announced to call—Puck.

EVERYMAN

Everyman when he smokes, smokes so little that he never feels it.

Everyman might have married any other woman among several if he had wanted to.

When it comes to gossip Everyman can give any woman cards and spades, but Everyman never admits this.

Everyman praises women to their face but in talking to every other man he says terrible things about them.

Everyman never understands why every other man does the things which he himself would not think of doing.

Everyman, if he plays golf, billiards, pool or any other game, never goes so well as he did the last time he played.

Everyman when he was a boy was a devil of a fellow. Neither himself nor any one else dreamed that he could ever turn out so well.

Everyman lets his wife have her own way until he is thoroughly aroused and then he tears things up—so Everyman says when he talks about it to every other man—Life.

APPROPRIATE BEVERAGE

For sailors—Port.

For gossips—Mumm.

For pugilists—Punch.

For undertakers—Beer.

For monks—Benedictine.

For married couples—Half and half—Lippincott's.

ARROWS AND TARGETS

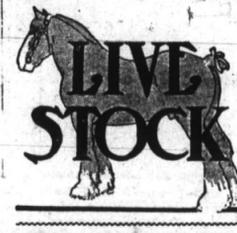

If there were no double standards, there would be no double lives.

The present fashion in woman's dress is the survival of the fittest.

Man forgets; that is his tragedy. Woman remembers; that is hers—Lippincott's.

The State has finally sold the last of the \$11,428,000 improvement bond issue authorized at the last regular session of the General Assembly, to be issued as of date of July 1, 1913, to run to 1933 and bear 4 per cent. interest.

Walter Allen, who two weeks ago shot and seriously wounded Miss Effie Teague, at Rodhis, Rowan county, as a result of criminal carelessness, got 12 months on the roads.

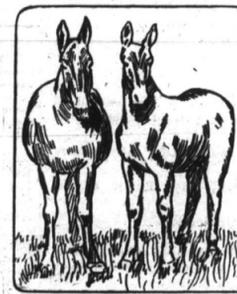

LIVE STOCK

PAYING QUALITIES OF MULE

Three-Year-Old Span Will Be Good for Twenty Years' Service—Always in Demand.

Much has been said and written about the Missouri mules. Envious residents of other states have even intimated that the Missouri and the mule were so closely allied that there is a marked resemblance in looks and disposition, says an editorial in the Missouri Ruralist. This of course is a slander, but we are proud of our long-ears hybrid just the same. It is nothing unusual for a good team of mules to sell at \$200 and upward, but when they double up on that figure there is comment, even in Missouri. A span of raw three-year-olds sold at the American Royal for an even thousand dollars. This was a record for Kansas.

Hardier Than Horses.

as City, but had been topped at other places. Before the show was over a world's record had been established. A yearling mule sold for \$550, more money than had ever been paid for a mule of that age before.

Probably just as valuable animals are raised in other states, but they lack the prestige, and the Missouri farmer gets the cash. Imagine a Kansas, or a man from Iowa or Illinois selling a yearling mule for over half a thousand dollars. The idea is preposterous.

A mule buyer purchased these fancy youngsters. He expects to make money on his investment, and it is reasonable to suppose that he knows his business. When you come to think the matter over the price is not exorbitant after all. The three-year-old span will be good for 20 years of service, and will earn many times over the original sum paid for them.

BONEMEAL GOOD FOR SWINE

Good Results Obtained at Missouri and Nebraska Stations—Strengthening to the Bones.

All kinds of bonemeal are used in the manufacture of fertilizers, but not all kinds are suitable for feed for swine. Bonemeal from a glue factory which has gone through the process in which acid was used is not a suitable feed. But any bonemeal, and it is especially green bone that is ground finely enough, may be fed. Steamed bonemeal is good.

