EUREKA Spring Water FROM EUREKA SPRING, Graham, N. C.

A valuable mineral spring has been discovered by W. H. Ausley on his place in Graham. It was noticed that it brought health to the users of the water, and upon being analyzed it was found to be a water strong in mineral properties and good for stomach and blood troubles. Physicians who have seen the analysis and what it does, recommend its use.

Analysis and testimonials will be furnished upon request. Why buy expensive mineral waters from a distance, when there is a good water recommended by physicians right at home? For further information and for the water, if you desire it apply to the undersigned.

W. H. AUSLEY.

A New Stomach

EASY TO GET. EASY TO KEEP. USE "DIGESTINE" AND WIN quick relief from heartburn, sour, gassy stomach, dizziness and other indigestion ills. Tone your entire system, stir up your appetite by following the lead of thousands—

DIGESTINE

I have never taken anything that gave me such quick relief, and I have spent hundreds of dollars with other remedies, have been bothered over five years with what was pronounced indigestion. I ate food that I never would raise gas on my stomach, so my stomach was so full of gas that I had to distress water.

JAMES W. STOKES, Gallatin, Mo.
Your health is your wealth—Digestine is the only safe or strong laxative. For post, see Haynes Drug Company, Graham, N. C.

LIVES OF CHRISTIAN MINISTERS

This book, entitled as above, contains over 200 memoirs of Ministers in the Christian Church with historical references. An interesting volume—nicely printed and bound. Price per copy: cloth, \$2.00; gilt, \$3.50. By mail \$2c extra. Orders may be sent to

Orders may be left at this office.

Plants Trees Along Roads.
Dr. J. E. Westlake, of Virden, Ill., has started a campaign in behalf of fruit tree planting along the public highways. He favors the planting of a fruit tree on every mile of the country roads and suggests that the Boy Scout organizations serve as guardians of the trees after they are planted. He estimates the cost for the county would be about \$12,000. He has launched a similar campaign in other counties of the state.—Chicago Journal.

EXTRAVAGANCE AT THE BAT

Both Boys Get Him Out of the Game With W. S. S. And Make 'EM Fast!

FOREIGN BORN ARE NOW TAUGHT THRIFT

Courses in Americanization Is Enlarged So as to Include Special Lesson on Saving Habit.

Thrift is now one of the subjects being taught to thousands of foreign-born workers who are attending Americanization classes throughout the United States in factories, shops, churches and night schools.

As a majority of the attendants at these classes speak but little or no English, the study of language constitutes one of the principal subjects taught, a half hour drill being held at each session. The method was devised for the National Y. M. C. A. and is published by that organization. The lessons are short, consisting of about twenty simple sentences on everyday matters, and a class is taught by repeating one sentence at a time after the teacher, who illustrates it with motions and objects.

"I look at my watch," says the teacher, who takes out his own watch. The class repeats this in chorus, then individually. The next sentence deals with numbers and the telling of time. All sentences are linked together, and each teaches at least one new word with connectives. At the end of the lesson it is shown to the class in printed form on a chart.

At the request of the Treasury Department, a special thrift lesson dealing with War Savings Stamps has been written and is now in the hands of American secretaries of the Y. M. C. A. all over the country. This lesson is an excellent illustration of the method by which thousands of foreign-born workers are now learning English, and is as follows:

John—John has some money.
Jim—John has R in a stocking.
John—John says: "See this, John."
Jim—John says: "It is not safe."
John—John answers: "No? I will see."
John—He looks for his money.
Jim—John says: "The money is stolen."
John—John says: "America is safe and so is my money."

THE LUCKY THREE

Only three men out of every hundred have a savings account at the age of forty-five, ninety-seven per cent of them losing their entire savings in some reverse.

Are you taking a chance, thirty-three to one, on being one of those ninety-seven? Or are you making sure that you will answer "present" when the roll of three is called? It's just as easy to be in the latter class as in the first—if you think. Ninety-seven men out of every hundred don't think, saving spasmodically, if they save at all, and investing in securities of which they do not know the value.

