

For Weak Women

In use for over 40 years! Thousands of voluntary letters from women, telling of the good Cardui has done them. This is the best proof of the value of Cardui. It proves that Cardui is a good medicine for women.

There are no harmful or habit-forming drugs in Cardui. It is composed only of mild, medicinal ingredients, with no bad after-effects.

TAKE

CARDUI

The Woman's Tonic

You can rely on Cardui. Surely it will do for you what it has done for so many thousands of other women! It should help.

"I was taken sick," writes Mrs. Mary E. Vest, of Madison Heights, Va. "I got down so weak, could hardly walk... I read of Cardui, and after taking one bottle, I felt much better. I took 3 or 4 bottles at that time, and was able to do my work. I take it in the spring when I run down. I had no appetite, and I commenced eating. It is the best tonic I ever saw." Try Cardui.

All Druggists

RESULT OF RECENT STATE PRIMARIES

ALL INDICATIONS POINT TO THE RE-ELECTION OF THE OLD SET OF OFFICERS.

LONG AND ADAMS RUN OVER

Most Tremendous Majority Given Was That Polled by Senator Overman Over Brooks.

Raleigh. In the absence of official returns and in view of the fact that the gubernatorial race is overshadowing all others, no exact figures are available at this time on the vote for other state officers. It seems safe to say, however, that all the old state officers are nominated by safe majorities.

This list includes State Treasurer B. R. Lacy, Commissioner of Labor and Printing M. L. Shipman and Commissioner of Agriculture William A. Graham, Secretary of State J. Bryan Grimes his opponent, neither did State Superintendent of Public Instruction E. C. Brooks, so their names were not on the ticket.

Associate Justice Hoke, from all information received here, is undoubtedly re-nominated. It looks like the second primary will be between Adams and Long.

Totals from counties heard from give Barter Durham a good lead for state auditor, with Cook running second.

Stacy Wade is nominated for commissioner of insurance by a substantial majority, while W. B. Cooper, of Wilmington, has been nominated over F. C. Harding for lieutenant governor.

Postmasters Appointed. Washington (Special).—Joseph C. Hodges has been appointed postmaster at Adams, Wake county, instead of W. M. Hodges, resigned.

The war department announced that W. P. Bachelor, R. F. D. 5, Inglewood, Raleigh, is a candidate for admission by certificate to the United States Military Academy July 1.

Patrick M. Duncan has been commissioned postmaster at Rocky Point and Fannie A. Nelson at Gloucester.

Hiram Not a Romanist.

Hiram Johnson's North Carolina vote was badly hurt by a cleverly circulated falsehood that the California candidate for President is a Roman Catholic, a religious lie on Hiram Johnson is not a Romanist. Everybody knows that the California senator is a Mason, a Knight Templar, and Shriner, three impossible things of which to make Roman Catholics.

The Cruiser "Charlotte."

Washington (Special).—Secretary Daniels announced that the cruiser North Carolina, has been changed to the cruiser Charlotte. The "Charlotte" is now with the Pacific fleet with her home yard at Puget Sound. She is one of eight armored cruisers and has a displacement of 14,800 tons. The Montana and Seattle are the only cruisers of the same class that big.

Fears of Typhus Confirmed.

Suspected cases of typhus fever at Kings Mountain were confirmed in reports from representatives from the state board of health sent to that place for an investigation. There are two known cases, a child suspected, and one death has resulted.

These are the first cases of typhus fever reported in North Carolina in a number of years. For the past 60 years it has been practically non-existent in the United States.

Typhus fever is an acute infectious disease, highly contagious, characterized by sudden onset, maculated and hemorrhagic rash, marked nervous symptoms, terminating by crisis usually about the end of the second week.

State Traffic Association.

Forgetting past difficulties and differences of opinion, the North Carolina Traffic Association in annual meeting here, laid out plans for continuing the work that brought the organization to fight for just freight rates, conserving what has been won through the recent decision by the Interstate Commerce Commission and broadening the efforts of the body.

President Riddick Honored.

