

LIVER DIDN'T ACT DIGESTION WAS BAD

Says 65 year Old Kentucky Lady, Who Tells How She Was Relieved After a Few Doses of Black-Draught.

Meadowville, Ky.—Mrs. Cynthia Higginbotham, of this town, says: "At my age, which is 65, the liver does not act so well as when young. A few years ago, my stomach was all out of fix. I was constipated, my liver didn't act. My digestion was bad, and it took so little to upset me. My appetite was gone. I was very weak. I decided I would give Black-Draught a thorough trial as I knew it was highly recommended for this trouble. I began taking it. I felt better after a few doses. My appetite improved and I became stronger. My bowels acted naturally and the least trouble was soon righted with a few doses of Black-Draught."

Seventy years of successful use has made Theodor's Black-Draught a standard, household remedy. Every member, of every family, at times, needs the help that Black-Draught can give in cleansing the system and relieving the troubles that come from constipation, indigestion, lazy liver, etc. You cannot keep well unless your stomach, liver and bowels are in good working order. Keep them that way. Try Black-Draught. It acts promptly, gently and in a natural way. If you feel sluggish, take a dose tonight. You will feel fresh tomorrow. Price 25c. a package—One cent a dose. All druggists. J. 69

INFERTILE EGGS KEEP BEST

Fertile Germ in Hot Weather Quickly Becomes Bloated, Spoiling Egg for Market.

(Prepared by the United States Department of Agriculture.)
Farmers lose millions of dollars annually from bad methods of producing and handling eggs. One-third of this loss is preventable, because it is due to the partial hatching of fertile eggs which have been allowed to become warm enough to begin to incubate.

The rooster makes the egg fertile. The fertile egg makes the blood ring. You can save the money now lost from blood rings by keeping the male bird from your flock after the hatching season is over.

The rooster does not help the hens to lay. He merely fertilizes the germ of the egg. The fertile germ in hot weather quickly becomes a blood ring, which spoils the egg for food and market. Summer heat has the same effect on fertile eggs as the hen or incubator.

After the hatching season cook, sell, or use your rooster. Your hens not running with a male bird will produce infertile eggs—quality eggs that keep best and market best.

Rules for handling eggs on the farm: Heat is the great enemy of eggs, both fertile and infertile. Farmers are urged to follow these simple rules, which cost nothing but time and thought and will add dollars to the poultry yard returns:

1. Keep the nests clean; provide one nest for every four hens.
2. Gather the eggs twice daily.
3. Keep the eggs in a cool, dry room or cellar.
4. Market the eggs at least twice a week.
5. Sell, kill, or confine all male birds as soon as the hatching season is over.

POULTRY KEEPING PAYS WELL

Community Breeding Association in Virginia Proves Most Profitable Institution.

(Prepared by the United States Department of Agriculture.)

A striking example of community breeding accomplishment is furnished by the Barred Plymouth Rock association, Farmville, Va. Organized for

A Well-Selected Flock of Young Hens of Uniform Size, the Kind That Make Excellent Winter Layers.

Poultry improvement in 1915, this association has made such continuous and rapid growth that it has been incorporated with a capital stock of \$1,500, and a manager employed to handle its affairs.

Receipts during the first five months of operation amounted to \$7,500, and recent reports show that members of the association have on hand more than six thousand Barred Plymouth Rock hens and pullets. In the spring of 1916 they sold 1,000 capons on a northern market.

Before the Farmville association was formed poultry keeping in that locality was merely incidental, an unimportant side line to other farming activities. Today poultry keeping is one of the important industries of that region, and even the casual traveler is impressed with the large numbers of Barred Rocks and farms.

Don't wait until your cold develops Spanish Influenza or pneumonia. Kill it quick.

CASCARA QUININE
Standard cold remedy for 20 years—in tablet form—sure, no opiates—breaks up a cold in 24 hours—relieves griping—keeps bowels (if it falls). The medicine box has a Red top with Mr. Hill's picture. At All Drug Stores.

WHITE LEGHORN IS POPULAR

Most Widely Kept of Egg Breeds—Markets Prefer White Eggs and Pay Premium for Them.

(Prepared by the United States Department of Agriculture.)