Government securities are absolutely safe, pay a high rate of interest and are easily obtainable in small denominations. Save regularly and safely, and you will be sure to be among the lucky three.

How to Make Money too.
Pick up a half dollar with two needles, or pins, by placing the points on the milled edge of the coin diametrically opposite each other. By keeping the needles firmly pressed against the coin it will be held with sufficient firmness. Then blow against the coin, directing your breath either above or below the center line, and it will spin round at a great rate, producing a buzzing sound.

STOCKHOLDERS GET U. S. THRIFT APPEAL

Corporations Mail War Savings Stamp Notice When Sending Out Dividends.

Not only is thrift becoming a part of the general education of the people of small and moderate means who are being taught and encouraged to cultivate habits of wise saving and sensible spending; efforts are being made to attract to the thrift campaign the stockholders of practically every large corporation in the United States.

Some of them already are mailing their inserts to their stockholders, and others have agreed to do so upon the next dividend date. The inserts which stockholders receive along with their dividend notices are as follows:

"Double your resources by investing savings regularly.
"Did you ever stop to consider how easily and rapidly you can accumulate a considerable sum by investing small amounts regularly at compound interest?
"You can begin at once by investing all or part of your savings in War Savings Stamps of the 1919 issue which you can buy in any amount up to \$1,000. They bear four per cent interest, compounded quarterly.
"If you should have an unexpected call for ready cash before your stamps mature, January 1, 1924, you can redeem all or any number of them at any time, for the full purchase price, plus interest.
"No other investment offers such an attractive combination of safety, income, redeemability and convenience."

"Beware of small expenses; a small leak will sink a great ship," said Franklin. He knew.

KEEP ON SAVING

200 War Savings Stamps bought this year will be \$1,000 in 1924 for that new office equipment, new car, postgraduate course in a specialty, payment toward a home, for the youngsters' education, or against a rainy day.

100 Stamps now will be \$500 then, for advancement or protection; and so will be \$250.

Fix your own mark of your needs or desires and get there via W. S. S. W. S. S. pay more than 4-1/4 per cent and are absolutely safe and convenient investments for the busy man or woman.

War Savings Stamps are better than money, because they earn more money.

There will be no "rainy" day for the man who regularly saves and invests his money in War Savings Stamps.

Cash Value of Bolt.
It has been estimated by an European scientist that the commercial value of the electricity in a flash of lightning lasting one one-thousandth of a second is 29 cents.

Gas in Scotland.
More than 23 per cent of Scotland's illuminating gas is made in municipal plants and about 51 per cent in Ireland and about 80 per cent in England.

EFFICIENT AND ATTRACTIVE BARN

Fourteen-Sided Structure Is Novel, But Convenient.

IS YEAR OF FARM BUILDING

The Design Shown Here Is Intended to House Sheep, Horses and Cattle—Modern Buildings Good Investment.

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer he is without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 127 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

By WILLIAM A. RADFORD.
With wool at the present price and the likelihood that it will stay there because of the worldwide shortage, thousands of American farmers are adding flocks of sheep to the live stock on their places. And in so doing there has come a need for buildings to house them.

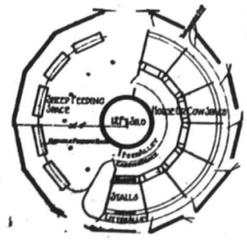

Raising lambs and keeping a flock of sheep in a healthy condition requires more care than in accomplishing the same result with other farm animals. Sheep, and especially lambs,

are very susceptible to weather conditions, and frequently a rainy spell will cause a considerable loss. While sheep must have plenty of pasture in which to run and feed, they also must have a place to shelter them, for they are not so tough to cold as when it rains. Besides the feed, the flock gets from the pasture, it is necessary also to provide them with roughage, which usually is placed in specially designed feed racks. Most of this feeding is done indoors by those who have been successful in sheep raising.

Farm building architects, whose business it is to design buildings to suit the needs of various kinds of animals, have taken the needs of sheep into consideration in planning the sheep barn. But there are many farmers who would keep a small flock of sheep, if they could do so without making a large investment in buildings. For the latter class there has been planned the barn shown in the accompanying illustration.