President W. C. Riddick, of the North Carolina State College of Agriculture and Engineering, has just been formally honored by being appointed to the committee on education, of the American Cotton Association, representing North Carolina on this committee.

Six of the leading colleges of the

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

Don't suffer! A tiny bottle of Freezone costs but a few cents at any drug store. Apply a few drops on the corn, callous or "hard skin" on bottom of foot and then lift them off.

When Freezone removes sores from the feet or calluses from the bottom of the feet the skin beneath is left pink and healthy and never sore, tender or irritated.

South, at the request of the American Cotton Association, has already established a series of commercial courses in the business side of cotton.

Our Students Abroad

Louisville, Ky. (Special).—North Carolina, furnished nine graduates of the Southern Baptist Theological Seminary at the final commencement exercises here this week, all of whom had previously graduated from Wake Forest college at Wake Forest. This is the largest number of graduates furnished by any state save Kentucky. North Carolina also ranked next to Kentucky in the number of students attending the seminary, this year's representation being 41 for North Carolina and 53 for Kentucky.

All of the North Carolinians save one in the seminary this year are either graduates or former students of Wake Forest, this institution being the best feeder the seminary has, President Mullens announced.

Thirteen young women from North Carolina attended the Baptist Women's Missionary Training school, four of the number graduating as follows: Misses Eugenia M. Morrison, of Dunn; Vera Slade Ruth, of Salisbury, and Mary Warren, of Dunn, with Mrs. Charles S. Hudson, of Morganton.

E. V. Hudson, of Forest City, N. C., was one of the three graduates designated by the faculty to deliver his thesis before the commencement auditorium and his address on "The Discovery of the Child" was well received. Other North Carolina graduates from the seminary include V. L. Andrews, of Bear Creek; Charles F. Hudson, of Morganton; L. B. Olive and Kyle M. Yates, of Apex; Albert R. Phillips, of Dalton; Elliott H. Stewart, of Newton; Ransom K. White, of Conway, and Thomas C. Holland, of Mooresboro.

Field Inspectors Convict

Field inspectors of the North Carolina State Board of Health during the past few days have secured convictions in a number of cases where violations of the state vital statistics or quarantine laws were charged. Effective the first of June an additional inspector has been placed on duty to secure full compliance with the state health laws.

Captain Cox a member

Captain George Chandler Cox, of the Signal Corps, U. S. A., has accepted a position in the Department of Electrical Engineering of the North Carolina State college and will take up his work at the opening of classes next September.

Pritchard for President.

Chicago, (Special).—Judge J. G. Pritchard, of North Carolina, is the proposed candidate for the vice presidential nomination if members of the North Carolina delegation become convinced that he cannot be nominated for the presidency.

Program of University

The complete program of the 125th commencement at the University of North Carolina, June 13-17, recently announced by President Chase, calls for five days of student and alumni celebrations, including the historic class exercises and the debating and oratorical contests, and one of the largest alumni reunions in the history of the University, and the final commencement address of Secretary of State Bainbridge Colby, the awarding of degrees by Gov. Thomas W. Bickett, and the commencement dances.

A Question as to Miss Clement

Whether Miss Lillian Egum Clement, of Buncombe the first woman ever nominated in the south for a seat in the legislature, will be admitted to membership if she is elected this fall, does not depend solely upon the ratification of the federal suffrage amendment by "the perfect 35."

Whether the special session in July

in Raleigh or the legislature of some other state raises or not, the general assembly of North Carolina, according to the opinion of the attorneys general, based on the constitution of the state, is the only body that can pass upon the qualification of its members.

Geddes to Be at Asheville.

Washington.—The following letter from Ambassador Geddes to Senator Simmons was made public:

"Many thanks for your note of the 4th inst. It is so humanly possible and full in the invitation of the Southern Newspaper association to address their annual meeting at Asheville July 30, I shall certainly accept it, especially as it will be the first opportunity I have had to visit any of the southern states.

"I will let you know definitely whether I can accept the invitation."

