saving the best seed.

West Raleigh, N C

It is a custom among some wheat growers to secure new seed from States further north every few years. It is claimed by these growers that wheat deteriorates when grown here several years in succession. Some even believe that a part of the wheat turns to cheat. The seed gotten from further north is said to yield better than the home-grown seed when plant

Home-Grown and Northern Grow

Seed Wheat Compared. In order to secure information on this point the Experiment Station and State Department of Agriculture have compared the yields from home-grown and northern grown seed wheat of the same varieties. Several varieties have been compared and in each case the

have been placed in grain producing states; 4,537 into lumber states. the home-grown seed produced at the home-grown seed prod northern grown seed produced 12.72 bushels per acre or 3.78 bushels per acre less than the home-grown seed.

Bus. per acre Yield from home-grown

 12.72
 Increase due to use of home-grown seed 3.78

The results of the 1914 test were even more striking. In this compari son the home-grown seed produced 6.4 bushels per acre more than the Results at the Piedmont Branch

Similar results were gotten at the Piedmont Branch Station. During three years (1914-1916) twenty-three currents were made between home. The cost to the countries is were lowcomparisons were made between home comparisons were made between home-grown and northern grown seed of the same varieties. In these tests the home-grown seed produced at the rate of 16.01 bushels per acre while the grown and northern grown seed of the of 16.01 bushels per acre while the orthern grown seed produced 15.26 bushels. This gives an average of three pecks per acre in favor of the home-grown seed. The test of 1914 contained 13 comparisons in which the home grown seed averaged 1.3 bushels per

acre more than the northern grown. Results from Another State. Similar questions have arisen in other states. The following paragraph from Bulletin 137 of the Utah Experi-ment Station gives a summary of their results when home-grown and out-side seed wheat were compared: "It is a withdrawal of all negro troops from common practice for big grain grow-Texas, signed by all the members of the Texas delegation in Congress, was wheat. In this manner large quantiresented at the while house by Sen- ties of seed wheat are annually imported into the intermountain region, under the mistaken impression that the home-grown seed is inferior in quality. The results of this investigation, therefore, are of utmost practical importance. The practice of shipping in seed wheat is entirely unnecessary and wasteful. The quality of the home-grown hard wheats is really superior to the original seed. Good pure wheat seed should be selected of the kind the grower desires to raise

Seed Wheat.

The above results from three year comparison of home-grown and north-ern grown seed wheat clearly indicate that home-grown seed are preferable. that home-grown seed are preferable. If this be true what does cause deteri-oration in seed wheat? The condition own as deterioration or "running out" of seed wheat is usually due to or care of the seed. Too often our wheat fields are infested with wild onions, cheat, mustard, and other weeds. Wheat containing seed of such weeds is unfit for seed purposes. Wheat that is damaged in the field. will soon become unfit for seed pur-Such conditions would cause deterioration of seed wheat in any sec tion of the country. How Can One Secure the Best Seed

ing and Marketing will receive promp attention if directed to O. J. McCon Wheat. The best variety of wheat for a sec-tion is one that has been chosen on nell. Agricultural Extension Service,

ARMIES NEED FOOD: DON'T LET IT BURN

Planting and Raising of Crops Will Not Suffice, Every Care Must be Exercised Toward the Prevention of Destruction and Waste of the Food After it is Made and Housed

"Our armies need food; don't let it burn!" is the slogan adopted by the letter asks co-operation in the cambichigan Conservation Association recently, and it might well be adopted of National Defense and which has the slogan of every association and individual in the country at this as the slogan of every association and every individual in the country at this time. Vast numbers of associations and government agencies throughout the country are urging every hour the growing and conservation of foodstuffs. The reports so far from the pepartment of Agriculture indicate an enormous yield for the year. But planting and raising crops will not suffice. Every care must be exercised toward the prevention of the destruction and waste of the food after it has been made and housed.

A few weeks ago a grain elevator in Chicago was destroyed by fire and with it wheat sufficient to make 50,000,000 even the conservation of national resources, and pressing consequence that every means should be taken to prevent this in Commissioner Young's appeal to and then further improved in the lo-cality by selecting seed from the best plants. One can easily select suffi-cient good seed from a field to plant a seed patch. A small seed patch could

be kept free from wild onions and mix-tures of other grains. By this method one could be sure of producing the it wheat sufficient to make 50,000,000 event.

loaves of bread. Taking this amount of bread and estimating the amount of flour used by bakers in making bread, and figuring by the army quartermaster Department's allowance for feeding a soldier, this wheat destroyed would furnish the first increment of the new residual army comment of the new residual army comment of the new residual army comment of please for the makings and The high price of wheat is likely to result in a shortage of home-grown seed for planting this fall. This may now. Growers who have good seed should have the best for planting this fail. Seedsmen of the state who have not yet collected their supply should ment of the new national army comment in plants for the posed of 687,000 men in bread for handling of breadstuffs.

not yet collected their supply should use every effort to secure the best North Carolina grown seed. Millers who have good seed wheat grown in the state may benefit themselves and stroys a considerable amount of property there is almost always some lack of care or else a criminal intent. Extremely few fires are "providential." For further information write the Division of Agronomy, North Carolina Experiment Station, West Raleigh. Hundreds and thousands of young men have within the past few months walkhave within the past few months walk-ed into recruiting stations and volun-teered to lay their lives at the disposal of the American government to pros-ecute this war. To those who stay at home it is but a small effort to put forth to practice the eternal visi-lance that will prevent the fires which IS NOW VERY IMPORTANT may destroy foodstuffs, every ounce of which is sorely needed at this time to feed America's soldiers, America's al-lies and America's women and chil-ABNORMAL TIMES DEMAND THAT ALL OOTTON IN NORTH CAROdren who must remain at home and fight the battles that are absolutely essential to "keep the home fires By O.
