Duluth Harbor Ranks Second to New York

Although its harbor is closed ap-proximately four menths of the year by ice, Duluth is rated the second largest cargo shipping port of the nation in the annual report of marine commerce of the Duluth-Superior harbor, issued under direction of Mal. E. H. Marks, of the United States engineer's office. New York harbor only had more shipping than Duluth last year, and Los Angeles was third, according to the report. Then came Buffalo, Philadelphia, Baltimore, Ashtabula, Ohio, and Boston harbor, Cargo freight, with a value of \$516,837,517 in 45,416,956 tons, for a on of 238 days, was recorded for Duluth harbor. The net registered tonnage of the 8,993 cargo vessels which entered and left the harbo during the season was placed at 37,-676,722 tons, while the total number of vessels of all classes to enter and leave the port was 9,783.

Hangs Self Because He Can't Study as Artist

New York .- As Adolph Poalo, thirteen years old, ate a frugal lunch with his mother in their two-room flat he confided to her his ambition to become a great artist. He showed her some crude pencil sketches he had made, but he said:

"I want to draw much better than that, mother. I want to paint a fine picture like the one on the wall there."

The boy pointed to a cheap print of "the crucifixion." "But to paint a fine picture I

must take lessons." Mrs. Poalo shook her head sadly. The odd jobs Dominic Poalo, the boy's father, was able

to do around the Greenwich village neighborhood hardly paid for their living. "Yes, yes, son," she said. "Some day, maybe, Papa Dom-

inic will have lots of money, but we must wait a while for that," Mrs. Poalo went out to buy groceries. When she returned she found her son's body dangling from a rope tied to a gas pipe.

MAN WROTE WILL ON LID OF CANDY BOX

Latest Thing in Odd Testaments Found in East.

Philadelphia.-Hidden in the big vault connected with the office of the register of wills, in the basement of city hall, are many wills containing queer bequests, many of which are written on scraps of paper, while others are in saving fund deposit books, on fly-leaves of Bibles or in small memorandum books. Especial care is taken of them.

These, however, were overtopped when a middle-aged woman, accom-panied by an attorney, visited the register's office and submitted a cardboard, six by four inches in size, the lid of a box that had contained "motasses coconut bars." as was shown by the advertisement pasted on it. Assistant Deputy Register Edwin V. Byrnes was astonished when told the cardboard lid was the will of John H. Young, who died on December 30 last. at 4808 East Thompson street.

Believing that the woman's mind was impaired, for many such persons visit the office and make all sorts of inquiries regarding mythical estates, the clerk smiled, as did also the woman, who turned the lid and pointed to five lines written on the inside, in lead pencil, showing that it was a will, properly executed and witnessed. The will read:

"This is to certify that I am of sound mind on this day of our Lord, October 6, 1924. I bequeath all my personal property and all that belongs to me to my wife, Elizabeth Young. "JOHN H. YOUNG."

All wills are filed in alphabetical order in the vault, but the cardboard upon which this will is written is too large to permit of its being placed in the receptacle. Before it can be filed ft will be necessary to obtain permis sion from Mrs. Young, the widow, who is executor of the estate, to cut off the surplus portion of the lid. Until this permission is secured, the will will be kept in the big fireproof safe in the main office.

Parrot Saves Master

From Hands of Thugs

Cincinnati.-John E. Sherlock, cigar store proprietor, told police how a parrot frightened two men who attempted to rob him at his home recently.

Early in the morning two men, one nasked and the other wearing a handerchief to conceal his face, came Sherlock's home and, using a friend's name, induced Sherlock to open the

door. Both were armed.

They demanded money. Sherlock told them he had none. One of the men struck him on the head with the butt end of his revolver, while the other one twisted his left arm.

"Bring me my gun," called Sherlock in an effort to make his assailants believe someone was in the house.

"What do you want?" came a question in a screechy voice. When the men heard this, both ran out the door. The answer came from his parrot.

Three Little Girls Die

in Flames in Burning Barn Austin, Texas.—Trapped behind a wall of flame in a burning hay barn at the bome of B. C. Hardin, four miles west of Austin, three girls were burned len four: Dorothy Cullen, six, daughters of Mr. and Mrs. F. O. Cullen of Austin, and Da May Hardin, seven, daughter of Mr. and Mrs. Hardin. The

origin of the fire is unknown.