Treasury Enriched by \$80,135.35

The State Treasury was enriched to the extent of \$80,135.35 representing the inheritance tax from the estate of the late Clarence Milbiser, of New York. The settlement of the claim was completed by the Corporation Commission, and the money turned over.

Liability for the tax in North Carolina arose through the ownership of shares of stock in North Carolina corporations to the value of \$1,810,590, mostly in the Roanoke Rapids cotton mills, at Roanoke Rapids.

Lexington.—Mrs. W. H. Swing, of Lexington, suffered a broken shoulder and other minor injuries when the car which she occupied and driven with her collided head on with an automobile driven by Mr. Mitchell, of High Point.

Rocky Mount.—Textile workers numbering 325, representing about 90 per cent of the total number of employees of the Rocky Mount mills walked out on a strike. Those abandoning their work are members of the United States Textile Workers.

Greensboro.—Clerk R. L. Blylock of the Federal court for the western district of North Carolina mailed the appointment of John V. Jordan, of Asheville, as deputy clerk of federal court with offices at that place, to him.

FIGHT SPIRIT IN ORGANIZED LABOR

COMPERS AND OTHER LEADERS GREATLY DISAPPOINTED IN REPUBLICAN PLATFORM.

THEY WANT NO LABOR PARTY

Program Appears Now to Be to Offer Demands of Labor to Democratic Convention at San Francisco.

Montreal.—The American Federation of Labor in convention here, made preparations to offer the support of organized labor to the democratic party in return for its acceptance of the labor platform demands which leaders declare the republican party has ignored.

Labor leaders announced that the subject would be placed before the federation's convention.

The first step, they said, would be a condemnation of the republican party, to be followed by an appeal to the democratic party for incorporation of labor's policy in its platform.

Samuel Gompers and other labor leaders were in session preparing a plan of action.

Those close to Mr. Gompers asserted that the action of the republican convention would have no effect on the non-partisan political program and there was "not the slightest possibility" of labor putting a party in the field this year.

The only resolution adopted by the convention provided that "every effort be made by the organized labor movement to the end that schools, hospitals, asylums and other similar public or private institutions, factories as well as other forms of buildings requiring proper care against the dangers of fire, shall be provided with approved appliances of fire."

LIGHTS OF IMMENSE POWER

Rays From Points on United States Coast Are Visible Seventy Miles Out at Sea.

The highest beacon light maintained by the United States for warning navigators is at Cape Mendocino, Cal., 422 feet above sea level. It has a range of 23 miles. The brightest light and one of the most brilliant in the world is at Navesink, N. J., on the highlands at the entrance of New York bay. It is 25,000,000 candle power and its glare has been seen from 70 miles out in the ocean.

The largest lighthouse "lens" is at Makapuu, on the island of Oahu (Hawailian group). Its beam at night brings first news to voyagers from the United States that they are nearing the mid-Pacific archipelago. It is called a "hyper-arc" because the inside diameter of the lens being about nine feet and that of the glass lantern enclosing it 16 feet.

The lens of the Navesink light incloses a powerful electric arc. But, generally speaking, kerosene is the preferred illuminant for many light-houses.

A lens frequently is built up of glass prisms arranged in pairs, the light rays are concentrated into a beam of maximum brilliancy and range. Some lighthouse lenses are so arranged as to revolve, a contrivance of the sort, weighing perhaps 6,000 pounds, being floated upon mercury and thereby turned so easily that a small bit of clockwork actuated by a 100-pound weight will operate it.

GOT FACTS SLIGHTLY MIXED

Representative Osborne Evidently Had Not Taken His Medicine Position of Sherman State.

One of the best speeches in the house in years came from Representative Osborne of California the day of the Pershing parade, says the Los Angeles Times. Having been one of the speakers who marched up Pennsylvania avenue in the close of the Civil war for a final review by General Sherman, he was able to draw a beautiful and striking contrast with the return of the veterans of 1918.

At one point in the address the representative spoke feelingly of how Sherman, at the head of the column, at Fifteenth street and Pennsylvania avenue had turned on his horse and looked back at the advancing veterans.

