METHODS OF HANDLING HENS

r-Saving Appliances Are of Value on Poultry Farm—Orchard Fur-nishes Range.

(Prepared by the United States Department of Agriculture.) In general the simplest methods of handling poultry are best, especially on general farms, where poultry is a side issue, though such farms furnish the bulk of the poultry production Labor-saving appliances are of value

on poultry farms, but are not always practical on general farms. Women and children can do most of the poultry work on a general farm and there by release the labor of the men for by ther farm work. On general farms, place the poultry house convenient to the dwelling house in order to save one house holding from 75 to 150

hens can be used to advantage, allow ing the hens free range all the time excellent arrangement is to the house near an orchard, which fur nishes a good range for the hens. allowing free range the hens will pick ap all the necessary green feed and will also get a considerable amount of their grain feed. Keep large hoppers containing dry mash before the hens constantly, so that it will be neces-sary to feed the scratch grains only once or twice daily. Very little more abor is required in caring for a flock containing from 100 to 150 hens than is required for from 30 to 100 hens, provided all the hens are kept in one house and have a large free range.

A separate shed or a room in the aying house can be utilized to advan age for hatching chickens with hens

Poultry on Range Requires Less Care.

setting as many hens as possible at one time; this saves labor, as it takes only a little while longer to care for a number of setting hens than for one Confine the setting bens to their nests and allow them all to come off at one time daily. An incubator may be used for hatching the eggs and the chicks may be put under hons for broading, especially early in the sea-son, when it is difficult to get hens to set as early as is desirable to produce early chickens.

Haise the chickens under hens, put-

tity. If she is underfed, her product will be correspondingly small, and if she is overfed, she will be unhealthy. ting from 15 to 25 chickens with each | Feed the cow just right, keep her and confine the hens to small gulet and comfortable, and she will be chops placed on a good green sod, or a field of some growing crop whereby equal in value to the goose that laid golden eggs. the young chickens will have free range on fresh land. A considerable number of hens with broods of chickens can be kept in a limited space where the hens are confined to the

In sections where commercial hatcheries exist the farmer can have his eggs hatched there and thus save the labor of hatching the chicks. These chickens can be reared with hens, or a stove brooder which will cover from 200 to 400 chicks may be used to good advantage, thereby saving labor in feeding and caring for the chicks and still allowing the young chickens free range. By the use of these commercial hatcheries all the chickens can

Ancient Gambling Games.

It is known that from the earliest Roman times the games of tall and tessers were played with dice, but ir invention has been attributed by the Grecian poets and sophists to Palwho in 1244, B. C., joined the Greeks in their expedition against Troy, where, by some writers, Palme-des is said to have been slain by an arrow from the bow of Paris. In addition to the invention of dice, Palmedes is said to have invented lightes, measures, scales, the discus, alphabet and the art of regulating

ADVANCE IN PRICES PAID BY FARMERS

BEDSIDE Increase in Almost Everything Used by Agriculturists.

Worst, While in 1917 the Farmer Shared in the General Prosperity-Figures for 1918.

(Prepared by the United States Depart-ment of Agriculture.)

While farmers are getting higher prices for the products they sell than they received in 1914 or at the beginning of the war, they are also payng higher prices for the things they buy, and it is of special concern to them to know just how they have fared in the general price movement of things sold in relation to that of things bought.

less than in 1914 for crops and live less' than in 1914 for crops and live stock in their composite price, but they paid 9 per cent more in the com-posite price of the many articles that they bought. The list of articles bought used for this purpose contains 85 items of textiles and garments lumber, wood products, agricultural implements and machinery, metal products, coal, petroleum products foods, fertilizers, household furnish ings, and other farm and family sup-plies. Relative loss in the second year of the war also was suffered by farmers. What they sold in crops and live stock advanced in joint price, it Is true, but only by 12 per cent, while what they bought advanced 21 per

In the next year, 1917, the relative the price that he received for crops the price that he received for crops and live stock gained 74 per cent upon 1914, while he paid 49 per cent more in the composite price of his purchases. War time is a period of rapid changes in prices and of sudden and often of painful maiadjustments. Although the farmer lost ground in 1915 and 1916 in comparigor with 1914 and and 1916 in comparison with 1914, and egained the lost ground in 1917 and ined much more, he lost his lative lead in 1918 and found himelf where he started in 1914 in the omparison of price of crops and live ock with that of things bought. The advance of price received in 1918 above 1914 was 97 per cent, and that of price paid was 96 per cent, or sub

Soy Bean When Cut at Right Stage and Properly Cured Is Relished by Farm Animals.

repared by the United States Depart ment of Agriculture.) The soy bean when cut at the right stage of growth and properly cured makes an excellent hay of high feeding value that is greatly relished by all farm animals. As compared with hay from other leguminous crops, soy-bean hay is equal or superior to any. The use of this hay as a source of protein which can be produced on the farm to balance feeds for growing stock or for milk, should reduce the quantity of high-priced concentrated feeds which

The soy bean may be cut for hay at until the leaves begin to turn yellow The crop is best fitted for hay, however, when the seeds are well formed for at this stage of growth the largest yield and the best quality of hay will e obtained. If the harvesting is done earlier, the percentage of protein will be higher, but the total yield will not be so large and the difficulty of curing much greater. If the cutting is delay ed, the stems rapidly become hard and

woody and decline in feeding value and if left too long there is much loss in leaves.

