

Pains, Dizzy Spells

Mrs. G.P. Cartwright, of Whitwell, Tenn., writes: "I suffered with bearing-down pains. . . The dizzy spells got so bad that when I would start to walk, I would just pretty nearly fall. Was very much run-down. I thought Cardui would help me. It helped me so much that I got me another bottle. I got a whole lot better. The dizzy spells and the bearing-down pains. . . left me entirely."

GOOD ROADS NOW IMPORTANT

Transportation of Raw Materials and Finished Products of Farming Industries.

Highway authorities are facing a new public demand which must be met at once the most careful study. Every resource of the country must be utilized to the utmost and all unproductive expenditures of money and energy must be stopped. The efficiency of the American army and navy will be fostered by greater efficiency among those called upon to bear the financial strain on our resources and to furnish the labor and material needed to supply our armed forces.

The products of the forest, mine, farm and factory must be supplied to both national and private consumer at the lowest reasonable cost in order that all may contribute their utmost.

About twenty-ack carloads of lumber are being received daily at Camp Greene, Charlotte, which is about half of the needed daily supply.

The rider of the balloon of the Crew Ballooning Company, of Greensboro, N. C., Mr. Bugbee, was instantly killed by landing on the wires of the Southern Power Company at Cherryville. When within twenty-five feet of the ground, the parachute doubled over the live wires and the body hung head downward for an hour burned into a crisp amid the gaze of thousands of helpless friends, who had gathered at the annual picnic. The deceased leaves a wife and several children in Greensboro.

Members of the Buncombe county Board of commissioners recently voted to purchase 40,000 cans to be sold at cost to the people of the county who wish to can foodstuffs for winter.

R. C. Teague, a Mexican citizen and an acquaintance of Francisco Villa, is spending several weeks in Catawba county with his brother, J. B. Teague. Mr. Teague talks interestingly of his adopted country. He was born and raised in Alexander county, but has been living in Altar, Sonora, Mexico, for about twenty years.

Home of Poets.

It is a strange fact that although Kilmarnock is a very prosaic looking factory town—the most commonplace in the region—it is the home of numbers of poets. Perhaps the rhythm of the shuttles in the great weaving mills is productive of poetic measures.

At the Burns' monument in Ayr you may see the wedding ring of Jenn Armour and the Bible Burns gave to Highland Mary, and you may walk across the very field where Burns turned up a daisy with his plow, and turned it into a lyric.

But to try to recreate a personality by looking at books and rings and even houses, or by following the footsteps of the great man, is really a hopeless task. The spirit of Burns lives rather in the homely wit of the Ayrshire people, in their ways of living and thinking, which are not much changed since his day. And it lives even more vividly in the Ayrshire country side, a landscape lyrical and homely, with its velvet fields and whispering streams, its "bonnie banks and braes."

Some Leaves Live Long.

Evergreen trees do not retain their leaves forever, but are so called because the new leaves appear before the old ones are shed. Miss Vinnie A. Beale has been studying the many evergreens of the Pacific Northwest to ascertain how long the several species retain their leaves. She finds a wide variety, the shortest being the California buckthorn, which sheds some of its leaves in autumn and retains the others only until those of the coming season are mature. The longest is the short-leaved yew, which retains its leaves for from five to twelve years, and some evergreens persisting for as long as 23 years. Saplings lose their leaves more quickly than mature trees and trees in the open more quickly than those in shady places.

A Prophecy That Failed.

Dr. Christopher Girtanner, a famous professor of Göttingen, prophesied as late as the last century that before it had passed the transmutation of gold would be generally known and practiced. "Every chemist and artist," he wrote, "will make gold; kitchen utensils will be of silver and even gold, which will contribute more than anything else to prolong life, which at present is poisoned by the oxides of copper, lead and iron, which we daily swallow with our food." Perhaps this is something like that—R. L. Geare, in American Medicine.

His Wife—I wish you'd dress more neatly. Just look at Mr. Fussbody. His trousers are always so perfectly creased.

Mr. Fritch—He's got nothing on me. My pants have ten creases to his one.

GRAIN-FED BREEDING SWINE

Breeders Want Hogs With Strong, Dense Bones, High in Mineral Elements, Favored.

In order that losses by accident may be prevented and the period of usefulness of the animals for breeding purposes lengthened, breeders want hogs with strong, dense bones. Since cereal grains are low in mineral elements, they should be supplemented by feeds rich in these constituents. When confined in yards hogs are often fed largely or entirely on grain rations, so that their bones are soft and easily broken. Rations of corn supplemented by tannage and by skim-milk produce the most bone.

SEVENTEEN KILLED, TWO SCORE HURT IN WRECK

North Bradford, Conn.—Seventeen persons were killed and upwards of two score injured, some probably fatally, when two trolley cars on the Shore Line Electric Railway met head on at high speed a short distance from the location station. Both cars were of heavy construction and the force of the impact locked them together in a mass of twisted iron and steel and splintered wood. Both cars were well filled with passengers.

FACTORS IN BEEF CATTLE PRODUCTION

(By W. L. BLIZZARD, Department of Animal Husbandry, Oklahoma A. and M. College, Stillwater.)

To the man who undertakes to introduce live-stock production into his system of farming, he must have an object in view, some definite, well-organized plan to work to.

In introducing beef cattle on a farm, several important questions present themselves:

1. What provision has been made for housing cattle; are there good fences around the pasture and plenty of roomy paddocks near the barns; these are certainly important.
2. How many cattle will the farm support; this important consideration should not be overlooked—"better a little understocked than overstocked."
3. What crops and what system of cropping should be planned to supply the most suitable feeds? Good, permanent pasture and alfalfa crops are a valuable asset to any live-stock farm. The rotation of the field crops should be of such a nature that crops of the soil will always be provided.
4. How will the production from the herd be disposed of to the best advantage? The disposal of the offspring from a beef-cattle herd will depend upon the type and quality of cattle raised, also how well they are grown out. If purebreds, the offspring will be sold largely for breeding purposes.

Good Road Near Chicago.

whether it be small or large, to the national defense. The transportation of raw materials and finished products becomes far more important than ever before, for transportation charges form a large part of the cost of many essentials.

Utility must be given more weight than heretofore in reaching decisions as to road improvements and more enjoyment, ordinarily a legitimate object for some expenditure of public funds, must be relegated to the background for a time. Our roads have acquired an importance as agencies in national preparedness which calls for a mobilization of our road builders for the great emergency in the broad transportation problems of the country.

CURE FOR "DENTIST FRIGHT"

Nervous Fatigue Suffered by Patient Result of Unnecessary Strain of Expecting a Hurt.

That curious fear experienced by many known as "dentist fright" is altogether unnecessary, according to doctors.

"The fatigue which results from an hour or more of this dentist tension is too well known to need description," says Annie Payson Call, the well-known teacher of nerve training.

"Most of the nervous fatigue suffered by the dentist's work is in consequence of the unnecessary strain of expecting a hurt, and not from any actual pain inflicted.