Philadelphia.-When she found four burglars attempting to enter a neigh-bor's store, Mrs. Clara Kinkald routed

bor's store, Mrs. Clara Kinkald routed the thieves by shooting at them from her bedroom window.

Her attention was attracted when Mrs. Jenuic Cutier screamed for aid as the four suspects tried to force a door in her store.

When Mrs. Kinkald opened fire the suspects fied. The shooting also awakened Robert Archibald, thirty-two, who leaped from bed and started in pursuit of the fugitives, but was unable to halt them.

SUMMER FROCKS OF VOILE; MODERN GLOVE IS ELABORATE

If GENTLE spring were to come draw all of passing feminine kind unto walking in, with a frown on berface itself, at least not if a glove store and no daffodfis, apple blessoms or lilacs in her arms, she would hear Silk gloves, which to catch a glimpse of the standard of some grumbling on every hand. But if she were to arrive without a train of sheer, dainty, colorful cotton fabspring pink. Sometimes one of these

of is to covet, carry the cunninge cuffs, some cut in petals, lapped one over another, lined with contrasting rics, a riot of protest would storm color and spreading about the wrist about her. But she doesn't take any like a full-blown flower. Then there such chance—always lovely voiles, or are cuffs perforated as effectively as gandies, mulls and the like drift in the paper frill about milady's colonial and are usually well launched before bouquet. Plaited ruffles, flare cuffs even the peach trees have put on their with colorful silk pipings, cuffs so heavily embroidered as to almost confabrics and sometimes another domceal the background, cuffs narrow

Stylists Take Pride in This.

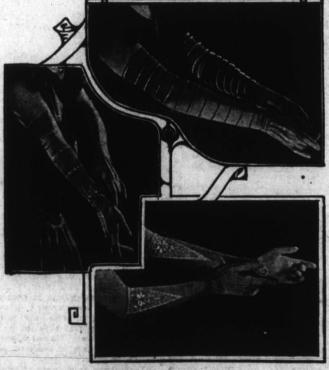

inates the styles created for mid- cuffs wide, cuffs in two-tone effects anywhere.

The colors in voiles, which are scheduled to be popular this season, are entrancing, in shades that prove wonderfully becoming. Many of the pinks have a mellow, yellow cast. Greens are delicate, in light or pale tones; blues are stronger but soft with powder blue, periwinkle and bluet well represented. Yellow is either of the canary kind or has the greenish, citron tone and there are a number of beautiful orchid shades. These are usually livelier under artificial light, but the joyous career of the voile frock is usually sunlit, like the butterfiles.

summer's gayeties and worn almost these and many more feature the short gloves of today.

If you are looking for something which eclipses every other short glove in point of the unusual, consider the same in black, beige or brown with gold kidskin inset into bright red suede to form the cuff, the embroidery on the backs repeating the gay color-ings. Slik gloves in the neutral shades are the practical selection now that warm weather is upon us. The cuffs of these indulge in delightsome color contrasts, which impart chic to the entire costume.

Even the longer gloves are reflecting fashion's whimsical mood. In som instances the new colored and white dresses, good taste gravitates toward | silk gloves are boasting tucks through

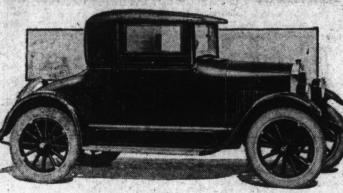

simple stitchery, tucks, hemstitching, and drawn work, in keeping with the character of the material, whose charm lies in its daintiness and color. Narrow lingerie laces fit in many schemes of adornment also. Both needlework and lace appear on the frock pictured—narrow val lace in double frills about neck and sleeves and as an outline for the yoke and front panel in the bodice, with outline embroidery in flower design. The girdle is of narrow ribbon slipped through slashes, at a low waistline. Picot edging finishes the slashes and is useful in making many kinds of trimming. Whether fashion is more interested in our hands or our feet, is a question this season. It is indeed a close competition between our shoes and our gloves as to which shall attain to greater extremes of fantastic interpretation. No longer does a window display of footwear prove a magnet to le stitchery, tucks, hemstitching, out their length, as the picture sho

Others show introduction of wee plaitings, ofttimes alternated with tucks However, it is the short glove which has the monopoly, just now, on originality of design.

