

Life Was a Misery

Mrs. F. M. Jones, of Palmer, Okla., writes: "From the time I entered into womanhood I looked with dread upon one month of the year. I suffered with my back and bearing-down pain, until life to me was a misery. I would think I could not endure the pain any longer, and I gradually got worse. . . . Nothing seemed to help me until, one day, . . . I decided to

TAKE

CARDUI

The Woman's Tonic

"I took four bottles. . . . Mrs. Jones goes on to say, "and was not only greatly relieved, but I can truthfully say that I have not a pain. . . . It has now been two years since I took Cardui, and I am still in good health. . . . I would advise any woman or girl to use Cardui who is a sufferer from any female trouble."

"If you suffer pain caused from womanly trouble, or if you feel the need of a good strengthening tonic to build up your run-down system, take the advice of Mrs. Jones. Try Cardui. It helped her. We believe it will help you."

All Druggists

NOTE TO REPEAL WAR LEGISLATION

THE HOUSE GAVE PRACTICALLY UNANIMOUS APPROVAL TO PROPOSED RESOLUTION.

LEVER ACT IS NOT INCLUDED

One Member "From Missouri" Raised Objection to Retention, It Being "Anti-Strike" Legislation.

Washington.—All war laws, excepting the Lever food control act and the trading with the enemy act, would be repealed by a resolution adopted by the house, 323 to 2. House democrats predicted that President Wilson would approve the measure. Representative Connally of Texas, asserting that the president was first to suggest the nullification of the war acts.

The retention of the Lever act was explained by Representative Walsh, republican, Massachusetts, in charge of the repeal legislation, as necessary to give the government an effective law for curbing profiteering in necessities, including food and fuel. He added that the trading with the enemy act should be included to regulate trade with Germany.

Representative Igoe, democrat, Missouri, however, questioned the republicans' decision to continue the Lever act, asserting that "certain interests" desired to keep the law in effect because it had proved "effective anti-strike legislation."

Verailles Peace Treaty Finally Agreed to and Signed by Hungary.

Verailles.—The treaty of peace with Hungary has been signed. The Hungarian treaty was the first of the treaties framed by the peace conference to be signed ahead of time.

Pensions Awarded to Uninjured Spanish and Philippine Veterans.

Washington.—The house acceded to senate amendments to its bill to give veterans of the Spanish and Philippine wars suffering from disabilities not resulting from service, pensions of from \$12 to \$20 a month.

Selection of Headquarters For Am. Cotton Association Referred.

Atlanta.—Selection of permanent headquarters for the American Cotton Association was referred to a special committee at the closing session here of the finance and executive committee of the organization.

Committee Has Been Appointed To Settle the Coal Controversy.

Washington.—President Wilson appointed a commission of three men to settle the wage controversy between the anthracite coal miners and operators.

The commission's award is to be made within 60 days if possible and its award as to wages will be retroactive to April 1.

First Snow Fall of the Season Observed on Planet Mars.

Cambridge, Mass.—It is now autumn on Mars and the first snowfall of the season on the planet was announced in a telegram received at Harvard College observatory from Professor William H. Pickering, who is stationed at Maricopa, Jamaica.

The telegram said the snowfall occurred at Selid.

The Congressional Record Will No Longer Be Scattered Broadcast.

Washington.—Senator Smoot, republican, Utah, chairman of the joint commission on printing, announced in the senate that, because of the shortage of print paper, the circulation of the Congressional Record for the present would be limited, and only enough copies would be printed to supply members of the senate and house.

Resignation of Secretary Polk Is Accepted by The President

Washington.—Frank L. Polk has resigned as under secretary of state and his resignation was accepted. Mr. Polk's resignation will take effect June 15 when he will leave Washington to take a rest before returning to the practice of law in New York. His Secretary Lansing returned from the Paris peace conference last summer. Mr. Polk was sent abroad to take his place and he acted as head of the American delegation.

The Ex-Empress of Germany Said to Be Under Care of Physicians

London.—Some days ago Dutch newspapers reported the former empress of Germany was under the medical care of Prof. Hymans Vandenburg of Utrecht. It being said she was run down in health as a result of morning from Amerongen to Doorn. The day after this report was made public, two allegedly suspicious characters were arrested inside of the gateway leading to the new home of Count and Countess Hohenzollern.

