

#### **OLD FOLKS SAY** DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he

the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headaches, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

World's Illiterates.

Dr. J. F. Abel, a specialist of the bureau of education, says that 62.5 per cent of all the world's inhabitants, despite the educational progress of the last two or three centuries, are still illiterate. Doctor Abel calculates that the world's population now is 1,-\$20,000,0000. Of these 455,000,000 are deducted on the ground that people under ten years of age are illiterate. This leaves 1,365,000,000 above the age of ten, of whom Doctor Abel finds that about 850,000,000 are Illiterates.

#### Fusses Cause Divorces.

Judge Dana used to say the majority of divorce cases that came before him were the result of hasty and unconsidered marriages. The parties had little conception of what a long contract It is and of the compromises, concessions and adjustments that it demands to be successful. They are in themselves mainly little things, but it is a proverb that life con-sists in just one thing after another, and mostly little things.

#### Trees and Prosperity of Nation Are Linked

The economic structure upon which our nation is built is made of forest products, writes Charles Lathrop Pack in the Military Engineer. Just as wooden railroad ties marked the westward advance of civilization, so other products of the forests have kept pace with national growth, and made it possible. When we had to have more houses, down came the We had to have more barns, schools and churches, down came the trees. We had to have farm implements, and wood for fuel, down came more trees. Coal was found and strange as it may seem, there was a great demand for wood because it must be used in mining coal.

The annals of our country bave been written across the pages of history because of trees, and the time has come to give thought to what the historian of the day will write about it 100 years from now. Every step of our onward march has been made pos sible because, and by means, of trees

cleated tires that grip like a cleated shoe

CHAINS this winter? NO! Yet, safety all the time—not just when chains are on! And ruietness all the time-not just when

Cleated tires are the tire industry's answer to winter's most annoying problem. What an innovation!

The picture tells the story. Cleated tires ... grip wet roads ... bite into snow...are sure-footed in slush and mud ... respond effectively to the demands of four-wheel brakes.

AND THEN, after the trying conditions of winter have worn down the cleats, comes into play the standard long mileage Dunlop non-skid balloon tread . . . ready when spring comes to take over the changed road demands brought about by the difference between winter and spring road conditions.

The winter mileage provided by the cleats themselves is entirely additional to the standard tread mileage.

Dunlop considers this winterized tire one of the greatest of its many inventions for the safety and comfort of motorists.