"Thus," said Mr. Osborne, "the figure of Sherman, cast in bronze, sits today at the head of Pennsylvania avenue, as he sat that day more than fifty years ago."

The reference to the Sherman statue aroused great interest and many were the pilgrimages made to the statue within the next few days to see how Sherman looked gazing down at the veterans of 1918.

It developed that Sherman was looking toward the advancing column, but toward the White House, which stands in an opposite direction.

Now Osborne is looking for the man who placed it there.

Simmons Advocates Suffrage. Washington, (Special).—Senator Simmons, speaking as a "citizen of North Carolina," made an important move in the woman suffrage controversy. He did not declare for woman suffrage, but said there is no use delaying action at this stage of the game.

In other words, he says to his friends at home through the press: "Democrats might as well help the woman get a vote in the November election."

The White House was elated over the Simmons statement.

Women's Federation To Meet. The call to the convention of the North Carolina Federation of Women's clubs, has been issued by the president, Mrs. Charles C. Hook and the corresponding secretary, Mrs. Hugh Murrill, are busy making plans.

The several hundred club women are looking forward to one of the best conventions in the history of the federation.

The eighteenth annual meeting of the North Carolina Federation of Women's clubs will be held in Charlotte, April 27-30.

POULTRY

TESTING EGGS FOR HATCHING

Satisfactory Candler May Be Made With Shoe Box Large Enough to Cover Lamp.

Prepared by the United States Department of Agriculture. An egg, whether impregnated or not, has a small grayish spot on the surface of the yolk known as the germinal spot. As soon as a fertile egg is placed under a hen or in an incubator development begins. All eggs should be tested at least twice during the period of incubation, preferably at the seventh and fourteenth days, and the infertile eggs and dead germs removed. White eggs can be tested on the fourth or fifth day, while the development in eggs having brown shells often can not be seen by the use of an ordinary egg tester—until the seventh day. Dead germs soon decay and give off a bad odor if allowed to remain under the hen. Infertile eggs make good feed for young chickens and are often used in the home for ordinary purposes. Most incubator companies furnish testing chimneys with their machines, which will fit ordinary lamps. Electric or gas lamps may be used in a box with a hole slightly smaller than an egg cut in the side of the box and at the same level as the light. They may also be tested by sunlight or daylight, using a shutter or curtain with a small hole in it for the light to shine through.

A good homemade egg tester, or candler, can be made with a large shoe box, or any box that is large enough to go over a lamp, by removing the end and cutting a hole a little larger than the size of a quarter in the bottom over a kerosene lamp the hole in the bottom will be opposite the blaze. A

An Egg Tester Made From a Shoe Box and a Common Lamp.

The eggs are tested with the large end up, so that the size of the air cell can be noted. The condition of the embryo. The testing should take place in a dark room. The infertile egg, when held before the small hole, with the lamp lighted inside the box, will look perfectly clear, the same as a fresh one, while a fertile egg will show a small dark spot, known as the embryo, with a mass of little blood veins trending in all directions, if the embryo is living; if dead, and the egg has been incubated for at least 48 hours, the blood settles away from the embryo toward the edges of the yolk, forming in some cases an irregular circle of blood, known as a blood ring. Eggs vary in this respect, some show no blood at all. All fertile eggs should be removed at the first test. The eggs containing strong, living embryos are dark and well filled on the fourteenth day, and show a clear, sharp, distinct line of demarcation between the air cell and the growing embryo, while dead germs show only partial development, and lack this clear, distinct outline.

FLOORS IN POULTRY HOUSES

Must Be Kept Dry, as Dampness Is Fatal to Both Young and Old Fowls—Also Keep Clean.

Poultry houses may be built with or without floors. In either case they should be dry, as damp floors make damp litter and dampness is fatal to both fowls and chicks. If the house is on dry, sandy soil, a dirt floor is usually quite satisfactory, but as a rule it is more damp than board or cement floors, according to the United States department of agriculture. Dirt floors should be scraped and new soil put in two or three times a year to keep them sanitary. If board floors are used they should be both tight and smooth so far as to make them dry and easy to clean. If possible they should be eight or ten inches from the ground to allow a circulation of air and to prevent rats from harboring under them.