Egg production doubtless is the leading branch of poultry keeping, and, in addition, is a very important agricultural activity. According to the last census the eggs produced in the United States in 1909 numbered more than 1,501,000,000 dozens, with a value of more than \$306,000,000. Eggs, of course, are produced wherever chickens are kept, and by far the greater part of the egg crop comes from the general farm, yet large so-called egg farms have been developed with the main purpose of producing eggs for market. The largest of these egg farms and the greater number of them are located near markets which pay a premium for white eggs; and for this reason, together with the fact that eggs are primarily desired, the breeds kept are those known as the

Splendid Flock of White Leghorns.

egg breeds, such as the Leghorn, Campine, Minorca and Ancona. The Single Comb White Leghorn is undoubtedly the most popular and the most widely kept variety of the egg breeds. These breeds comprise the Mediterranean and Continental classes, as given in the American Standard of Perfection. The egg breeds frequently are found on general farms also, particularly in those sections near markets preferring a white egg, and where considerable flocks of poultry are kept.

TURKEYS ON GENERAL FARMS

These Birds, as a Rule, Are Raised in Small Flocks Where Range is Plentiful.

(Prepared by the United States Department of Agriculture.)

Many turkeys are raised in Texas, as well as a considerable number in Mississippi and Alabama and in western Florida. As a general proposition these birds are raised in small flocks on general farms, where plenty of range is available. Under such conditions they usually yield a profitable income. Not many ducks are raised in the South, but considerable interest is displayed in geese production, while guineas also are raised on many farms. Guinea fowls are used on the home table, as well as being marketed, but as a rule the guineas are allowed to run wild and are not produced on any scale for market purposes.

SUMMER FEEDS FOR CHICKS

Fowls in Confinement Must Be Supplied With Abundance of Green Feed and Meat or Milk.

(Prepared by the United States Department of Agriculture.)

Chicks and fowls in confinement during the hot weather must have lots of green food and meat or milk, or both. If they are on free range they can obtain much of their meat food in the form of bugs and worms and can add to their variety of grain the various vegetable growths that they obtain by foraging. This is equally true of the fowls.

Safe Way to Keep Potatoes, Carrots, Etc.

The vegetables should then be covered with straw or similar material and finally with earth to a depth of two or three inches. As winter approaches, the dirt covering should be increased until it is several inches thick. The depth of the earth covering is determined by the severity of the winters in the particular locality. It is well to cover the pits with straw, corn fodder or manure during severely cold weather.

The amount of ventilation necessary will depend upon the size of the pit. Small pits containing but a few bushels of vegetables will receive sufficient ventilation if the straw between the vegetables and dirt is allowed to extend through the dirt at the apex of the pile. This should be covered with a board or piece of tin held in place by a stone to protect it from rain. In larger pits ventilation may be secured by placing two or three pieces of board nailed together at right angles.

Vegetables keep very well in such pits, but it is difficult to get them out in cold weather, so that when a pit is opened it is desirable to remove the entire contents at once. For this reason it is advisable to construct several small pits rather than one large one, and instead of storing each crop in a single arrangement which will prevent damage to post on which receptacle is set.

The home mechanic is often called upon to build flower boxes to place on top of new posts, and other porch columns. To prevent rot and to maintain a good appearance, it is best to drain the flower box, as shown in the picture. The box is lined for a part

As I was As I am

Mr. J. M. Hill, well-known street railway man of Athens, Ga., says: "I have read of some wonderful cures but my wife's heat has been so bad and nervous to perform the usual household duties. She couldn't sleep and what food she did eat did not do good. Her kidneys were very weak and her stomach was diseased. After taking four bottles of DRECO strength returned along with her appetite and her stomach was discharging the food and nourishing her body. The pains in her back were gone and her kidneys normal. The constipation disappeared—she now eats anything she craves and never suffers from it; sleeps sound and is doing her household work."

DRECO is made from juleba and extracts many medicinal herbs, plants, which act on the vital organs in a pleasant and prompt manner.

STATE AND COUNTY COUNCIL

Meeting Sept. 15-20; Gov. Bickett to Preside—Prominent Speakers.

Cor. of The Gleaner.

