Convicted of Burning Lumber to Collect Insurance.

In the prosecution of fire fiends in North Carolina for the suppression of incendiary fires that greatly increase the annual fire waste in this state, another point is just scored by the state insurance department in the conviction of Martha Fain, at Murphy, charged with implication in the burning of many thousand feet of lumber to collect excessive insurance. This is the case in which Deputy Insurance Commissioner F. M. Jordan worked up the evidence that included the matching of sheets of waste paper used in starting the fire that were taken from a catalogue a well known mail order house. A copy of the catalogue was found in the home of the woman and it had the pages in question missing, this affording effective circumstantial evidence.

Alleged spies, declared to have been in the act of flashing messages to sea from an isolated spot near Virginia Beach, were arrested Wednesday night by secret service men.

Miffed at the Senate's delay in acting on the Federal suffrage amendment, women in Washington made an attempt to start a demonstration. Twenty-nine of them were finally locked up until the crowds had left the streets.

Out of the last harvest the American people, by abstinence, saved 140,000,000 bushels of wheat to feed the hungry allied nations; and these same people are going to stay right on the sugar job and see it through.

The home of Jesse A. Pratt, in which he lay a corpse in Rockingham county, burned down last week.

Interesting Sugar Items.

The present household sugar ration—with little chance of increase—is two pounds a month in America, two pounds in England, and one and one half pounds in France.

Sugar bowls have been banished from American restaurants and wherever is served his portion of sugar and no more.

Naval officers and their families who buy at commissary stores have gone on the honor system of sugar purchase established by the Food Administration for civilians.

Many of the larger hotels in the country are using no cane sugar in pastries and desserts.

Vessels sailing from New York in June were out more than 25 percent in their sugar requisitions, to conform to the Food Administration ration.

Restaurants and hotels are restricted to two pounds of sugar for every twenty meals served. This includes sugar for kitchen as well as table use.

Almost 70 percent of all the sugar consumed in this country is used in the households. So it is up to the women to make the sugar go around.

Out of the last harvest the American people, by abstinence, saved 140,000,000 bushels of wheat to feed the hungry allied nations; and these same people are going to stay right on the sugar job and see it through.

Wash the Socks You Knit with Grandma's Powdered Soap

Wool Socks Will Not Shrink Get Hard or Knot Up When Washed With Grandma

GRANDMA leaves them soft and fluffy and makes them easy on the feet. Many inferior soaps are made with rosin and when you wash woolen socks with them it causes the socks to shrink and get hard and knot up. Countless hours spent in knitting have been lost just because the socks have been practically ruined by improper washing.

GRANDMA'S Powdered Soap

Follow these directions and you will never have any trouble. Use GRANDMA in luke warm water and wash the socks in the wonderful suds. Then rinse in luke warm water, shake them out well (do not wring) and hang them up to dry slowly. GRANDMA is the most economical and finest "all round" household soap that can be used. You measure it out with a spoon—no waste. Try it.