Underwood Nominated to Succeed Himself in Alabama Primaries

Birmingham, Ala.—Senator Oscar W. Underwood was nominated to succeed himself in the Alabama State primary election. Complete official returns from the 67 counties are: Underwood—66,870, first choice; 2,850 second; Musgrove—66,563 first; 4,797 second; Weakley, 8,640 first; 25,895 second. Underwood polled 1,668 more first-choice votes than the combined total of his opponents. Heflin was nominated.

President Wilson Fully Approved of Recent Daniels Disclosures

Washington.—White house officials said that President Wilson's warm address to the Atlantic fleet and message to Rear Admiral Sims were laid before the senate naval investigating committee by Secretary Daniels with the full consent and approval of the president.

The British admiralty was criticized in both documents and reports said the because of this protest might reprimand the naval secretary.

Brotherhood of Railroad Trainmen Still Ruling Out Striking Locals

Cleveland, Ohio.—Charters of 61 local lodges of Brotherhood of Railroad Trainmen have been revoked to date for violating the rules of the Brotherhood by participating in the unauthorized strike of switchmen. W. G. Lee, president of the organization, announced today. The 51 lodges had a membership of nearly 18,000.

Fully one-half of this number have been loyal and their membership will be protected by transfer.

Flight of Anti-Suffragists

A concerted effort will be made in North Carolina to defeat the ratification of the Susan B. Anthony amendment to the federal constitution by the North Carolina general assembly when it meets in extraordinary session in July. The leaves has been put into the dough at Raleigh and opponents, through the Southern Women's Rejection League, will see that it spreads, if their efforts avail. It is plainly evident that anti-suffragists are not fighting giving women the ballot any more than they are fighting the whole movement which some contend, is but a part of an ever-increasing "feminist" movement that would be dangerous to the foundations of government.

The question of states' rights is the big question entering into the whole proposition. There are many so-called anti who would swallow their medicine by voting for an amendment to the constitution of North Carolina giving the women of the state a right to vote but who will fight ratification of the Anthony amendment to the last ditch. These people believe the question of states' rights overshadows any consideration of possible benefits in giving the ballot to women.

Fair Price Supervision

Mr. Frederick C. Haady, agent in charge of the Department of Justice for North Carolina, has been asked to take charge of fair price supervision of the state until a successor to Fair Price Commissioner Henry A. Page is named.

There is little speculation as to who will finally land the appointment.

Lexington—Homer A. Wise, of New York and Asheville, or a man claiming that name and residence, on the charge of stealing automobiles and swapping them to the Lexington Motor Co. of this place.

Institution of Phonetics Planned.

The University of London is planning to build an institution of phonetics at a cost of \$200,000, where several assistants would be engaged in research work on the 1,000 languages of the British empire. The scheme, which originated with Daniel Jones, head of the phonetic department of the university, calls for the expenditure of \$2,500,000.

School to Aid The Teacher

The demonstration school, planned to help the teacher having two or more grades as well as the teacher having only one grade, will be a feature of the North Carolina State College of Agriculture and Engineering's summer school June 15, to July 25.

The demonstration school will be divided into two sections—one devoted to the work of the second and third grades, the other to the fourth and fifth grades.

Asheville.—Three persons were killed, two others severely injured and not expected to live, and two more suffered slight injuries, when an automobile plunged down a 250-foot embankment about a mile this side of Hot Springs.

PRESIDENT WILSON HARD ON CONGRESS

WIRES ANSWER TO PROTEST BY SIXTEEN BROTHERHOODS AGAINST ADJOURNMENT.

IS DISPLEASED WITH RECORD

Protracted Delay in the Passing of Remedial Legislation Imposed an Undue Burden on the People.

Washington.—Congress was charged by President Wilson with failure to take "important remedial action with respect to the cost of living," and to give "serious consideration" to the revision of the tax laws and the problems of peace.

