

THE GLEANER

ISSUED EVERY THURSDAY.

J. D. KERNODLE, Editor.

\$1.00 A YEAR, IN ADVANCE.

The editor will not be responsible for views expressed by correspondents.

Entered at the Postoffice at Graham, N. C., as second-class matter.

GRAHAM, N. C., Oct. 7, 1920.

Gov. Cox is making a vigorous fight for the Presidency and the people who hear him are most favorably impressed.

A whiskey still, about ready to begin business, was found in the penitentiary at Raleigh a few days ago. It is not explained how it got there, but it had not been found when it was there would have been some variations of the monotony of prison life.

Mr. Lynn B. Whitted, one of the Democratic nominees for County Commissioner, has announced his inability to accept the nomination on account of the demands of his private business. He would have made a good official and his friends will regret his decision.

Money is needed for the legitimate expenses of the Cox-Roosevelt campaign and Democrats are urged to make any contributions they feel inclined to make. This paper will receive and forward any contributions, or they may be sent to J. M. Broughton, Chairman Finance Committee for N. C. Cox-Roosevelt Campaign Fund, Raleigh, N. C.

Republican women are being gathered up and carried to the registrars for registration. In this respect the Democrats should be just as diligent as the Republicans. A majority of the women, no doubt, were satisfied to let the men do the voting, but now that the right of suffrage has been conferred upon them, it is incumbent upon them, as voters, to do their part in the election of competent and trustworthy officials.

North Carolina has a population of 2,556,486, according to census figures just given out—a gain of 350,199 or 15.9 percent in ten years.

Alamance county is given 32,718 against 28,712 in 1910, a gain of 13.95 percent.

The population of the United States will reach nearly 100,000,000, not including the island possessions, which will add about 12,000,000 more.

Sunk Without Warning.

The New York World says that Senator Harding's substitute for the League of Nations has been sunk without warning by Elihu Root, who not only torpedoed it but shelled the survivors.

The Republican candidate, who has a hard job to keep at once the support of Johnson and Burch and other bitter-enders and the support of Taft, Wickersham and other advocates of the League of Nations, nailed his flag to a camouflaged vessel, the International Court, to take the place of the League of Nations. Mr. Root, however, shows that the International Court that Senator Harding adopted as a substitute for the League of Nations is simply an instrument of that league, derives its power from the league and depends upon the league to give validity and force to its decisions. Until the United States joins the League of Nations we will have no voice or power in forming the International Court.

Mr. Root certainly destroyed Senator Harding's pet idea without leaving a trace.

To keep beets from fading when canned, keep in water of one temperature. That is, when you parboil the beets to get off the skin, do not plunge into cold water to remove. Peel with knife and fork as you do Irish potatoes. When canned, cover with paper or put in the dark.

The Republican boys out to "get the money" showed they knew who had it if, as charged, they assessed the coal men.

Tar Heels in Early Western History.

Cor. of The Gleaner.

Chapel Hill, N. C., Oct. 5.—It is a long way from North Carolina to the Pacific Coast, but Prof. Collier Cobb, head of the department of geology at the University of North Carolina, who as a Kenan research professor is studying shore-line processes in relation to harbor development on both sides of the Pacific Ocean, has worked out a remarkable close relationship between North Carolinians and far westerners, built around the part Tar Heels played in early western history.

In an address before the Rainier Club in Seattle recently Prof. Cobb, who has just finished his study of the shore-lines from Alaska down to Tacoma, told the Seattle people more about their early history than they themselves knew. "Your own King County was named after Vice-President William R. King, a native of North Carolina and a graduate of the university," Prof. Cobb said.

"Many of the islands, points and bays in this section were named by Captain Charles Wilkes, the same man who removed the Confederate commissioners, Mason and Slidell, from the British ship Trent and almost involved the United States in war with England. Wilkes was a North Carolinian and many of his family live there now, some of them in Charlotte. He entered Puget Sound in 1841 and left many names here which he took largely from officers of his ship.

"Among these officers were Lieut. Robert E. Johns, a North Carolinian, who was the first American to see and describe Mount Rainier, Lieut. Overton Carr, after whom an inlet was named, was another North Carolinian, as were two midshipmen, George M. Totten and William May; also Lieutenant Maury, a Virginian, who had received his Master's degree from the University of North Carolina, is remembered by a large island named after him.