Slave Traffic Still Exists.

Slave traffic along the Arab coast is illegal under the terms of certain conventions, but slavery, nevertheless, is said after a year to be widespread and of great extent. A few years ago members of the American Arabian mission at Bahrain rescued a whole boatload of black boys who had been smuggled up from Africa for sale along the Oman coast. In the interior towns slaves are used mostly for personal servants, bodyguards and henchmen. By an old law in Arabia, a slave is freed after seven years of service, provided he has embraced the Moslem religion, and it is said that most of the slaves do so. There is no prejudice against marriage with blacks in Arabia, especially after they are freed. This intermarriage has scattered a black population all over Arabia. In ports like Huskat and Aden mulattoes and mixed breeds are so common that the pure Arab strain is almost a rarity.

Credit Ghost With Wreck

Devon People Believe Sight of Spanish Flag on British Ship Angered Admiral Drake.

Anyone who knows the villages of the west of England will be aware that they are a fertile soil for all manner of superstitious beliefs. And the process of creating new legends has evidently not yet come to an end, if we may accept a statement made at a recent women's institute meeting at Exeter, at which various speakers recounted the traditions of their respective localities. A few years ago the battle ship Montague was wrecked on Lundy island as she was entering the Bristol channel in a fog. The people of the neighborhood, we are told, have no doubt that she was lured to her doom by the spirit of Sir Francis Drake. She happened to be flying the Spanish flag in honor of the marriage of King Alfonso and Princess Elizabeth. This the proud ghost of Devon's great seaman could not brook, and he made her pay the penalty by running her upon the rocks.—Manchester Guardian.

Lava Under Ranger Field?

Geologists believe that continued oil operations in the Ranger field, should they attain a depth of one mile under the surface, will prove the existence of a live lava bed, a Ranger (Tex.) correspondent of the New York Evening Sun writes. In the region of Caddo oil drillers have discovered that bits of the drills show evidences of intense heat within 3,200 feet of the surface, and the heat at that depth is sufficient to discharge shots of nitroglycerin without the use of a fuelling cap.

A peculiarity of the Ranger field in Stephens county is the number of crevasses encountered in drilling through the black lime. These crevasses are filled more or less with oil-yeeding sand and when this sand is "shot" the flow of petroleum rushes to the surface. Whether this rush is aided by the subterranean heat is problematical, but it is believed that the heat has a great deal to do with the rush of the oil.

LIVE STOCK

CLUB MEMBERS RAISE SWINE

Indiana Breeders Sell Glits to Boys and Girls in Order to Get Them Started Right.

(Prepared by the United States Department of Agriculture.) If good blood and good individuals will give the right start in the pig-breeding business the boy and girl club members in the vicinity of Oxford, Benton county, Ind., are on the road to success, for the pigs owned by them are of famous Poland China strains.

The people of this community have already had an opportunity to see what some of the breeders of good hogs have been doing, for several well-known hog breeders live in Benton county. These men, who believe in investing money in a few outstanding individuals and raising nothing but

Members of a Boys' Club Receiving Information on Good Points of a Brood Sow.

the best, cooperated with the bankers and the county agent in inducing a number of Indiana breeders to sell some good glits to the Benton county boys and girls in order that they might get started right in the hog business, consequently the members in the pig club at Oxford have received pigs sired by well-known Poland China sows, and the responsibility of developing them into breeding animals now rests with the boys and girls.

Twenty-six members are enrolled in the club, which is organized on the basis of a breeders' association. The club will elect its own officers, and with the assistance of the county agent, the bankers, the breeders, and their parents will proceed to do business for themselves.

SCHOLARS TO GET RECORDS

Attendants of Welsh Schools and Colleges Will Embark on an Interesting Experiment.

Wales, through her schools, is about to launch an experiment. Schools and colleges have been invited to make a collection of all the Welsh field, place and road names, including those of lanes, hills, woods, mounds and dykes, and to mark on the six-inch ordnance map the spots to which the names are attached.

