GRAHAM, N. C., Dec. 26, 1918.

HON. WALTER H. PAGE DEAD.

The death of Hon. Walter Hine Page at Pinehurst last Sunday night was a shock to everyo who knew him or knew of him. He resigned as Ambassador at th Court of St. James a few week ago on account of failing health and returned home. He first we to a hospital in New York an later went to Pinchurst. He has apparently improved, but the end came quietly Sunday night. Mr Page was a North Carolinian and had won fame as editor and put

He was born at Cary and was member of the distinguished Pag family of Moore county.

King George and the Queen of England cabled their sympathy Mrs. Page.

The burial was at Pinehurst Tues day afternoon.

"Is There A Santa Claus?"

New York Sun.

We take pleasure in answering a once and thus prominently the con munication below, expressing at th same time our great gratification that the faithful author is numbe ed among the friends of the Sun.

Dear Editor :- I am eight year old. Some of my little friends sa there is no Santa Claus, Papa say "If you see it in the Sun it's so Please tell me the truth. Is ther a Santa Claus?

VIRGINIA O'HANLON, 125 West 95th S

Virginia; your little friends are wrong. They have been affecte by the skepticism of a skeptici skepticism of a skeptical age. They do not believe excep They think that not in can be that is not comprehensibl by their little minds. All minds Virginia, whether they be men's or children's are little. In this great universe of ours man is a mere insect, an ant, in his intellect a ared with the boundless worl about him, as measured by the in telligence capable of grasping the of truth and knowledge.

Yes, Virginia, there is a Claus. He exists as certainly as love and generosity and devotion exist, and you know that the abound and give to your life its highest beauty and joy. Alas, how dreary would be the world if there were no Santa Claus. There would be no child-like faith then, no poetry, no romance to make tolerable its existence. We should have no enjoyment except in sense and light, the eternal light with the eternal which childhood filled the world would be extinguished.

Not believe in Santa Claus! You might as well not believe in fairies You might get your Papa to nire men to watch in all the chinneys on Christmas eve to catch Santa Claus, but even if they did not Claus coming down. d that prove? Nobody what would that prove? Santa Claus, but that is n sign there is no Santa Claus. Th real things in the world are those that neither men nor children can see. Did vou ever see fairie dancing on the lawn? Of course not, but that's no proof that they are not there. Nobody can conceive or imagine, all the wonders that are unseen and unseeabl

You might tear apart the baby's rattle and see what makes the noise inside, but there is a vell covering the unseen ,world which not the strongest man, nor even the united strength of all the strongest men that ever lived could apart. Only faith, fancies, poetry love, romance, can push aside th curtain and view and picture the supernal beauty and glory beyond.

Is it all real? Oh, Virginia, in all the world, there is nothing else real and abiding.

No Santa Claus? Thank God. he sand years from now, Virginia, nav ten times ten thousand years fro now, he will continue to make glad the heart of childhood.

Bismarck could fashion an im perial State, but could not guarantee an unfailing supply of Bismarks to hold it together.

SUPPLY OF ICE OF IMPORTANCE

Cost of Harvesting and Storing Not Great Compared to Comfort It Brings.

PATRIOTIC DUTY OF FARMER

Will Help Relieve Drain on City Sup ply and on Transportation-Affords Protection for Many Perishable Products.

(Prepared by the United States Department of Agriculture.)
Every farmer who can put up natural ice should plan to do so this winther as a patriotic duty. Each farm ice house will help relieve the drain on the city supply and on transportation, and will guarantee protection for the

from the farm when warm weather pleting.

comes again.

Save Fuel Supply. These war times make heavy de ice while natural ice may be harvested at a time when farm work is not pressing and both man and horse labor are not otherwise profitably employed Ice is one of those luxuries which in many sections of the country can be many sections of the country can be also be a first the many special problems that harvesting and storing it is not great as compared with the comfort that it is not great as compared with the comfort that it brings.