At the Missouri station bonemeal was fed with good results. About an ounce of meal was fed to each hog per day. At the Nebraska station four lots of pigs were fed to determine the value of wheat short, tankage and steamed ground bone as supplemental to cornmeal. The hogs were pastured on alfalfa, and for this reason the lot fed on corn alone made about as satisfactory gain as any, although the lot which was fed bonemeal in addition to the corn had the greatest bone.

Shorts strengthen the bone, and tankage and corn produced much stronger bone than corn alone. Where mixed rations were given, or skim-milk or good pasture, all of which supply ash material, it is doubtful that bonemeal is of much value other than for the purpose of strengthening the bones.

Ration for Lambs

The best ration for the lambs will not be the best ration for the ewes. Nevertheless a fairly good though rather expensive feed mixture for both of them will be oats, four parts; bran, four parts; corn, three parts; oil meal, two parts. If it were possible to separate the ewes from the lambs, it might be advisable to give the lambs a larger proportion of corn and the ewes a smaller proportion of corn. Enough grain should be given to keep the ewes in good flesh, but not fat. The roughage ration for these sheep is not of first-class quality, and therefore it will be necessary to give a good grain ration.

Plants for Animals

Plants build up the dead matter in the earth into higher forms, in which process they store up the heat and energy of the sun. Animals eat plants and set free the heat and energy which the plants have stored up. Plants grow that animals may live.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box, 25 cents.

Geo. H. Kearns of Granite Quarry, Rowan county, scratched himself while shaving and in four days died of blood poison.

ACTIVITIES OF WOMEN

There are 3,167,232 widows in the United States.

In Persia carpet weaving is done exclusively by women.

Housewives purchase \$225,000,000 worth of food each year.

A woman can jump 62 per cent. of the distance a man can.

Princess Mary of England is making a collection of pagan gods.

Of the 737 women who took examinations last year for positions as sorters in the British postal department, 559 qualified, out of which number 70 were given appointments.

Miss Lena Baltz of Pochontan, Ark. has demonstrated that a woman can be just as big a success as a farmer as a man for she cleared \$222.15 from one-tenth of an acre of ground.

For the first time in the history of Switzerland a woman has been called to the bar. She is Franziska Lilli Ziegen, daughter of a Bernese lawyer, and passed all the necessary qualifying examinations.

Of the 7,000,000 women in the United States who are engaged in occupations, 40 per cent. are in the factories, and one-third of the whole number are under twenty-one years of age.

MUSINGS OF A GRASS WIDOW

It is not the most intense love that lasts the longest—the fiercest blaze is the most easily burned out.

No man can come nearer to the understanding of a woman than to understand that he cannot understand her.

When a woman turns her "scorching glance" upon a man, quite naturally it makes him "hot under the collar."

No, I was not jealous of the other woman. I knew the little uncontented thing he called his soul was incapable of love.

Yes, there was one patient and enduring husband. Adam never complained of his mother-in-law or of his wife's extravagance in dress.

After marriage men expect their wives to take their love for granted—a lot of good it does to know the sun is in the heavens when the rain is pouring down.

It takes an expert to detect the difference between flirtation and "the real thing," just as it takes an expert to detect the difference between the imitation and a diamond.

THE GENTLE CYNIC.

The spendthrift wears his purse on his sleeve.

Many a fellow who is crooked goes straight to the bad.

The average man's most vulnerable spot is his pocketbook.

The man who kicks himself goes back on his best friend.

We all have an aim in life, but most of us are mighty poor marksmen.

It's a good plan to stand your ground, but be sure you have some.

We all know that wealth brings happiness; that is, we know it from hearsay.

A woman can solve the secret of a happy married life by simply spending more money with the butcher than with the milliner.

"FIRST AID" HINTS

To men who have to handle injured comrades, the Coal Age gives the following common sense advice:

Don't disturb blood clots.

Don't be rough with the patient.

Don't put bandages on too tight.

Don't touch a wound with the hands.

Don't pull or tear off clothing—cut it away.

