that these green foods contain in order that the system may be kept cleansed.

No housewife should allow herself to fall into the habit of giving a meat and bread diet. Eat plenty of good winter foods, such as meat, pork, potatoes, cornbread, peas, and beans, but balance it with plenty of green vegetables and fruits. Serve onions with potatoes, tomatoes with beans, apple sauce with meat. Balance your diet and you will be better able to resist the changes of winter.

During the heat of summer the green foods—fresh vegetables, fruits and melons—should predominate, because the system is kept cool and cleansed by these mineral salts that are so abundant in this class of foods.

TRADE IN WAR RELICS.

European Children Have Become Grea Barterers.

There is scarcely a school in Rurepean countries remaining neutral
which has not been struck by the
mania for the accumulation of war
relics. The desire for possession
of collections of weird and strange
objects extends even to schools of
the belligerent countries.
First in the list of interesting
items comes bullets. How these
bullets ever find their way from
some Siberian regiment into the
into the hands of a Danish urchis
or how a piece of shrapnel from
the battlefield of the Aisne is disdiscovered in the pockets of a little Dutch child are oftentimes
strange stories of school boy bartering.

strange stories of school boy bartering.

When the war continued its dreary course and the supply of bullets increased, certain objects of murderous intent began to get certain specific values. The old Belgian army bullets made after a pattern of the year 1883, are not are not rated very highly.

When almost 30,000 Belgian solmarched across the Dutch frontier and threw away their arms, the supply of these heavy bullets was so large that only beginners in the field of collecting were willing to accept them at all.

Neither does the true connoisseur give much for the English bullets.

Ever Salivated by Calomel? Horrible!

Calomel is Quicksilver and Acts like Dynamite on your Kidneys.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your bile dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out, and feel that you need a dose of dangerous calomel, just remember that your druggist sells for 50c a large bottle of Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and cannot salivate.

Don't take Calomel I It makes you sick next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe.

Recently it was published abroad that a cotton mill at Gastonia, the Flint Manufacturing Company had earned a dividend of 85 per cent. year. Now it is reported that the mill expended \$90.000 for improvements in 1914 and paid a special dividend, but that this was done out of the accumulated earnings of the past eight years, not from the earnings of one year.

Bird Protection Law Still Effective.

A Washington, D. C., Department of Agriculture Bulletin says: Many of the press comments on the decision of the United States District Court, rendered March 20, at Topeka, Kansas, holding the Federal Migratory Bird Law is unconstitutional, according to the United States Department of Agricultura, are erroneous and are apt to mislead the public concerning the real situation in this matter.

The Kansas decision, like a former decision to the same effect in the Eastern District of Arkansas, is it limited in its operation solely to the district in which it was rendered. Neither decision settles or nullifies the law, and the exact contrary has been held by the United States District Court for South Dakota. The Arkansas case has has been appealed to and is now pending in the United States Bupreme Court. The act of Congress protecting migratory birds stands effective until the Supreme Court in Supreme Mrs. Wm. M. Thompson, of Batculture to enforce this law, and the