Among the wrist-length gloves of striking design are white kid ones, with narrow hand-painted cuffs. Other glove types accorded an important place in the accessories for spring and summer, stress exquisite petit-point embroidery. These are found among the more expensive types. Indeed, so handsome are some of the new cuffs, and so worth while, when the glove wears out, these are renewed and stitched onto a new pair. There is a pronounced tendency to match the gloves and hosiery. Among the wrist-length glo

STRIKING FEATURES OF NEW STAR COUPSTER

Flexible door windows that may be lowered or raised like pullman can curtains and that disappear within the top of the body when raised are a

striking feature of the new Star coupster.

In reality the coupster is a convertible car, affording all the comforts of closed car transportation, yet convertible into an open car by the simple expedient of raising two disappearing windows—a five-second operation. For all practical purposes it is two cars in one.

EFFICIENCY AND SAFETY OF CARS Running Through Stream Is

Numerous Devices Add to Comfort and Satisfaction of Owner.

It is difficult to believe that the off pressure gauges and 'he ampere-me-ters which new appear on the instru-ment boards of virtually all makes of cars were once regarded by many as unnecessary frills. Today there are a number of accessories being offered which are similarly regarded, which is the same as saying that they would be appreciated if only their advan

tages were better known.

By equipping a car with some o these fitments, greater satisfaction, efficiency and safety will result. Add front and rear bumpers to the car, attach one of the many rear signaling devices, keep a set of anti-skid chains bandy and the car will be enormously benefited in proportion to the cost of the protection. 'Frequently such safety devices add to the car's appearance and thus not only help protect th owner's original investment, but add to it. A spotlight attached to the windshield and played upon the road may prevent wrecking the car in a

Take efficiency as another instance A car that is operated without proper regulation of the cooling system is at all times running inefficiently. This is especially true in winter when the engine is constantly operated at the wrong temperature, either boiling over cause the radiator is covered with the lap-robe or running cold because there is no covering at all. The mar ket now offers several radiator covers with openings which can be operated from the dash.

Along the efficiency line are other devices which are destined to filter the gasoline before it is admitted to the carburetor, thus preventing the entrance of dirty or watered gasoline to the carburetor or engine. A device of this character may pay for itseli rithin a month after it is installed.

Then there are shock absorber which in addition to giving greater riding comfort, save the springs from breakage on the rebound and thus increase the usefulness of the car by preventing breakdowns. Even cut-outs which were at one time regarded as toys for the speed maniacs are no

shown to have a very important use. Regardless of the selling points of each accessory or all of them as a group, it is a fact that any one of them adds to the second-hand value of a car. So the motorist not only has the use of the accessories with which he equips his car and the savings of nsurance, inconvenience, repair bills, etc., but he gets a return premlum when he goes to sell the car.

Good Advice Is to Give Machine the Once-Over

There's economy, also satisfaction in giving your car the once-over in the spring, then if it needs replacements or anything else to bring it back to perfect form, have it done as quickly as possible.

Naturally the toll of a year's driving is most severe, and generally there is a reminder or two. Right here the old stitch in time principle works When the car is restored to its best shape, almost as good as the day it was bought, riding in it is far more enjoyable, also it will bring a much better price if you care to sell or ex-pect to trade it in on a new car.

Letting your motor car run down is false economy. Eventually it costs you more and in the interim you are not happiest when riding along the highways.

Even little things which you may

think are of no special consequence develop into big items in repair bills

Windshield Rattle When the windshield glass bed

When the windshield glass becomes loose in its frame, it causes an annoying rattle. It is very difficult to close the frame so that it will grip the glass more securely without the possibility of breaking the latter. If the glass is not too loose the rattle can be eliminated by filling the space in the frame with shellac. This can be applied with a sharp pointed stick or a brush and should be applied slowly so that it will pack tightly in the opening.

