Gossard Corsets

The Original, Unequalled Front-Lacing Corsets are Hygienically Correct

HEALTH should be the first consideration in the purchase of your corset. Only by a thorough appreciation of this fundamental fact can any woman guard herself against those bodily ailments that are so often the resuls of improper corsetry. The woman who buys her corset largely for appearance without proper regard for its hygienic qualities is nearer the hospital every time she puts it on.

There ere many reasons why you should wear Gossards besides the obvious one that they are a gratifying acquisition to the daintiest wardrobe. The real value in these inimitable corsets cannot be measured in terms of cloth, boning and lace. They must be measured in terms of health, comfort and style.

During the war abnormal conditions made the material question a serious one for every manufacturer. The tremendous demand for Gossards grew from day to day, adding to the manufacturer's problems. Huge factories working at capacity could not meet the situation. A tribute indeed to Gossard supremacy.

Our best efforts at production are still taxed by the demand that is growing larger day by day as women come to the fuller appreciation of what Gossards accomplished in sustaining Ameican womanhood thru the world war. But now, happily, the war is over, and our raw material and labor problems are of the past.

This year Gossards of quality, excelling even the highest standards of past years, will be produced, and will attain a perfection never before reached in corset manufacture.

The name GOSSARD in your corset is your guarantee of health depending on a hygienically correct support to the abdominal and back muscles that leaves no chance of undue pressure at the waistline. A healthy body is a correctly poised body; Gossard corsets in-

duce correct posture, correct breathing and protect the organs of nutrition.

designing for every type of figure. STYLE—only to be found in a correctly poised body induced by a correctly designed and fitted corset.