Telegraphing to the heads of the 16 railroad brotherhoods several hours before the national law-makers ended their session, the President said:

"The President's message was in reply to one from the brotherhood officials protesting against the adjournment of Congress. Mr. Wilson said that 'in the light of the record of the present Congress I have no reason whatever to hope that its continuance in session would result in any essential burdens upon the public and ultimately in legislation so unsatisfactory that I could accept it, if at all, only because I despaired of anything better.'"

The President added that "the protracted delay in dealing with the problem of the railroads, the problem of the government owned merchant marine and other similar urgent matters has resulted in unnecessary burdens upon the public and ultimately in legislation so unsatisfactory that I could accept it, if at all, only because I despaired of anything better."

Trade Routes Hamburg-American Lines to Be Reopened at Once.

New York.—Former trade routes of the Hamburg-American line, closed in 1914 with the outbreak of the war, are to be promptly re-opened with American flag tonnage, supplied by the Hariman interests, it was announced here.

Decision to take over these routes followed negotiations with several representatives of the German company which have been in the United States for a number of weeks.

Eleven Hundred Quarts of Cognac Were Seized on a Cuban Steamer.

Tampa, Fla.—With 1,100 quarts of cognac concealed in the cabin and elsewhere the Cuban schooner Yabel was captured off Sanibel Island, 100 miles south of here, by the coast guard subchaser Vaughan, towed into Tampa and turned over to customs officers. Two of the crew were seized on the charge of smuggling, but the captain and the other four men of the crew were ashore and escaped when the schooner was captured.

Anti-Aircraft Fire Control.

The army officer assigned to the anti-aircraft artillery has hitherto been regarded by his comrades of the line as a mathematical prodigy, with head full of figures, formulas, and mystic symbols. Now appears a mechanical apparatus prepared to do most of his calculating for him, says the Popular Mechanics magazine in an illustrated article. Over a terrain board hangs an object which is moved in exact correspondence with the flight of the hostile air craft. From this object cords stretch down to positions of friendly batteries and searchlights. Here the cords wind on registering drums to show the range in yards from each station to the target. Similarly, at each gun or searchlight station is a vertical quadrant, permitting the angle of elevation to be read at a glance.

Ship's Remarkable Record.

Twenty years on a reef in Magellan straits has in no way incapacitated the four-master Alejandrina, which has just docked in New York with a cargo of wool from Patagonia, valued at \$100,000. The ship was wrecked on a reef at the southern point of South America, exposed to all the elements, but so well constructed that, after a 92-day voyage from the graveyard to New York, examination in dry dock showed her practically undamaged. The tall mast of the ship would not permit her to pass under the Brooklyn bridge.

Now in National Forest.

Congress has set apart 1,116,000 acres of land in Idaho known as the Thunder mountain region as a national forest land. This great tract, difficult of access and having not over one per cent of its area suitable for agriculture, has for years been the scene of destructive fires and devastation due to overgrazing. It is now to be added to the Payette National forest, which adjoins it on the south, and west, and the Idaho National forest, which adjoins it on the north and west.

Lift off Corns!

Doesn't hurt a bit and Freezons costs only a few cents.

Don't suffer! A tiny bottle of Freezon costs but a few cents at any drug store. Apply a few drops on the corn, callus and 'hard skin' on bottom of feet and then lift them off. When Freezon removes scales from the toes or calluses from the bottom of the feet the skin beneath is left pink and healthy and never sore, tender or irritated.

MAKES YANK "HONOR MAN"

English Magistrate Men Faith in American Sailor Who Went on Strike.

London.—Louis Martin, American sailor, who went on a spree without paying his railroad fare, owes some \$250 to an English magistrate's court—and has promised to pay it back as "a debt of honor of an American citizen." It happened this way: Martin left his ship at Tilbury, stopped at London for "a few" and found himself "up-country" without funds wherewith to get back to his ship which was to sail shortly. He "simply had to get back," so he just "took a train."

At the Willensden court, where he was taken after arrest for defrauding the railroad, Martin told the judge: "You let me go, judge, and I guess the American consul will pay the railroad." The magistrate replied:

"We will lend you 10 shillings out of the court funds, and from that you will pay the railroad and you will owe us to your ship. It is a debt of honor, and you, as an American citizen, will remember that you have the credit of your country in your keepings and will repay us the 10 shillings." Martin said the note "would be honored, sure."