WATER INJURY TO TIRES IS SMALL

Not Injurious.

Now and then in the course of an automobile trip a car has to pass through a stream, and the question is sometimes discussed whether the action of the water is harmful to the tires. The same question arises when the car is out in a heavy rain.

Such a wetting is practically noth ing at all, either for damage or improvement. At any rate, the effect on the tire is not harmful. Two chief constituents of a tire are rubber and cotton, both vegetable substances, and as a rule water does not injure vege table matter. As illustrative of this point, there is the old but true story of the farmer who, when one of his rubber boots fell into a well, placed the other on a shelf in a closet. Twelve years later when the well was cleaned the lost boot was found to be in excellent condition, but the boot on the shelf had fallen into ruin.

If running through a brook resulted in cooling a tire the effect would be decidedly beneficial, but a quick dash through the water has little effect on the heated air within the tire and consequently the temperature change in the tire after its bath is negligible

Water itself apparently does no harm to tires, but the combination of air and moisture commonly known as humidity is very destructive, especially on the cotton in ordinary fabric tires. The moist air works in between the layers of the fabric and rots them out, sometimes even before the tires leave the dealer's storeroom. Cord

tires stand humidity better.

The harmful effect of moist air is the chief reason why, when tires are stored, they should be kept in a dry atmosphere. As sunlight is also harmful, the storage place should be dark

Shabby Tires Are Not Favored for Any Car

Shabby tires on a good-looking car Yet stand on any street corner today and count the number of patched-up, dilapidated tires which are being used to the last mile. The cost of keeping these tires running for a few thou sand miles would nearly pay for new ones. Mileage such as this come

Tire conservation does not mea picking up a decrepit tire and putting it back into service at a big repair cost just to save a little rubber left in the tread. It means taking care of the tire from the first so that it will be able to deliver all the mileage built into it by the maker. When tires are so far worn that they are soon to plow, it is poor economy to repair Such a course means sad e inner tube as well.

Cheap, makeshift patches, boots and temporary repairs of all kinds are now being called into use as never before, but patching up an old casing in which begun, cannot give the freedom from motoring so largely depends.

Tying in Spring Leaves Will Prevent Spreading

Since the leaves in a spring have tendency to spread apart, it is often hard to replace the spring tie-bolt in autos or trucks.

The easy way is to grip the head of the tie-bolt in a vise, and put all but the last four leaves one on top of the other. The last four leaves are put on crosswise, or spread around like the ribs of an umbrella, which allows the ribs of an umbrella, which allows the nut to be easily started on the bolt.

'With the nut on the bolt, swing the bottom cross leaf into place. Then each succeeding leaf will slide easily into position. Then tighten the tiebolt' nut. Of course, the clamps on each end will have to be removed until the spring is assembled. til the spring is assen

Anything These Days

Running downhill recently a driver found to his utter surprise that a motor truck, supposedly at rest in the downhill position on the right side of the road, was actually going upfull backwards. The driver could not get backwards. The driver could not get it through his head for a moment and nearly lost control of his machine try-ing to dope it out, which showed that he was not prepared to expect most anything nowadays. The truck driver was utilising the lower gear ratio of reverse in order to enable the engine to pull up an extra heavy load.

Why That Bad Back?

kache keeping you upset? Fee all tired out—so nervous and dispirited you can hardly keep going? Alben look to your kidneys! Your lidneys rid the body of poisonous waste. But if they lag, impurities accumulate and poison the whole system. Then one is apt to suffer backache, stabbing pains, headaches, dizziners, and other annoying kidney irregularities. If your kidneys are sluggish, help them with a diuretic. Use Doan's Pills. They are praised the world over. Ask your neighbor?

Clever Thief Detector

Valuable metal had a habit of disappearing from a German factory re-cently, so a clever scientific thief detector was rigged up by the physicists connected with the works. At the end of the day's work each employee was required to remove his knife and other metallic personal possessions from his pockets and pass through a specially constructed gateway. This was so wired that any concealed metal being taken away illicitly would make itself known by inducing a current in a de vice that emitted a loud warning signal for the guard's benefit. The loss of metal has decreased markedly since the construction of the device.