This fourteen-sided barn is 60 feet in diameter and has a 12-foot silo in the

center. On the lower floor around the silo there is ample space for the winter's supply of hay for the animals the building will accommodate, while the silo furnishes them with fresh feed throughout the winter months.

The exterior of the barn is attractive and will add to the appearance of the farm building group. It is of frame construction set on a concrete foundation. The half of the interior which is devoted to stalls for the horses and cattle has a concrete floor; the half for sheep has a cinder floor, graded so as to provide ample drainage to keep the floor dry, a thing the sheep must have.

The stalls for horses and cows or for other of them are placed in a semi-circle, the animals to face in. At the rear of the stalls is a gutter sink into the concrete floor, and overhead is a carrier track for the removal of litter. The track also runs over the head of the stalls, which makes the feeding of the stock easy, and extends around the building over the sheep-feeding racks. The plan of the floor shows the placing of the stalls, the sheep feed

racks and the overhead carrier system. The feed racks are movable and can be constructed by the carpenters who build the barn. While they are placed under the carrier track for convenience, they can be transferred to outside doors, in good weather and taken into the barn in bad.

The stalls will accommodate fourteen horses or cattle and provide them with the comforts that these animals need to do their best work, or to be at the highest state of productivity. The windows admit plenty of sunshine and keep fresh air circulating through the barn. These are two essentials if the animals are to be kept healthy, especially the cows.

The construction of farm buildings, homes, barns, hog houses, granaries, chicken houses and the smaller buildings the modern farmer wants and needs, has undergone many radical changes during the last few years. Architects have made an intensive study of the requirements in a building to make it a healthful place for the livestock, and have embodied the results of this study in the designs for these structures. The prospective builder will make no mistake in consulting an experienced architect when he plans to erect any sort of a new farm building. From the architect and from the contractor and material dealer can be gained some valuable pointers.

Your farm buildings are a bad investment, if they are to house the livestock they must be so equipped and so planned as to keep the animals producing at top speed, or the profit, at the present prices of feed and labor, will be lost. Labor, too, is a big expense item on the farm nowadays, and by installing in the barn a litter carrier and other conveniences less

time is required to care for the livestock and more time can be devoted to the work in the fields. Besides, labor saving equipment tends to make the help more contented to remain on the farm, which is a point the progressive farmer is not overlooking.

This is the year of farm building. The farmer's business has become one of the most important in the scheme of existence, and, likewise, one of the most profitable, if it is conducted efficiently and economically. And there is nothing that brings about this happy result more than well-built, well-planned and modern buildings.

While the cost in money this year is more than it was during the years preceding the war, some bright mind has figured out that when the price of buildings is figured in terms of farm products it is much less. In other words it requires fewer bushels of wheat, corn or oats, or less of any other of the things produced on the farm to build a barn or a home than it did three or four years ago. And as the cost of everything is relative, the farmer has no cause to hesitate if he needs a new farm building.

Cities Go West.

Henry Waterson says cities have a strange tendency to move west. They do, writes "Guard" in the Philadelphia Press.

Europe's three largest cities, London, Paris and Berlin, have distinctly moved west from their original centers.

Tokyo, which is Japan's biggest city, and Canton, the metropolis of China, Calcutta for years the capital of India, and Cairo, the largest city of Africa, shifted westward.

South America's two principal cities, Rio Janeiro and Buenos Aires, couldn't well move East and they grew inland, as did Boston, Philadelphia, Baltimore and Chicago.

New York expanded north and east, as it couldn't leap the Hudson on the west.

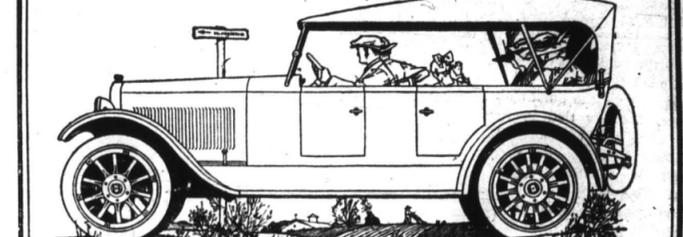

If you examine the records of Pennsylvania's chief cities, you will find that the center of population in most of them has traveled toward the setting and not the rising sun.