Don't wash wounds unless you sterilize the water.

Don't bring ammonia too close to the nostrils.

Don't let the patient know his condition is serious.

POINTED PARAGRAPHS

The clean-tablecloth catches the early green spot.

Even a girl's heartache is forgotten when she has the toothache.

One can never buy a satisfactory brand of popularity at cut rates.

But the man with money to burn may not love the smell of smoke.

Some candidates ought to take the rest cure for their lagging politics.

The Forty Year Test.
An article which would have exceptional merit to succeed for a period of forty years. Chamberlain's Cough Remedy was first offered to the public in 1872. From a small beginning it has grown in favor and popularity, until it has gained a world wide reputation. You will find nothing better for a cough or cold. Try it and you will understand why it is a favorite after a period of more than 40 years. It not only gives relief—it cures. For sale by all druggists. adv.

FAIRY STOCK

HANDLE HORSES IN PASTURE

Green Feed Will Do the Animal Much Good and He Can Exercise and Roll at Pleasure.

Just as soon as the grass in the pasture gets a good start take care of your horses when you come in from the field at night—that is, water and feed them, pull off the harness, rub down the sweat, wash shoulders, etc.—and after horses have eaten their feed turn them into pasture, leaving the feed stalls on. The green feed will do the horse good and he can exercise and roll at his will.

In the morning take a lead with snap attached to one end, and a basis of feed to the pasture; call the horses around you and they will come and eat from the basis in your hand. Then snap the lead into the ring. After a few days you will have no trouble in catching most of the horses. Never chase horses around the pasture, trying to catch them, for if you do they will soon think you their enemy, says a writer in an exchange. Lead them to the barn and feed the same as if they had been stabled. They will eat but little hay. By the time you are ready for the field the horses will be in good shape.

We have used this method in caring for farm horses and find that it saves both feed and labor. It does not take so long to clean the horses in the morning, as they will have done this for themselves fairly well by rubbing and rolling, and there are no stables to clean, no bedding to put down, no manure to haul out, while the horses will stand the knocks much better and come through the summer's work usually in fine condition. To those who have never followed this plan I would suggest a season's trial, and in my opinion you will find it preferable to any other method.

KEEP TANKS FROM FREEZING

Good Sized Copper Bucket, Inverted, Allowing Air to Remain, Will Prevent All Trouble.

A great many water tanks are ruined each year by the expansion of the water when freezing in severe weather. A simple device to prevent this, writes Ira R. Hicks in the Popular Mechanics, is to procure a good-sized copper bucket and suspend it in the water in an inverted position, allowing air to remain in the bucket. When the water freezes the extra pressure that would otherwise be exerted on the walls of the tank, instead acts on the air in the bucket, which is compressed, and thus the tank is relieved. An iron or tin bucket would soon rust out in the water, and for this reason, it is best to use a copper bucket.

TEACHING A COLT TO WORK

Walking Gait, Most Essential in Heavy Work, is Most Often Neglected in Training.

Not enough care is given to teaching colts to work. We often hear of breaking colts, but there is little breaking to do with the modern draft colt. They do need to be taught a few things, such as backing with a load and standing quietly when stopped. How many accidents occur from the team starting before they are told to start, and it can be avoided usually by proper training.

The walking gait is the most essential in heavy work horses, and yet it is often neglected in the training, says a writer in an exchange. So many young horses know nothing about backing, for little attention is paid to this accomplishment in horses, and yet it is often very necessary that the team understand how to place the wagon in position in this manner. It should be done, not by pulling the animals back by main strength, but by talking to them, accompanied by a gentle pull on the reins.

A colt properly trained is worth considerably more than one with little or no training on account of greater ease in handling, and a great amount of work accomplished with less risk to both driver and the animals. It would be time well spent if more attention were given to these matters by farmer and horse dealers.