USES CEMENT GUN

Houses are being erected in South-end, England, with the aid of a cement gun. A frame of timber is bolted together with expanded metal, onto which is pumped by a 90 horse power motor a substantial thickness of sand and cement. This is the first building constructed in this manner in Europe.

GAVE HIS WIFE TO ANOTHER

Navy Officer Freed Her So That She Might Marry the Man She Loved.

New York.—At the request of his wife, Gertrude, who, he says, loves another man better than himself, Lieut. Frederick L. Schwartz of the United States navy, has obtained a divorce. Lieut. Schwartz began his divorce suit after receiving a letter at Pelham Bay, N. Y., from his wife, a nurse in the British county hospital, at Buffalo, N. Y. The letter which began, "Dear friend husband," said: "Why should three people be unhappy when at least two, and probably three, can be made happy? Try to see me as I do."

"I love this man more than I ever thought it was possible to love," the letter continued, "and I sincerely believe he loves me as much as I love him. That leaves only one course open to us, and I ask you, my husband, to make that course possible."

Living Costs Hit Africa; Price of Wives Doubled

Lord Dewar, who has just returned to London from central Africa, in giving an account of his travels there said the increasing cost of living in the district he visited was reflected in the higher prices for wives paid by the natives. Whereas a fine sixteen hands high wife cost four spearheads in pre-war days, she now costs eight spearheads. In the cattle districts, the price of a wife at present is eight cows instead of four.

POLISH WOMEN AS SOLDIERS

Volunteer Battalion to Be Formed for Duty in Warsaw and Vicinity.

Warsaw, Poland.—A volunteer battalion of women is to be formed by the Polish army for duty in Warsaw and vicinity. Service is for six months and is separate from the woman units which have served at the front. The battalion is to have woman officers and will do patrol duty at barracks and other places, thus relieving male soldiers for more strenuous work.

Here's Your Morning's Morning.

Huntington, W. Va.—"Do you need any sprits this morning?" has taken the place of the milkman's call in a mountain town near Huntington. Revue men say "mountain dew," also known as "white milk," is sold by a milkman who goes from house to house each morning with his demijohn. His price is somewhat higher than milk, but much lower than city "moo-milk."

North Carolina to Lose Her Dairy and Livestock Specialist Lines.

Washington.—Secretary of Agriculture Meredith announces that several operations in North Carolina by agents under him must be curtailed after July 1 because of reduced appropriations by congress. Dairy specialists in the state will be dispensed with, as well as all federal activities along the specialized line of livestock production.

Race for Insurance Commissioner

Mayor John Underwood, of Fayetteville, has filed notice of his candidacy for insurance commissioner, thus crowding his hat into an already full ring. Mr. Underwood and his supporters will wage a vigorous campaign. As yet M. L. Shipman, commissioner of labor and printing, is unopposed, no one having filed as a candidate against him. Secretary of Agriculture W. A. Graham has no opposition. Neither has Secretary of State J. Bryan Grimes.

PLANS TO AVOID TUBER DISEASES

Several Measures Open to Farmers to Prevent Disorders of Potato Plant.

ELIMINATE ANY WEAK PLANT

Seed Selection in Bin at Time of Cutting Removes All Specimens Showing Any Ailment—Spraying Controls Blight.

(Prepared by the United States Department of Agriculture.) The principal control measures available to all farmers for use against tuber diseases are plant selection in the seed plot, tuber selection in the bin, seed treatment, field spraying, and prevention through soil sanitation and modification of cultural practices.

Plant selection in the seed plot aims at the elimination of the grower's seed stock of the progeny of all plants that are weak or diseased from any cause. Each year a sufficiently large area is set aside for the grower's own seed production. It is planted with the best stock obtainable, is properly but not excessively fertilized, and special care is bestowed upon it. All objectionable plants, with their tubers, if any have formed, are removed from time to time as the indications of weakness or disease appear. At digging time further selection may be employed to remove the progeny of hills having normal tops but giving undesirable or unsatisfactory returns.