Vegetation Carried Far.
Evidence of possible long-distance plant dispersion could doubtless be picked up on many coasts. N. Colgan reports to the Royal Irish Academy the fact that the center of population in most of them has traveled toward the setting and not the rising sun.

Paths of Democracy.
To accustom oneself to disregard the accidents of manner and station sufficiently to see the man as he is, to have a clear sight for genuine character under any of the disguises of unfamiliarity and prejudice, to know how simple and how common are the elements that go to the making of manhood, are the paths that lead to belief in democracy.—George E. Woodberry.

Enjoyment Spoiled.
A little girl's mother had just bought her a bright red coat which she had never worn. There being a death in the family her mother dressed her and decided it not best to wear such a bright coat, so put on an old black one. As the child noticed this she began to cry and said, "If I can't wear my new red coat I sure won't have a good time at the funeral!"

CHANDLER SIX \$1795

The Fact of the Matter

YOU can see for yourself that the Chandler is the most closely priced fine car in the whole American market. Printer's ink lends itself to the presentation of claims and facts alike. We make it our purpose, in speaking of the Chandler, to deal with facts only.

And this we believe to be the fact, that no other automobile, built so well, built of such good materials, built in such good design, is priced within hundreds of dollars of the Chandler price.

The Chandler motor is truly a great motor. There is none better. Fifty thousand Chandler owners know it. And countless thousands of their friends and neighbors know it. Now in its seventh year of constant development, without radical change of design, it approximates perfection.

The whole Chandler chassis, simple and sturdy, is dependable and enduring. And Chandler bodies, graceful in line, roomy and comfortable, luxuriously upholstered and beautifully finished, are suggestive of the best custom work.

The New Series Touring Car

will delight you and your family. It is big and handsome, seats seven grown persons without crowding, and will take you anywhere in comfort. The Chandler is fast when you want speed. It is flexible and instantly responsive in crowded traffic. It is powerful on steep grades.

An Evil and Its Cure.

Interest in Kansas City's efforts to rid itself of the billiard saloon has been keen in every city in the country where the citizens are awake to the importance of maintaining urban and suburban districts in a condition of tidiness and beauty. The absurdity of spending great sums of money for good highways and other public improvements, and then allowing them to be heavily discolored by the presence of glaring and unsightly signs and pictures, is too well understood and too obvious to call for detailed argument. It appears that what is chiefly needed in order to gain relief from the aggressive billboard, in any city in the United States, is definite and vigorous local action. St. Louis has met with success in this direction, now Kansas City is following in its footsteps, and many other centers might wisely fall into line.—Christian Science Monitor.

Almost Universal Symbol.

The swastika symbol has been found depicted on fossils at Harappah, near ancient Troy; on Euboean inscriptions in India; in Etruscan necropolis; on rock carvings in Sweden, and on Celtic stones in Britain. It was in pre-Columbian times, it was in common use by the aborigines.

To Preserve Letters.

The following method of preserving the legibility of pencil writing is valuable: Steam the letter until quite limp, then brush over with a solution composed of equal parts of milk and water. Hang it up until nearly dry. Then press it between two sheets of blotting paper with a hot iron.

Calomel Salivates and Makes You Sick

Acts like dynamite on a sluggish liver and you lose a day's work.

There is no reason why a person should take sickening, salivating calomel when a safe, sure, and pleasant bottle of Doan's Liver Tonic is at hand. Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Doan's Liver Tonic instead and you will wake up feeling great. No more salivation, constipation, sluggishness, headache, coated tongue, or sour stomach. Your druggist says if you don't find Doan's Liver Tonic acts better than horrible calomel your money is waiting for you.

Children and grown folks can take Doan's Liver Tonic, because it is perfectly harmless. Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Doan's Liver Tonic instead and you will wake up feeling great. No more salivation, constipation, sluggishness, headache, coated tongue, or sour stomach. Your druggist says if you don't find Doan's Liver Tonic acts better than horrible calomel your money is waiting for you.