Feeding Farm Animals.
The feeding of farm animals not only enables the farmer to return from 85 to 90 per cent. of the fertilizing value of the crops to the soil, but in growing such crops as peas, alfalfa, clovers and other legumes there is more nitrogen stored in the soil than is sold in the form of animal products.

Kickapoo Worm Killer Expels Worms.
The cause of your child's ill health is the worms. Kickapoo Worm Killer—the Sallow complexion—The dark circles under the eyes—All are indications of worms, the cause of child's unhealthy condition. For the removal of seat, stomach and pin worms, Kickapoo Worm Killer gives sure relief. Its laxative effect adds tone to the general system. Supplied as a candy confection—children like it. Safe and sure relief. Guaranteed—buy a box today. Price 25c.—All druggists or by mail, Kickapoo Indian Medicine Co., Phila. or St. Louis. adv.

Stubborn, Annoying Coughs Cured.
"My husband had a cough for 15 years and my son for 8 years. Dr. King's New Discovery completely cured them, for which I am most thankful," writes Mrs. David Moor of Baginaw, Ala. What Dr. King's New Discovery did for these men it will do for you. Dr. King's New Discovery should be in every home. Stop hacking cough, relieve grippe, and all throat and lung ailments. Money back if it fails. All druggists. Price 50c and \$1.00. H. E. Shuckler & Co., Philadelphia and St. Louis. adv.

Force Way to Popularity.
American motor cars are overwhelming the prejudice felt against them in the Madras district of India.

British Army Movies.
An extraordinary film, showing the making and working of the British army, is being exhibited in London. Twenty-five thousand officers and men figure in the film. Ceremonial parades, artillery and cavalry drills, the firing corps and field maneuvers are pictured. An immediate result of the exhibition is the enrolling of recruits for the army, recruiting officers being stationed at the theaters where the films are being displayed.

Gift of the Sex.
Jones was telling what an excellent cook his wife was. Smith boasted that his wife was a splendid dressmaker, and Robinson proudly stated that his wife was an unusually clever artist.

Brown was not to be outdone, so he remarked: "My wife is a great linguist."

No one seemed impressed. There was a moment's silence, then Robinson spoke up. "Humph," he exclaimed, "they all are!"—Youth's Companion.

Je Witt's Little curly Risers.
The famous little curly risers.

Rev. C. H. Norris of Holly Springs, Wake county, has sued the Norfolk Southern railroad for \$2,000 damages for delay in reaching the Shelby Baptist Convention at Shelby last fall. He secured permission to flag a through train, but the train failed to stop for him.

The 13-year-old daughter of H. E. Calhoun, of Rowland, Rowson county, was burned to death last week. Her mother being ill, the little girl was cleaning house, and while standing on a chair cleaning off the mantel her apron caught fire.

JUMPING INTO A FIRE NET

There is No Danger to Bones if You Only Manage to Do It the Right Way.

At a recent fire in the Corona district of New York, says the Sun of that city, Mrs. Martha Hennings jumped from her rooms on the third story of her residence into a fire net with her baby in her arms. She was slightly hurt, but the baby was unharmed. The bystanders marveled at the happy ending of the feat, but the firemen declared there was not the least danger.

The fact is that the net will save persons absolutely without a scratch provided the jumper does not lose his head. Somehow the fear that bones will be broken seems to cause the jumper to turn or twist in such a manner that injury is bound to ensue. Others who undertake the high window leap with confidence in the result are rarely even jarred badly.

At a recent fifty-sixth street tenement fire in New York that resulted in more of a smoke alarm than a blaze a man and his wife were seen to get out on the ledge of a fifth story window. The firemen told them to wait a moment, that there might be no need to jump. The man cried that they were suffocating and must jump.

The firemen stretched the net and shouted for them to pose themselves properly and jump one at a time. But even while the firemen were shouting the instructions the couple kissed each other, looked arms and legs. They came down straight and sure as a plummet right into
