LOCAL NEWS.

-A two-weeks term of Alamance Superior Court begins next Monday for the trial of civil cases. Judge Calvert will preside.

Mrs. J.B. Montgomery returned Tuesday morning from a visit of two weeks to her sister, Mrs. H. F. Crawford, at Williston, Tenn.

-A delegation of 14 Alamano Confederate veterans left Saturday night for the Reunion at Dallas, Texas. Among them were W. C. Hornaday, G. S. Coble, W. C. Land and J. N. H. Clindenin. The last named was accompanied by his grandson, Charles Thompson.

-The United States Post Office department has put on a campaign for better addressing of letters and packages to be mailed. We are pub-lishing several articles in this issue in regard to this matter. By them you will see that millions of letters and packages go wrong every year and are never delivered, and that millions in money and valuables are lust to those for whom they are intended. Besides, it costs the government many snug fortunes eac year in handling poorly or non-addressed mail matter

Public Schools Helping in Prope Mailing of Letters and Packages.

More and more public school throughout the country are establishing regular courses of instruction in the proper preparation and disposition of mail, not as a favor disposition of mail, not as a favor to the post office, but as a duty to revivalist, will preach a special the community -- as a contribution to business efficiency, for the pos-tal service is the life blood of business.

The Post Office Department, of course, is in favor of the general extension of this practice, and stands ready to supply teachers and pupils with any information that will aid in such studies.

Duke University Commencement

The commencement exercise at Dake University will be held from Sunday, June 7, to Wednesday, 10th. inclusive.

Sunday evening at 8:30, Bacca laurate address by Dr. Robert Emory Blackwell, president of Randolph-

Macon College. Monday svening Wiley Gray medal contest by members of graduating

Tuesday, 11 o'clock, annual serme by Dr. E. Stanly Jones of India. Wednesday at 11 o'clock address by Hon. Ourtis D. Wilbur' Secre-

tary of the Navy. These are the outstanding features of the exercises, but there will be numerous other interesting events during Monday, Tuesday and Wednesday:

Roadside Marketing And Rules To Govern

Farmers Lose Money By Not Feeding Hogs. Effective Plan

Farmers of North Carolina will lose during 1925 approximately ten million dollars, which might be theirs, because they are not properly feeding and handling their existing herds of swine to better advantage.

"Because of this," says W. W. grow. This practice has shown good results as the phos-phates and potash are held by the soils so that the plant has suffi-"O Shay, swine extension specialist at State College, "it is time that we began to give these facts atten-

solls so that the plant has sum-clent supply during the growing season. The nitrogen compounds may be lost giving the reason for a top dresser. "Before boll weevil days cur "Quite a-number of car load of prime hogs weighing around two hundred pounds have been shipped byNorthCarolina farmers during March and April. In most farmers had a longer season in cases the hogs paid upward of which to make their crop of cotton, \$2.00 per bushlel for the corr they had eaten.

"A 15,000-pound car load of such hogs was worth \$2,000 to \$2,periment Station, "but now the such hogs was worth \$2,000 to \$2,-season has been shortened and it 250.00 and if produced on land is imperative that as much cotton would yield 30 bushels or upward be made as early as possible, as of corn per acre, they would, if there probably will not be any late properly fed, consist of Tall pigs and show a margin of well over

\$1,000.00 above cost of production. "Spring pigs, wisely handled from now until next fall, will unin fairly large amounts to produce doubtedly pay double the market price of the 1925 corn crop and from four to five times the profit above cost of production. Yet only six months since the farmers of this State w -re slaughtering brood sows to such an alarming extent that an issue of 10,000 circulars entitled "Save the Brood Sow' was sent out.

"According to figures given out by the State Statistician, Frank Parker, the acreage devoted to corn in this State is 2,471,000 on 209.379 farms as compared with 1,944,000 acres of cotton on 140,-734 farms, and 501,229 acres of tobacco on 73,739 faims. "We honestly believe at a con-

servative estimate, the farmers of N. C. will, during 1925, lose \$10, 000,000 which might be theirs but which they will never see because of mismanagement of the present swine population of 'the

Farm Convention Meets Last Week In July.

The State Convention of far mers and farm women will be held at the N. C. State College during the three days of July 28, 29 and 30 according to an aunouncement from J. M. Gray, Secretary of the organization and assistant director of agricultural extension at the

The central theme of the con vention will be the more profitable utilzation of our agricultural resources and speakers of nation-al importance will be brought to the College to lead in the discussions. Headquarters for the convention this year will be at the New Frank Thompson Gymnasium which affords a fine assembly room and smaller rooms for com mittee and group meetings.