Seed plot selection is directed against those tuber-borne diseases which cannot be detected by inspection of the seed stock, but at the same time it is effective in such troubles as black leg and wilt, and it is a very efficient means of removing varietal mixtures and the poor yielding, though not necessarily diseased, hills. It cannot be depended upon to restore productivity quickly in stock containing a high proportion of degenerate or run-out hills. A new start with vigorous stock is the only practical course in such cases.

Selection in Bin. Tuber selection in the bin is best carried out at the time of cutting. It removes tubers showing decay, serious mechanical injury and necrosis, chise, external rot, and is aimed primarily against the wilt disease, net necrosis, black leg and other decay-producing diseases from those constitutional weaknesses frequently developing from the use of partially decayed or seriously injured seed. It is not a satisfactory substitute for the seed plot selection but supplements it to good advantage.

Tuber selection is employed to destroy (1) the sclerotia of Rhizoctonia or black scurf, (2) the scab-producing organism present in common scab spots, and (3) surface infection with the black leg organisms which may have resulted from contact with tubers decaying from this cause. It is also of value in destroying the germs of some other minor diseases on the surface of seed potatoes. Seed treatment does not reach black leg or other types of infection within the tuber and of course has no effect on Rhizoctonia or scab organisms in the soil. Two solutions are in common use. The one most generally recommended consists of a high concentration of corrosive sublimate (bichloride of mercury) dissolved in 30 gallons of water. The other contains one pint of formalin (40 per

cent formaldehyde) in 30 gallons of water. In either case the treatment consists in immersing potatoes in the solution for an hour and a half to two hours either at planting time or at any convenient earlier date. Corrosive sublimate dissolves with difficulty in cold water, amalgamates with metals, is a deadly poison when taken internally, and deteriorates with use. It must therefore be handled with great care, used in wood or cement containers and renewed frequently. Sacks employed as dipping containers use up the chemical more rapidly than crates. The formalin solution is cheaper than corrosive sublimate, easier to make up, does not change strength on using, nor does it grow weaker on standing as is frequently stated, but it is less efficient and seems sometimes to injure the seed slightly, though usually this is not the case.

Spraying Controls Blight.

Spraying when properly done controls both the early blight and the late blight. By far the best mixture for

A Potato Affected With Rust Scab, Showing the Rusting and Cracking, Associated With the Fungus Rhizoctonia of a Western Potato.

Animal Cannot Continue Normal Production if She is Exposed to Severe Weather.

The high-producing dairy animal is a delicate and well-balanced piece of machinery, and consequently she cannot continue normal production if she is exposed to severe winter weather. It is, therefore, essential that the discomforts incident to cold weather be eliminated, if possible. The comfortable cow will repay in milk the necessary labor for her protection. Dairy men as a rule are more careful with their cows than the average farmer who merely produces the milk for family use.

AGED MAN CLAIMS RECORD

New Hampshire Nonagenarian Still Able to Swing Ax Both Lustrily and Expertly.

Friends of Frank Mozrall, ninety, of Franklin, N. H., claim that he is the champion woodchopper of his age in the New England states. Despite his near approach to the century mark he is able to swing an ax with the best of the choppers of the New Hampshire woods, those who know him best say.

Mr. Mozrall was formerly a hotel man. Since his retirement a favorite pastime of his has been to walk a distance of five miles from the home of his niece to drive the timber of a wood lot and then chop wood. It is claimed that he cut almost five cords of wood in a week, which is considered a record for a man anywhere near Mr. Mozrall's age.

Mr. Mozrall helped to build the first bridge over the Profile to the summit of Mount Lafayette, and was one of the best-known guides in the mountains years ago. He has guided some of the best-known people of the country in their explorations of the White mountains. It is only recently that he has come into fame as a wood-chopper.

Mr. Mozrall's memory is most excellent and his general health is exceptionally good for a man of his advanced years.—Boston Post.

Synthetic Vinegar and Acetic Acid. Acetic acid is now used in great quantities in making acetate of cellulose for airships. Before the war this was obtained by distilling wood, but it no longer suffices. A synthetic way of making acetic acid was discovered and now the price is much lower than it used to be.

LITTLE ROBERTS DO MUCH INJURY

Mountain Beaver or Swellel and Cotton Rat Gain Prominence as Crop Destroyers.