A fund has been placed at the disposal of the Welsh department to provide the materials for the records, which will be collected by the board of Celtic studies in connection with the university of Wales, and deposited in the Welsh library.

Each school is recommended to retain a duplicate of the record, which can be added to from time to time. Space is provided for supplemental information on such matters as the existence of rural industries; the survival of old or curious customs or crafts; peculiar words or pronunciations; local proverbs or quaint sayings; the use of old agricultural implements; particulars of interesting local "characters" who may have been distinguished by their oddities, their benefactions, or their services during the war.

Though it is intended for Wales, there is no reason why a similar scheme should not be put into force in the other parts of the United Kingdom. The framers of the scheme have hit upon a method of making the teaching of history and geography a living thing, of great educational and national value.—London Mail.

Easy.

"Now, children," the teacher said, "suppose we wished to go to California, how would we proceed?" You tell us, Tommie.

"I'd get on the train and go to New York," Tommie responded promptly, then paused.

"Yes," the teacher encouraged. "Then I'd get a steamship," Tommie answered and sat down.

"But you haven't told us the route you would follow," teacher protested. Again Tommie rose.

"Oh, I would not butt in on that," he declared. "I'd leave that to the ship captain, 'cause he'd likely have been there before, and, besides, I believe in leaving all technical matters to experts."

Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Dr. J. C. Fletcher, and has been made under his personal supervision since its infancy. All Counterfeits, Imitations, and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA? Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guaranty. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; soothing Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of

Chas. H. Fletcher

In Use For Over 30 Years The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

WHY ARE YOU RUN-DOWN NERVOUS AND WEAK?

Your Blood Needs Iron to Give You Energy, Power, Strength and Endurance

How is your appetite? Do you relish the food you eat? Do you tire easily? Are you pale and sickly looking? Do you get nervous? Do you sleep well? These are questions you should ask yourself frequently. You owe it to yourself and those around you to keep in as good condition of health as possible. Neglect of little things often leads to serious and complicated sicknesses.

You must not neglect to keep your blood pure and in condition so that it carries life and health and vigor to all parts of the body.

WOMAN EARNED HER LIBERTY

Unlooked-For Suffering Endured by Stowaway Who Was Making Her Way to Freedom.

One was the Esporpus and in its place we saw the leaden waters of the Black sea. From the porthole of Josef's cabin we could distinguish many miles west of us the coast line of the country in which White had spent three years, according to Capt. Alan Bott's "Stowaways, Inc.," in Asia. Feodor soon let us, for he had to bring other stowaways to the light of day. From every concealed cranny of the vessel men and women, almost as light-hearted as ourselves at deliverance from the Turks, were coming into the open.

One of the stowaways, a passportless woman whom the aged captain was taking with him to Odessa, did not rejoice for some time. As hiding place for her the old man had chosen a deep locker in his chartroom on the bridge. There she had remained for the last two days. Now, Rosa, the kitchen wench, knew nothing of the captain's lady. That morning, not wishing to send her own particular stowaway—a Turkish deserter with coal-blackened face, untrimmed beard and decidedly odorous clothes—back to the bunkers, where he had spent the previous day, she thought of the locker as a temporary home. Dumping him inside the locker, she fastened the lid and ran back to the kitchen. The Turkish deserter landed with some violence on the captain's lady and both received a bad fright as they clutched at each other in the darkness. Yet the lid could not be removed from the inside and the woman's screams were unheard outside the little room.

The air in the unventilated locker grew more and more stuffy. Finally the woman fainted. The Turk, tired after a long spell of cramped wakefulness in the bunkers and the kitchen, composed himself philosophically and went to sleep.

Lives of Christian Ministers

This book, entitled as above, contains over 200 memoirs of Ministers in the Christian Church with historical references. An interesting volume—nicely printed and bound. Price per copy; cloth, \$2.00; gilt top, \$2.50. By mail 20c extra. Orders may be sent to P. J. KERNEBLE, 1536-40 E. Broad St., Richmond, Va. Orders may be left at this office.