An ample supply of ice is of greater economic importance in the country home than in the city residence. Citi Important in Country people can purchase perishable sup plies as needed, but the remoteness of country homes from markets often ren ders it necessary to use canned. corned or smoked meat products dur ing the season of the year when the table should be supplied with fresh meats. Not only is the use of ice im portant in the preservation of frest meats, butter, and other table supplies but the production of high-grade do mestic dairy products is almost impos sible without it. Many markets to which milk is now shipped demand that it be cooled before shipment to a degree not attainable without the use

Catarrh Cannot Be Cured Catarrh Cannot Be Cured with Local Applications, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you most take an internal remedy. Hail's Catarrh Medicine is taken internally and act thru the blood on the mucous stratee of the system Hail's Catarrh Medicine was prescribed by one of the best physical forms of the best tonics known, combined with some of the best bood partiers. BEST STORAGE OF POTATOES Growers Are Urged to Take Safe guards to Prevent Loss of This

Important Crop. (Prepared by the United States Department of Agriculture.)
Proper storage of potatoes would prevent much of the annual loss in this important food crop. Inexperi enced growers especially are urged to

take safeguards against spoilage. Potatoes should be stored in a cool dark cellar or be buried in a pit in the garden. They must not be allowed to freeze. If they are buried in pits the potatoes must be covered sufficiently to keep out all frost. If exposed to

the light they will turn green.

A good method of storing potatoes is to place them in barrels with a few ries a highly complimentary editorial holes cut in the sides near the bottom for ventilation. Cover the barrels with old sacks and place them in s cool, dark part of the cellar.

SENATOR OVERMAN FIGHTS CHILD LABOR AMENDMENTS

Washington.-Senator Overman atacked the child labor amendment to the revenue bill in the senate. He em phasized the argument that the amend-ment is not to raise revenue, but to use the taxing power "to nullify an opinion of the supreme court in which it states that the net (the Child Labo

Calomel Salivates and Makes You Sick

Acts like dynamite on a sluggish liver and you lose a day's work.

There's no reason why a person should take sickening, salivating calomel when a few cents but a large bottle of Dodson's liver Tone—a perfect substitute for calomel. It is a pleasant vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick, and cannot salivate.

WOOD VS. COAL FOR HEATING

One Cord of Well-Seasoned Hardwood Equal in Value to One Ton of Anthracite.

(Prepared by the United States Department of Agriculture.)
In heating value one standard cord of well-seasoned hickory, oak, beech, birch, hard maple, ash, elm, locust or cherry wood is approximately equal to one ton (2,000 pounds of anthracite coal. However, a cord and a half of soft maple and two cords of cedar, popher or basswood are required to give the same amount of heat.

One cord of mixed wood, well sea-

Live Stock and Sugar Beets Make Most Profitable Com-

INCREASE GROWERS' PROFITS

Animals Utilize Tops and Pulp to Bes Advantage—Manure Can Be Used to Enrich Soil—Other Feeds Are Necessary.

(Prepared by the United States Depart-ment of Agriculture.) Sugar-beet growers should utilize more live stock. The stock utilizes by-products of sugar-beet growing the tops and pulp—and increases the growers' profits, but there is another reason—the nation needs more meat as well as sugar. The combination of stock raising and sugar-beet growing, while beneficial to farmers will also harden. Live steek on the benefit the nation. Live stock on the sugar-beet farm constitutes an impor sugar-beet farm constitutes an impor-tant factor in success of beet grow-ing from two standpoints: (1) The utilization of beet tops and pulp to the best advantage, and (2) the pro-duction of stable-or barnyard manure, which can be used to enrich the soil. The feeding operations should be lo-cated on the farms where the best tops are produced. When practicable, the pulp should be handled with frame and fed. There should be available labor for handling the stock, and oth-er feeding stuffs used in combination with the pulp and tops should be ob-

Sugar-beet tops and pulp are good feed for many kinds of live stock in-cluding chickens, hogs, sheep, cattle, and, to some extent, horses. Gener-ally, the tops and pulp are fed to sheep and cattle. They may be pas-tured off, a process which consists in turning the live stock into the beet field after the beets have been vested and the roots removed. vested and the roots removed. The tops are left scattered over the ground, and this method of feeding results in the ground being more or less trampled. Sheep especially are inclined to travel more generally in paths, thereby trampling the ground unevenly. In no case should the pas-turing of the tops be permitted when the ground is wet, since the ground itself would be seriously injured by trampling in that condition and many of the tops would be wasted by being trampled into the ground. While live stock thrives on beet tops and pulp. other feed must be used in finishing the animals for the market. Beet tops, especially the crowns, contain considerable mineral matter, which is beneficial to live stock, but it should

not be fed in too large quantities.

