

HOW DOCTORS TREAT COLDS AND THE FLU

First Step in Treatment is a Brisk Purgative With Calotab, the Purified and Refined Calomel Tablets that are Nausealess, Safe and Sure.

Doctors have found by experience that no medicine for colds and influenza can be depended upon for full effectiveness until the liver is made thoroughly active. That is why the first step in the treatment is the new, nausealess, colored tablet called Calotab, which are free from the sickening and weakening effects of the old style calomel. Doctors also point out the fact that an active liver may go a long way towards preventing influenza and is one of the most important factors in enabling the patient to successfully withstand an attack and ward off pneumonia.

One Calotab on the tongue at bed time with a swallow of water—that's all. No salts, no nausea nor the slightest interference with your eating, pleasure or work. Next morning your cold has vanished, your liver is active, your system is purified, and you are feeling fine, with a hearty appetite for breakfast. Druggists sell Calotabs only in original sealed packages, price thirty-five cents. Your money will be cheerfully refunded if you do not find them delightful.—(Adv.)

ARE WORRIED OVER BLUE LAW RUMORS

DRIVE FOR A BETTER SUNDAY FROM THE SOUTH LOOKED FOR AT THE CAPITAL.

CONGRESSMEN MAKE CHARGES

Recent Press Dispatches Report That Campaign Has Been Launched in North Carolina and Elsewhere.

Washington—Congressmen from the north and west are worried over reports from the south that a drive for national "blue laws" is about to be made on the national capital. They charge southern leaders with bringing prohibition here, and with the latest movement that frightens them. Recent press dispatches indicate that leaders of the Anti-Saloon league and other temperance organizations have launched a campaign in North Carolina and other southern states for a national blue law.

The first open participation of the Anti-Saloon league in this new fight was in North Carolina when Rev. R. L. Davis, secretary of the state Anti-Saloon league, introduced a resolution endorsing the national Sabbath law to be passed by congress to stop work and sports on that day. Mr. Davis has been one of the most active leaders of the Anti-Saloon league in the South.

Wayne B. Wheeler has repeatedly said that his organization is sticking to the prohibition question, and will not attempt to interfere with the smoking of cigarettes and the observance of the Sabbath.

VIOLATION OF EQUAL RIGHTS

The Agreement in Question Apparently Provides for Division of Oil Supplies of Mesopotamia.

Washington.—The United States has dispatched a note to Great Britain protesting against secret agreements between the allies for the exploitation of territories of the former Turkish empire, it was learned.

The note is the second of a series between the United States and Great Britain since a secret agreement between England and France for exploitation of the oil resources of Mesopotamia came to light some time ago.

The first note was sent to Great Britain several months ago as an inquiry about the agreement reached at San Remo, Italy, between England and France on Mesopotamian oil supplies. The state department is understood to have pointed out in this note that the agreement was in violation of the stand of the United States that all nations must be given equal rights in mandate countries. Great Britain holds the mandate over Mesopotamia. The agreement between Great Britain and France provided for an apparent division between the two countries of the oil supplies of Mesopotamia.

The reply of Great Britain to the first note of the United States is understood to have said that the agreement did not prevent any other nation from the commercial exploitation of Mesopotamia or prejudice their rights, but that the pact was merely intended to facilitate greatly needed oil supplies to the two countries.

Executive Council is Criticized for Inaction During the Last Year in Polish and Russian War.

Geneva.—Immediate admission of Germany and the other former enemy states to the league of nations was urged before the assembly of the league by George Nicholl Barnes, of the British delegation. Representing as he did the laboring people of Great Britain, said Mr. Barnes, he knew the great majority of them demanded that all the enemy states be admitted without delay.

The British delegate recalled the fact that Germany had taken part already in the deliberations of the international labor bureau established by the league.

"The people of Great Britain whom I represent here," he said, "do not forget that the central empires plunged the world into war. They do not forget the misery and devastation caused. But the question now is to rescue the world from ruin, and the co-operation of the former enemy states is needed."

Mr. Barnes, in his speech, which was delivered in course of discussion on the report to the assembly made by the executive council of the league, spoke approvingly of the action of the council on some questions, but criticized its inaction during the last year while Poland and soviet Russia were engaged in hostilities.

HALF THE STATES AFFECTED

The Interstate Commerce Commission Holds a General Obligation Rests on it "To Exercise Control."

Washington.—In its first decision on the right of the federal government under the transportation act to require railroad rates within a state to correspond to the higher levels of interstate tariffs, the interstate commerce commission ordered the railroads of New York to establish passenger and baggage rates on intrastate traffic conforming to advanced interstate schedules. Similar proceedings are pending affecting more than half the states in the union.

The federal body held that there was a general obligation resting upon it "to exercise control over interstate commerce so far as it affects interstate commerce."

"The decisive factor," the ruling said, "is whether the rates under consideration injuriously affect interstate commerce."

Congress directed that rates be allowed which would yield an aggregate return of from five and one-half to six per cent.

A dissenting opinion was handed down by Commissioner Eastman, who contended that the decision of the majority was beyond the lawful power of the commission.

The measure is to be ready for the house when it meets December 6 in the hope of its passage there by the Christmas holidays and in the senate in January.

Reports of widespread plans to dump ten or fifteen million aliens into the United States from Europe, many of them radicals of the worst type, are responsible for the emergency steps proposed.