"Captain Wilkes named Bainbridge Island after his friend, Admiral Bainbridge, who had killed Deceatur in a duel. Elliott Bay was named after Chaplain J. L. Elliott, another North Carolinian."

Prof. Cobb also related that Captain John Blakely, Commander of the famous Wasp in the war of 1812, had at least two points in Puget Sound named after him. Blakely was an alumnus of the University.

After investigating Oregon shore-lines Prof. Cobb will leave for a two months' trip to the orient where he will study shore-lines along the Siberian and China coasts and in the Philippine Islands, with special reference to harbor possibilities. His present work is in continuation of studies he has been making for many years. He has already covered much of the shore-line of the Mediterranean and along the French, Dutch, and Belgian coasts. Prof. Cobb will return to Chapel Hill next fall and resume his work in the University.

The Covenant.

The Covenant of the League of Nations is omitted from the Republican textbook because it is "too long" or "not interesting." The Covenant is not a lengthy document; it takes less than ten pages of the Democratic textbook. It is about as much as ten pages of an ordinary novel.

Steps are being taken to make it easily possible for every American voter to obtain a copy of the Covenant of the league.

MR. DODSON WARNS USERS OF CALOMEL

says Drug Acts Like Dynamite on Liver and You Lose a Day's Work.

There's no reason why a person should take sickening calomel when a few cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.

It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it does not make you sick and cannot sallowate children and grown folks can take Dodson's Liver Tone, because it is perfectly harmless.

Calomel is a dangerous drug. It is mercury and attacks your joints. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more slowness, constipation, sluggishness, headache, coated tongue or sour stomach. Your druggist says if you don't find Dodson's Liver Tone acts faster than horrible calomel your money is waiting for you.

Get Out of the Hole.

When you find you are a square peg in a round hole, get out of the hole. It is worse than an auto in a rut. It worries you, and when your daily work worries you it does not matter much how delightful your hours off may be. Half the world, perhaps, starts at the wrong thing. Many people work out of it into something different. A farmer finds his real aptitude is for raising fine cattle, and at length he has become a stock breeder. Another is appalled by a few hundred acres and comes to raise garden vegetables on a few. An engineer turns to be a salesman or an executive, and so on. Not every task offers this chance to the worker gradually to leave it behind. If a fair trial, if doing one's best for a year or two or three, still finds one either listless or worried, or worse still becoming a machine, then he needs to remember that any man or woman who will work need not fear starving. He needs to get into something else to which he can give the best he has. Few of us leave records like the Washington monument. It matters more that we should do what we do well and do it with enjoyment.—Milwaukee Journal.

Relic of Primitive Days.

Primitive man wore a collar for ornamentation, before he wore much of anything else, so the stiff collar is not a modern part of man's attire. In the fourteenth century neck chains, or "livery collars," were worn in England, symbolizing allegiance to one or another feudal baron. These collars are still used in European officialdom by orders of knighthood. The collar ruff became the vogue among the rich. Later, when starch was introduced from Flanders, more people could afford the ruffles, and they assumed such proportions that a proclamation was issued against them. Even the church took steps to reduce their size. In the United States collars were in general use in 1850. They stood straight up and were conducive to anything but comfort.

Has 650 Species of Birds.

Costa Rica is about the same size as West Virginia, but over 650 species of land birds have been found in that little Central American republic, whereas, in all America north of Mexico only some 600 species are known. And in the Andean region, within an even smaller area, a larger number of birds has been recorded than from Costa Rica. In Andean Colombia, for example, expeditions of the American Museum of Natural History actually secured specimens of over 1,150 species of land birds, or more than twice as many as exist in the United States, Canada and Greenland. In tropical South America birds are practically nonmigratory. They are, therefore, continuously subjected to the influences of their surroundings and do not mix with birds from other localities—two factors of the utmost importance in the evolution of species.

When Baby Swallows Air.

Babies often swallow air, which causes much discomfort, Dr. A. Yilpoe writes in the Therapeutische Halbmonatshefte (Berlin). But they are not nearly so likely to do this if fed when lying prone, the head raised or turned on one side. Lying on the abdomen is often enough to break the habit. When this fails he has the baby lie on a flat hammock stretched from head to footboard of the crib, and he says the unsteadiness and movements of the hammock, supplementing the prone position, divert the child's attention and make it forget to swallow air.

Vanishing Languages.

