

THE GLEANER

GRAHAM, N. C., NOV. 27, 1930

LOCAL NEWS.

—Maj. J. J. Henderson is still confined to his home. He is improving.

—"The melancholy days" are here and the "wailing winds and naked woods," too.

Mr. and Mrs. Hal Farrell spent the week-end at Mullins, S. C., with relatives of the latter.

—P. S. Dixon, R. V. Griffin and Bud Dixon left for Kinston the first of the week for a fox hunt.

—The county commissioners, the Democratic board that was elected on November 4th, will convene Monday.

—Mrs. R. H. Farrell underwent an operation at St. Leo's hospital, at Greensboro a few days ago, and is doing nicely.

—Dr. and Mrs. Herbert Long moved into their handsome new home on East Harden street the later part of last week.

—Graham public schools dismissed Wednesday afternoon for the Thanksgiving holidays and the teachers living out of town left for their homes to spend the season.

—Dr. W. C. Wicker, pastor of the Graham Christian church, was re-elected president of the Eastern N. C. Christian conference at the session held at Catawba Springs, Wake county, last week.

—The cold wave, coming out of the northwest, arrived here full-fledged last night and this morning is the coldest one here so far this winter. The western part of the state is reported blanketed with snow.

—At the late session of the N. C. conference of the M. E. church Rev. J. L. Rowland was named for the Graham M. E. church, and Rev. J. W. Dimmette, former pastor, has been assigned to the church at Stern.

—Rev. R. P. Ellington has been confined to his home with a slight attack of flu for nearly a week. He was unable to fill his pulpit at the Baptist church last Sunday morning. At this writing he is reported as improving.

—A few scattering snowflakes are reported to have fallen here yesterday morning—we didn't see any. But flurries of snow are reported in other parts of the state besides the snow blanket that spread over the mountains of the western section.

—Services at Graham Christian church next Sunday morning at 11 o'clock. Preaching by the pastor, Dr. W. C. Wicker. Instead of services each Sunday night, as for the past year, services will be held on the 3rd and 5th Sundays at 11 o'clock a. m., until notice is given to the contrary.

—Some of the Graham boys and girls away at school are at home for the Thanksgiving holidays. Among them the following: George Long, Donnell Tate, Coy McAdams and Fred Holt, Chapel Hill; Miss Sara Palmer Rogers, at N. C. C. W.; James Cook, Ralph Stockard and Hal Holt at Oak Ridge.

—Sheriff Rudd was named as defendant in an amercement proceeding at court in Greensboro Monday. It seems that he failed to serve and return an execution issued from Guilford. A judgment nisi for \$100 was signed against him by the judge. Some few weeks this matter was up and the information that at that time was that the sheriff had performed the duty and that a proper note had not been made in the clerk's office in Greensboro.

—Superior court opened here Monday for the trial of criminal cases, with Judge W. A. Devin presiding and W. B. Uinstead, solicitor, prosecuting for the state. R. E. L. Holt of Burlington chosen as foreman of the grand jury and Mit Winingham was appointed jury officer. The docket was larger than usual. Some cases had to be continued on account of sickness of counsel, and the court was able to finish as far as it could go on Wednesday afternoon.

Rip Van Winkle, wrinkled and gray from his twenty years absence, stood before his wife. "Where have you been, you scawlag?" she demanded.

"I was up at the Veterans Bureau waiting in line for my compensation," replied Rip.

"Well, that's different," conceded the Mrs. "How'd you get back so quick?"

PERSONAL

Talbert S. Parker of Goldsboro, is visiting W. R. Harden.

Mrs. George Harden is visiting at her old home at Henderson.

Griffin McClure and N. E. Sykes spent yesterday in High Point.

Mr. F. A. Slate spent the latter part of last week in New York.

Mr. J. S. Cook spent Monday in Winston-Salem on legal business.

Mrs. Clarence Ross and daughter, Elaine, are visiting relatives in Durham.

Miss Elizabeth Harden, teaching at Cornelius, is at home for the holidays.

Miss Nina Quakenbush of Greensboro spent the week-end at her home here.

Misses Catherine Holt and Doloris Moore are at home from N. C. C. W. for the holidays.