**NEXT WINTER'S FUEL SUPPLY** 

Much Wood, Apparently Valueless Time of Year, Can Be Set Aside for Use.

Look forward to next winter's supply of wood. In many parts the old-time custom still prevails of burning valu-able cordwood in log heaps following the clearing up of new land. Thousands of farmers must provide themselve will likely be glad to get it when colweather comes. Much wood, apparently useless at this time of the year, will be wasted unless forethought is exercised. Postpone burning your waste

Fighting for acquittat, Alfred Coo cohi, charged with the murder of Ruth Cruger, in New York, ia 1917, pre-sented to the court in Bologna, Italy, and jury a vivid description of the killing of the girl. He coatended that his wife was the guilty one. He ex plained that he had made his forme confession for her protection, but de-clared that, now tah; she had aban-doned him, he would tell the truth.

Capt. John Alcock and Lieut. Arthu W. Brown, the airmen who made the first non-stop flight from North America to Ireland, were entertained at a luncheon at the Hotel Savoy in Lon don by the Daily Mail, at which the trans-Atlantic prize of \$50,000 offer trans-Atlantic prize of \$30,000 officered by the newspaper, was presented to the aviators. It is announced that the king has conferred the order of the knigh tof the British empire on Captain Alcock and Lieutenant Brown.

All the cotton mills in Lancushire England, closed and it is expected 55,000 spindles and thousands of looms will be stopped through the strike of 500,000 workers. The cotton mili owners say they will make no attempt to run the mills.

ARTHUR F. BRANDT. Corporal, Co. E. 168th Infantry.

Corporal Brandt, whose home was with his mother, Mrs. W. F. Brandt at Postville, Iowa, won the Distinguished Service Cross for conspicuous bravery in action northeast of Verdun, France, October 16, 1918. After his company had been in action three days, during the attack on the Cote de Chatillo and was to be relieved, Corporal Brandt volunteered to guide the com-pany to a position of security in the rear which he had selected. While the relief was being made under shell fire, this soldier and four others were severely wounded by a bursting shell. Realizing that his wound would prove fatal, Corporal Brandt while being car ried on a stretcher indicated the route to be taken by the company, being wounded in the face and scarcely able to talk. Through his extraordinary fortitude and will power, the company was able to reach its position over difficult terrain and under enemy fire. Corporal Brandt died from his wounds the next day.

REIDER WAALER, Sergeant, Company A, 105th Machine Gun Battalion.

Sergeant Wasler was decorated for spicuous gallantry in action nea assoy, France, September 27, 1918 Sergeant Waaler, in the face of heavy artillery and machine gun fire, crawle forward to a burning British tank, in which some of the crew were impris-oned, and succeeded in rescuing two en. Although the tank was then burning flercely and contained ammunition which was likely to explode at any time, this soldier immediately re-turned to the tank and entering it, made a search for the other occupants, emaining until he satisfied himself hat there were no living men in the ank. His home address is Noretrand, Norway.

WILLIE SANDLIN, Sergeant, Company A, 132nd Infantry.

Germany has been notified in a note sent by the allies that they possess the right to punish the persons responsi-ble for the destruction of the German ships and to collect reparation for the ships and to collect reparation for the loss. The sinking of the fleet is de-nounced as a violation of the armis-tice and a deliberate breach in ad-vance of the conditions of peace.

and Tact in Overcoming Much Resistance.

tion, are two obstacles that county agents and demonstrators meet ever easiest task; to convert opposition into hearty support is an achievement calling for unusual patience and tact.
That both of these virtues are possessed in large measure by a majority
of the extension workers may be adduced from the reports constantly coming to that bureau.

A farmer in Maryland had no use for "book farming." He upbraided his ion, a member of a boys' club, for following the agent's instructions in seed corn selection. He called the test for boy, encouraged by his instructor, kept at it, demonstrated the proposition grew the selected seed, and got a typi cal high-grade crop, a decided contrast to dad's. That settled it. The "fool shness" turned out to be "a good dea." The farmer has become an

of their fields and buildings. There is a friendly rivalry among them now and the one-time intruding agent is be sought to set them right in all their problems.

Thus opposition can be overcome to day more than ever through the proper approach, the stick-to-it attitude, and the tact of the county and field agents onstrators of the extension

LIVE STOCK NOTES 

When barley is fed to live stock, the grain should be crushed.

Quality is more important than size selecting the breeding stock. At present prices there is no cheap

er grain feed for breeding ewes than No intelligent sheep raiser, no matter

if he owns a large or small flock, will breed ewe lambs. Both barley and . oats should be ground for pigs, and a high protein feed like ground soy beans, tankage or linseed oil meal fed with them.

WATCH FOR LICE ON CHICKS

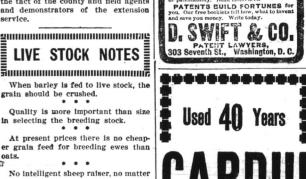

Where Pests Are Found Make Application of Small Amount of Lard-Provide Shade

Watch for head lice on chicks; if found grease the head of each chick with a small amount of lard. Do not use salt with the lard, as often advised. Allow plenty of shade, as the hot sun's rays are often fatal to freshly greased chicks.

PROPER FEEDING IN SUMMER

Not Advisable to Give Too Rich Food During Extremely Hot Days—Not Easily Handled.

It is best not to feed too heavily, or of too rich food, during the extremely hot days which are experienced occasionally in summer because overloaded digestive systems cannot handle the food as well in the extreme heat.