Aside from pasturing the tops, they are sometimes allowed to cure partly and are then gathered into piles, hauled to the feed yard and fed in racks. This is a much more economical method than pasturing, but it in volves the additional expense of gathering and hauling. The tops may also be used as enslage. When chopped with straw, cornstalks or other rough age excellent silage is produced. Both the tops and the pulp are excellent fo

Simple Satisfactory Feeding Trough.

dairy cows, since they act as a tonic upon the animals as well as a food, and increase the flow of milk. Pulp is either used fresh or dried. It is dried artificially, either by itself or in combination with molasses. The object in drying the pulp is to make it easier to handle. About 80 per cent of the weight is lost in drying dried pulp should be soaked eral hours before it is fed to

Helps Milk Flow.
Animals cannot be finished for the market on the beet by-products alone and unless other feed is available it will not be advisable to purchase an mals for feeding purposes with a view to turning them on the market later to turning them on the market later. If the farmer is provided with dairy cows, it is advisable to furnish them with one or two feeds of tops or pulp each day. The tops, when cured or pitted, will keep for several months; the pulp, when left in a large pile, will not spoil for feeding purposes, except a thin layer on the surface. If the tops or the pulp are fed heavily to delive cows a distinct increase in to dairy cows, a distinct increase is the flow of milk marks the top and pulp-feeding period, and there will generally be a distinct falling off in the flow of milk when this feed is discontinued. If the supply of tops and pulp is limited, it is better to continue the feeding over a longer ported the feeding over a longer period; a smaller amount to each of the

The recommendation of Dreco by leading anthorities and the squally outspoken praise of this great remedy by scores of parents through out the South are the best recommendations any medicine can have.

Nothing in the world so strengthens the weak, so rehally restores lost nerve foces, so surely mikes the ailing and peevish young woman or growing boy well, strong and cheerful as a treatment by nature's own benificent methods.

"My little son, Varney, was in a terribly run down condition" declares R. I. Lewis, a highly respected farmer of R. F. D., No. 2, Winston-Salem. "He has sinvey been a puny and delicate child and I couldn't get anything to make him grow. But Dreco has his it spot and he is improving wondershim grow. It has mice bein grow at the same and had a specific fine and you can almost see him grow. It has made him as spry as a rabire, and I told him the other day I would have to slow him up as he was getting too alive."

Dreco does its curative work in simple, straightforward way. It wasts little time in getting the arteries with rich new blood and ouilding up the body for its fight against disease.

Dreco is sold throughout the country by leading druggists and

s fight against disease. Dreco is sold throughout the ountry by leading druggists and s particularly recentled to Graham by Graham Drug Co.

METHODS OUTLINED TO MAKE CORDWOOD

Common Plan Is to Cut Trees Into Four-Foot Lengths.

Sawing is Usually Done by Machines Driven by Gasoline or Electricity

Sawing is Usually Done by Machines, Driven by Gasoline or Electricity.

—Small Pieces Can Be Packed Closely.

(Prepared by the United States Departs ment of Agriculture.)

The most common method of making cordwood is to cut the trees into four-foot lengths with the ax and split the larger pieces. The pieces are then pilled in a standard cord, which is eight feet long, four feet high, and four feet wide. The contents are 128 cubic feet, of which about 70 per cent is wood and 30 per cent air. Wood cut four feet long can be sold to brick-yards, lime klins, metal working plants, and other industries, but is too large for household use. This method is used chiefly where the tree growth is comparatively small, as in second growth because such wood splits easily.

Another method, and one better adapted for old growth hard woods, which are difficult to split, as to saw the tree into logs of convenient lengths, say from 10 to 15 feet. These are "snaked" out to the edge of tit, woodland and there sawed and split the long of side with the lind of the proposition of the pr

are "snaked" out to the edge of the woodland and there sawed and split

Wood Piled Ready for Splitting.

and containing 50 acres, more or furnace. The sawing is usually done by machine, driven either by gasolind or by electricity. The wood is piled four feet high and eight feet long such a pile being called a "stove wood" "running" cord or "run." When the wood is sawed into 16-inch lengths as is customary with stove material three runs are theoretically equivalent.

nomical for Those Who Grow Them in Sufficient Quantities for Family Use.

(Prepared by the United States Deparment of Agriculture.) ment of Agriculture.)
The storing of late vegetables is at
economy for those who grow them it
sufficient quantity for the needs of the family. To care for the surplus vegetable

or near the home. Often the late vegetables from small garden may be stored with n

outlay of money,
When considerable quantities of vegetables are grown it is frequ advisable to construct permanent storage facilities in the form of a storage room in the basement of the dwelling or under an outbuilding or to build an outdoor cellar of wood or masonry. If permanent facilities are not available late root crops can be kept in outdoor pits or banks, requiring cash outlay except for labor.