CONTROL MEASURES DEVISED

Small Fruits and Market Produce Damaged in Humid Regions of Northwest Coast—Sugar Cane Industry Is Menaced.

(Prepared by the United States Department of Agriculture.) Two animals not much spoken of previously have gained prominence as destructive rodents during the past year, reports the chief of the biological survey. One is the mountain beaver or swellel, a curious rodent living in the humid regions of the northwest coast. It was formerly considered harmless, but with the development of agriculture in its region it has become increasingly injurious to crops, particularly small fruits and market produce.

Control Measures Devised. Control measures have been devised, and representatives of the department have given demonstrations in Oregon and Washington, where active measures were needed.

The other animal that has come into prominence as a destroyer is the cotton rat, a small rat-like rodent limited to the South Atlantic and Gulf states. Its depredations are principally in connection with sugar cane in Florida, where experimental plantings within the past two years gave promise of very profitable development.

Serious Damage by Rats. So serious has been the damage by cotton rats, however, that the principal company interested in the development of the sugar cane industry in Florida has written the department that the success of the industry will

Mountain Beaver or Swellel, a Curious Rodent Living in Humid Regions of the Northwest Coast, Which Is Attacking Small Fruits and Market Produce.

be impossible unless some method can be found for successfully controlling the cotton rats. Losses of from 40 to 60 per cent of the growing cane have been reported. The bureau of biological survey, however, announces the determination of successful poisoning methods, and it is believed that, through demonstrations and advice, the growers will be able to control the rats and reduce the losses to a negligible amount.

RIGHT CARE OF DAIRY COW

Animal Cannot Continue Normal Production if She is Exposed to Severe Weather.

The high-producing dairy animal is a delicate and well-balanced piece of machinery, and consequently she cannot continue normal production if she is exposed to severe winter weather. It is, therefore, essential that the discomforts incident to cold weather be eliminated, if possible. The comfortable cow will repay in milk the necessary labor for her protection. Dairy men as a rule are more careful with their cows than the average farmer who merely produces the milk for family use.

Synthetic Vinegar and Acetic Acid. Acetic acid is now used in great quantities in making acetate of cellulose for airships. Before the war this was obtained by distilling wood, but it no longer suffices. A synthetic way of making acetic acid was discovered and now the price is much lower than it used to be.

Three French companies are now using this process and La Nature says they bid fair to drive the distillers of wood out of the field, even planning to produce a synthetic vinegar that shall be much cheaper than the natural article.

Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher, and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA? Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

THIN PEOPLE NEED MORE IRON IN THE BLOOD

New Form of Liquid Iron Feeds the Tissues through the Blood—Builds Firm Flesh—Fills out the Hollows

Appearances count for a lot in this world, and if you are thin and scrawny and "below weight," you can't help but feel sensitive and envious of your neighbor who is plump and sturdy and who looks well nourished.

But there is another side—thin people are usually sick people. The food they eat does not give them the proper nourishment for their bodies, they are extremely nervous. The blood does not make strength and nerve and flesh as it does in the normal person.

It is a remarkable characteristic of Acid Iron Mineral—that it is a great flesh builder. Thin people who take it find after a short time that the hollows are filling out, that the

flesh becomes firm and healthy, that even within so short a space of a single month, a becoming plumpness and soft curved lines of beauty have replaced angles and scrawnyness.

And with this increased weight comes a better appetite, more refreshing sleep and a marked increase in vigor in every way.

Thin people can take Acid Iron Mineral to improve their appearance, and they will find their health benefited at the same time. Physicians say that this power to build new tissues and firm flesh is due to the extraordinary attraction the blood has for this particular combination of iron.

Druggists recommend the purchase of it if you fail to get the result you seek.

Chines Government Plans Aerial Freight and Passenger Service.

Shanghai.—General Ting Kian, director of the department of aeronautics of the Chinese government, has outlined a big program of development in aeronautics for China.

State Wine Rate Case

North Carolina has won its case before the commission of the Interstate Commerce Commission, and in a few days the commission will send down its report, which will restore the discriminatory tariff on North Carolina wine, which the Virginia cities live.

The shippers will get something like 30 cents differential on Virginians as a corking concession which is not