Chapel Hill, N. C., Sept. 1.—The full program for the first meeting of the State and County Council to be held at the State University during the week September 15-20, inclusive, has been practically completed. It will be in the mail the first of this week. Dr. H. W. Chase, President of the University, will deliver the address of welcome, following which Gov. T. W. Bickett will address the assembly. The Governor will preside over the meeting throughout the week.

The County Commissioners' program which is in charge of Hon. W. C. Jones, President of the State Association of County Commissioners, is attracting much attention just now. "Unified County Government under Responsible Leadership" will be the leading topic for this part of the program. Talks on "County Government as it Might Be," "The Fee and Salary System," "Uniform County Account Keeping and Reporting," and "State-wide Auditing of County Accounts" will also be made by able speakers.

Many prominent out-of-State speakers have been secured to address the Council, including Judge Charles N. Feldeon of Savannah, Ga.; Amos W. Butler, Secretary Indiana State Board of Charities and Corrections, Dr. Chas. J. Bullock, Department of Economics, Harvard University, Dr. Allen W. Freeman, Commissioner of Health of Ohio, R. K. Atkinson, Chairman Recreation Association, Sag Harbor, N. Y.

The State and County Council, which represents a new movement in North Carolina, is being held "under the auspices of the Governor, the State University, the State Association of County Commissioners, and the State Department of Agriculture," and is being carried into effect our new Public Welfare Laws.

With September 30th and October 1st set as the days for registration for the fall opening prospects are for the largest attendance in the University's history. A freshman class of at least 400 is expected; while estimates for the total student body range between 1200 and 1500. Practically all of last year's students will return, together with many service men who wish to complete their college course.

Several members of the University faculty have made notable contributions to National publications recently, including an article by Prof. J. M. Booker in the July number of the Sewanee Review entitled "Engaboo," in which he points out—in reply to the many circulated statements to the contrary—that instead of not a single trace of the Fourteen Points being left in the Versailles Treaty, "Only a single one of the Fourteen Points has not left a trace," and one by Prof. Thorndike Sayliss in the Engineering News-Record.

Even the world war ended sooner than many persons expected it would; the race riots are over; many of the temperamental strikers are returning to work and food prices are coming down. Maybe the world is on the way back to sanity.

"FAKE" ASPIRIN WAS TALCUM

Therefore Insist Upon Genuine "Bayer Tablets of Aspirin"

Millions of fraudulent Aspirin Tablets were sold by a Brooklyn manufacturer which later proved to be composed mainly of Talcum Powder. "Bayer Tablets of Aspirin," the true, genuine, American made and American owned tablets are marked with the safety "Bayer Cross." Ask for and then insist upon "Bayer Tablets of Aspirin" and always buy them in the original Bayer package which contains proper directions and dosage. Aspirin is the trade mark of Bayer manufacture of Monocetate of Salicylic acid.

A Perfect Arm.
The proportions of the perfect arm in a woman of about 5 feet 5 inches are as follows: The circumference of the upper arm should be about 13 inches, that of the fore arm 9 inches and of the wrist 6 inches. The upper arm should be one-third shorter than the forearm.

Incredibly Silly Order.
Army orders regarding mustaches recall the fact that the Bank of England once issued an order forbidding clerks to wear mustaches during business hours! This remarkable order afforded the public so much amusement that it was soon canceled.

Art of Chinese Gardeners.
Chinese gardeners sometimes plant statues of tiny men firmly in posts, just like real plants, and then train live evergreens to grow up over these statues. The vines thus form a kind of robe for the statuette men, their white faces and hands protruding from the green leaves.

Beauty at the Wheel

Beauty at the wheel! Ah! how serene she looks! She knows more about motor cars, than's e're been writ in books! She knows about ignition, short circuits and transmissions! All about her engine and her carburetor, and all their hooks and crooks! She knows all about her starter, her clutches and her brake! The system that lights her car and blows her horn, her knowledge takes the cake! And more than that, she knows full well the need, Of a motor running smoothly, when she wants to put on speed! And for that very reason, and she's found the reason true She buys "GREEN FLAG" MOTOR OIL AND NOTHING ELSE, for nothing else will do!

You can buy this splendidly superior MOTOR OIL from any of the following well known and reliable dealers in this county. Be sure and look one of them up, when you "oil up!"