Nowhere in America has there been such a diversity of Indian languages as in California. But these languages are now rapidly disappearing. Several of them are known only by five or six and others by only twenty or thirty living persons, and hardly a year passes without some dialect, or even language, ceasing to exist through the death of the last individual able to speak it. Efforts are being made to record all these languages for the sake of the light they throw on the ancient history of the Pacific coast.—Sun and New York Herald.

Queer Insects.

Several species of insect are commonly found living in the ice and snow of glaciers. Most of them belong to the order of "spring-tails" and are so minute that they escape the attention of most passersby. On certain glaciers millions and millions of little worms may be seen during the summer, wriggling on the surface of the ice. When the sun is particularly hot they retreat into their holes in the ice, sometimes a distance of many feet.—Ladies' Home Journal.

Suspension Bridge.

The Scientific American says that the suspension bridge over the Snake river near Twin Falls in southern Idaho, is the highest in America, if not in the world. The actual measurement is 845 feet from the floor of the bridge to the stream, and the length of the span is 688 feet. Aside from its extreme height, the bridge is of interest because, although materials had to be hauled a great distance, the structure was completed in four months.

Dignity of Peruvian Mayor.

The mayor of the smallest town in Peru feels that it is incumbent on him in order to make the proper display of official dignity, to be accompanied by a band of pipers whenever he appears on any state occasion. These musicians have instruments which consist of a series of reeds struck together and make weird music.

Catarrahal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrahal deafness, and that is by a constitutional remedy. Catarrahal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, you have a rattling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrahal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c.

F. J. CHENEY & CO., Toledo, O.

Joe Bailey was sent way back to sit down by the Texas voters and may now imitate the silence of Bryan, House, Hoover and the ex-kaiser.

Editor Harding has decided to abandon the old front porch and to increase his circulation.

Democrats and Our Shipping

The United States is now the second maritime power in the world. In 1914 the United States had 755 ocean-going vessels, aggregating a little over 2,400,000 gross tons, of which 80 per cent were engaged in coastwise and Great Lakes trade. Only 10 per cent of the country's foreign commerce was carried in American bottoms and the shipbuilding industry was stagnant.

In 1920, on June 30, the United States had 3,404 ocean-going vessels, aggregating over 11,000,000 gross tonnage, and 42 per cent of our country's foreign commerce was carried in American ships.

Did Harding leave the front porch because it got too hot or too cold?

Kill That Cold With

HILL'S CASCARA QUININE

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opium in Hill's.

ALL DRUGGISTS SELL IT

Farm Implements & Stock AT AUCTION!

Having sold my farm 2 miles South of Graham on the macadam road, I will sell to the highest bidder, for cash, on the premises, on

Friday, 15th day of October,

all my stock and farming implements, consisting of One Mule, One Horse, Four Fine Hogs, Three Milch Cows, Two Calves, One 2-Horse Steel Wagon, One 1-Horse Wagon, One Cutaway Harrow, One Drag Harrow, One 2-Horse Plow, One Cultivator, One Double-Shovel Plow, and many other articles.

The hogs are now in pen and will probably weigh 175 pounds each.

One cow is fresh with calf by her side; the other two were fresh early in the summer.

The sale will begin promptly at 1 o'clock p. m.

JACOB A. LONG.

FOR YOUR BLOOD

To be healthy and strong, you must have a certain amount of iron in your blood. When your blood lacks iron, nothing can take its place—and you are bound to suffer for iron until you get it. Pale, weak, nervous people, who suffer from headaches, indigestion, rheumatic pains, lack of appetite, and who feel tired, worn-out and depressed, probably need iron in their blood and should take

ZIRON

The Scientific Iron Tonic

Mr. A. R. Erwin writes from Ocala, Ga.: "I am a man of 65; have taken very little medicine of any kind. Two years ago I got a pain in my back, pains in the muscles of my arm and leg; no appetite, very weak, languid, depressed, no energy, nervous and irritable. . . . I took three bottles of Ziron, and got all right."

Get a bottle of Ziron Iron Tonic Tablets, today. If the first bottle takes little to benefit you, your money will be refunded, for all good druggists sell Ziron on a money-back guarantee.

I am Busy Bob, the new clerk, and am going to work at HOLT'S CASH AND CARRY STORE. I am going to be here every week and will tell you where you can buy the freshest and best groceries most economically. Our stock is the most complete carried by a first-class grocery store and you are invited to inspect our line. Sugar 18c. this week.