At a conference recently held in the offices of President E. C. Brooks, it was desided to invite Secretary of Agriculture, William M. Jardine and Governor Gifford Pinchot of Penusylvania to address the convention at the two evening sessions. Joint meetings

for Inspection Movement of Live Stock Facilitated and Spread of

Disease Prevented.

(Prepared by the United States Der

(Prepared by the United States Department Stationium). To facilitate the movement of live stock in integrate commerce and at the same time prevent the spread of diseases and various animal pests, the United States maintains an effective system of inspection. The results of this public service are described by Dr. John R. Mohler, chief of the bu-reau of animal industry, United States Department of Agriculture, in his re-port for the last fiscal year. Follow-ing are some of the outstanding fea-tures of the work, of particular inter-est to the public: Deed of Trust, the undersigned est to the public: Cattle Inspected.

Cattle numbering 21,258,393 were in spected at market centers and 21,089 of them were dipped in suitable solutions in order that they might continue

in interstate commerce. Bureau inspectors tested 41,419 cattle for tuberculosis at public stock-yards where they had been received for interstate movement. The bureau also recognized the testing by author-ized veterinary practitioners of 235,-970 cattle for the same purpose. About 1 per cent of the cattle tested proved to be tuberculous.

Sheep to the number of 19,769,413 were also inspected for communicable diseases, and of these 1,005,046 were dipped under bureau supervision to comply with the regulations of the department or of the states at destina

Swine Inspected.

Bureau employees also inspected 52,-565,021 swine and supervised the im-munization and disinfection against hog cholera of 509,567 for ships ent to country points for feeding and breeding purposes.

connection with experimental In work to control hemorrhagic septice mia, veterinary inspectors vaccinated 151,457 feeder and stock cattle. Horses and mules inspected num-bered 12,214, of which 5,887 received

mallein tests. Bureau employees supervised the cleaning and disinfection of 74,558 cars, of which 20,401 had carried animals affected with commun eases.

All ruminants and swine received at public stockyards were carefully ex-amined for foot-and-mouth disease by

experienced veterinary inspectors In addition to supervising the inter-state movement of live stock, bureau inspectors also perform similar duties in connection with the importation and exportation of domestic animals, in our relations with foreign countries. Such inspections, during the fiscal year ended June 30, 1924, covered the movement of more than 300,000 head of stock.

Very Desirable Hay for

Various Farm Animals Oat and pea hay well cured makes very desirable feed for diary cows or for, sheep. It is also satisfactory as horse feed, though rather soft for horse that are required to do hard work. In composition, oat and pea hay varies greatly, depending on the amount of peas in the mixture. It

ranks better than timothy but not so good as good clover hay. On good lands yields of two and one-half to three tons of field cured hay may easlly be secured. Under the best of cir-cumstances the crop has been known to yield three and one-half tons of cured hay. The feed produced per acre will be at least equivalent to that produced on an acre of timothy land protected on an acre of timothy land and may be considerably greater. The hay is more difficult to cure than tim-othy but otherwise the cost of produc-ing the crop is no greater except for

Cover Crops With Corn **Excellent** for Pasture

A cover crop sown in corn at the last cultivation makes good pasture or it may be plowed down to improve the soil. If the season is not too dry soy beans, field peas, rape, or cowhorn turnips may be expected to furnish considerable late fail pasture. Rye has proved the most .depend-able of the many cover crops tested at the Ohio 'experiment station, and will furnish pasture in both fall and spring. A mixture of rye and vetch, where the latter is adapted, is desir-able as together they furnish grazing for a longer period and afford greater assurance against winterkilling, than

alone. Red. mammoth, and crimson clover

have not been found satisfactory as cover crops at the Ohio station account of frequent winterkilling. OB

Destroying Poison Ivv Vines Along Fence Row

Poison ivy along frence rows and in similar places can be destroyed by cutting close to the ground and saturating the soil with strong sait solution, or, better still, with waste eil from the tractor or automobile. Kerosene is as effective as waste motor oil, and does not injure the soil to the same extent. In inaccessible to the same extent. In inaccessible places, as along stone fences, spray-ing the leaves with a saturated salt solution prepared at the rate of three pounds of salt per gallon of water and repeated whenever a new crop of leaves appears, is an effective remedy but limited in application on account of the amount of work involved.
