**Keeping Cows Means \$91,760  
Extra Income for This County**

An added income of \$91,760 a year is enjoyed by Alamance county farmers indirectly as a result of keeping cows, according to the Larrowe Institute of Animal Economics. This income is in the form of a more fertile soil due to the manure of the dairy cows of this county. On the basis of practically a \$20.00 fertilizer valuation per animal per year, this means a total of \$91,760 added to the richness of the soil in this county every twelvemonth.

Manure is a source of the most valuable plant food obtainable, says the institute, but to preserve it at its highest value or efficiency, it should be put directly to the fields each day or conserved until such time as the opportunity offers itself to spread it. Feeding trials have proven that an ordinary cow, while putting from 15 to 18 per cent of the total energy she consumes into milk, actually returns to the soil 80 per cent of the elements of soil fertility in her feed in the form of manure. This has led many dairymen to discover that the purchase of good concentrate foods for their cows not only more than pays for itself in increased milk production but that it also supplies necessary food for farm crops that are expensive when bought in the form of commercial fertilizer.

**Good Seed Bed Assures Garden Success.**

The best way to produce garden vegetables of high quality is to have a good, well prepared seed bed in which the small seeds may germinate easily and the young plants may grow quickly into edible vegetables.

"Thorough preparation of the garden soil is a big factor in the production of high quality vegetables," says Robert Schmidt, vegetable specialist at the State College of Agriculture. "Fall plowing is best, but if this has not been done, then the soil should be broken as soon as possible. Any stable manure applied should be well rotted, in order to be quickly available to the plants. Most garden soils are deficient in lime, and ground limestone used at the rate of 2,000 pounds to the acre will result in a great improvement in both soils and crops. An exception is made in the case of Irish potatoes. No lime should be applied to the land on which Irish potatoes are to be grown this year."

Prof. Schmidt states that a well pulverized seed bed is essential to the proper germination of the garden seeds. Even the best seeds will not germinate in a pile of clods. The garden rake is a good tool for the final preparation of the seed bed. The smaller the seeds that are to be sown, the more finely should the soil be pulverized.

Thorough preparation of the seed bed will make subsequent cultivation easier, states Prof. Schmidt.

Don't plant potato peelings and expect a good crop of Irish potatoes this season. The seed pieces should weigh at least 2 ounces, state horticultural workers at State College.

**Cheap Feed Produced By Good Pasture.**

A good pasture produces the best feed for all kinds of livestock and the feed is secured more cheaply than in any other way. Even the man who keeps but one cow, a few hogs and some work stock will find a permanent pasture to pay well. "Demonstrations have shown that the loamy soils of North Carolina will produce good pastures that will furnish succulent food for livestock from March until November," says S. J. Kirby, extension pasture specialist for the State College of Agriculture. "In almost every county east of the piedmont section, there are permanent pastures which have produced heavy grazing for periods varying from one to 21 years. Almost any type of soil will produce these pastures and some soils will produce better pastures than other kind of crops. The best pasture land is a rather fertile soil ranging from a sandy loam to a clayey loam of low to medium upland."

Woods, cut-over land and cleared land will produce good pastures and are easily prepared for seed, states Mr. Kirby. The woods land may be prepared for by cutting out the underbrush, thinning out the taller trees and removing those trees which are valuable for timber. It is necessary to break and disk old broom-sedge land before seeding. The cultivated land may be prepared simply by disking the soil. A better growth secured if the land has been plowed the fall before, but cultivated land should not be plowed for planting of pasture just before the seeds are sown.

Mr. Kirby states that the land be well fertilized with stable manure, 300 to 400 pounds of acid phosphate and from 200 to 300 pounds of some of some organic nitrogen material like cottonseed or tankage. Seed mixtures to use can be secured on application to the county agent or to the pasture specialist and seeding should be done between February 15 and April 1.

**Can't Raise Crops With Last Year's Fertilizer.**

There is not enough plant food left in the soil from fertilizer applied last year to raise profitable crops this year. Another application must be made this season if good acre yields are to be secured. This is the opinion of L. G. Willis, soil chemist at the North Carolina Experiment Station, who states that the Station has had a number of requests from farmers as to the value of the fertilizer left in the ground last season. He states that while the dry season last year resulted in much of the fertilizer not being used by the crops during the summer season, much of this plant food has either leached out or has formed such chemical combinations with the soil particles that little of the material is available to get the

**HAVE YOU A BAD BACK?**

Then the Advice of this Graham Resident Will Interest You.

Does your back ache night and day; Hinder work; destroy your rest? Are you tortured with stabbing pains? When you stoop, lift or bend? Then likely your kidneys are weak. More troubles may soon appear. Headaches, dizziness, nervousness; Or uric acid and its ills. Help your weakened kidneys with a stimulant diuretic. Use Doan's Pills. Read this Graham testimony: L. C. Fogleman, E. Elm St., says: "I had a severe backache and my back was so weak I could hardly get out of bed. Used Doan's Pills and one box strengthened my back and the ache left. I haven't had any return of the trouble and believe Doan's cured me. They are fine for backache." Price 60c at all dealers. Don't simply ask for a kidney remedy—get Doan's Pills—the same that Mr. Fogleman had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.