Miss Elaine Goode spent the week-end in Winston-Salem with Mrs. Tom Pettergreen.

Mrs. T. R. Harden and son, Reynolds, spent last week-end with relatives at High Point and Colfax.

Hon. J. Elmer Long and Maj. H. P. McLendon of Durham were here Monday on business in the superior court.

Mr. John B. Stratford left Monday on a business trip to Raleigh and other points in the eastern part of the state.

Mrs. W. B. Quakenbush left yesterday for Winston-Salem and Greensboro to spend a few days with relatives.

Mr. and Mrs. C. C. Thompson, Jr., and children of Kernersville, are spending the holidays with Mrs. C. C. Thompson.

Mr. and Mrs. Augustus Parker left yesterday for Anson county to visit at the old home. They are returning this evening.

Mr. and Mrs. L. H. Kernodle of Danville spent Sunday here, with relatives, and also are here today Mrs. Tom Pettigrew.

Miss Elaine Goode left Wednesday afternoon for Scotland Neck to spend the Thanksgiving holidays with her parents, Rev and Mrs. W. E. Goode.

Mrs. L. E. Klutz and daughter, Martha Anne, and Mrs. Henry Haynes of Greensboro spent Tuesday here with Mrs. Klutz's mother, Mrs. J. B. Farrell.

Mrs. W. L. Smith and son, Thomas, of Gibsonville and Mrs. A. L. Henley, of Greensboro, spent the week-end here with their sister, Mrs. W. B. Quakenbush.

Lieut. and Mrs. M. H. Kernodle arrived here yesterday evening from Norfolk, to spend Thanksgiving at the home of the former's parents, Mr. and Mrs. J. D. Kernodle.

Miss Isabel Parker of Raleigh, spent from Saturday till yesterday visiting her brother, Mr. Augustus Parker, and Mrs. Parker at their apartment at Mrs. W. B. Quakenbush's.

FOUST-FARRIOR

Mr. Alvey W. Foust and Miss Salie Farrior motored to the country home of Rev. H. L. Isley last Saturday and were united in holy matrimony by Rev. Mr. Isley. He used the beautiful ceremony of the Methodist Protestant church.

Mrs. Foust was reared in Gibsonville, N. C., and is popular with a large circle of friends. She is connected with the Baptist church of Gibsonville.

Mr. Foust was raised in the southern part of Alamance county, but for the last few years has lived in Burlington, where he has been in business with his brother-in-law, Mr. A. T. Thompson. He is a young man of sterling character. His church affiliation is with the Methodist Protestant church.

This popular young couple will make their home in Burlington.

SWEET POTATO SOFT ROT CONTROLLED WITH HEAT

Proper heating of the curing house is a simple and effective method of preventing the spread of the soft rot fungus and also does away with the dangerous practice of sorting out after the potatoes have been stored.

"When soft rot is observed as indicated by the presence of sour flies, the heat in the curing house should immediately be increased to 90 degrees F.," says Dr. R. F. Poole, plant pathologist at the Agricultural experiment station. "This temperature should be maintained until all flies have disappeared and the diseased potatoes have mummified. The house should be well ventilated during the heating period as this dries out the surface of the sweets adjacent to the infected potatoes and checks the spread of the fungus. After the diseased potatoes are thoroughly dried out they can be left among the healthy sweets for the rest of the storage period."

Mr. Poole states that after the potatoes are once stored and the curing process begun, they should not be moved for any purpose except for immediate sale. When this is done the potatoes are bruised and, owing to the process of curing, the healing is very slow and the infection will spread through this raw tissue. Due to the fungus growth within a few days after storage every potato, even in the

Twenty-third Annual Christmas Seal Sale.

Right after Thanksgiving the Twenty-third Annual Christmas Seal sale of the Tuberculosis association starts. Tuberculosis shows an increase during times of stress and depression, furthermore the disease is no respecter of persons—the high, the low, the rich and the poor, the learned and the unlearned are all subject to its ravages under given circumstances. You are in one or more of these classifications.

The seal this year is unusually attractive, the great layman evangelist, was used as a model for the Santa Claus which appears on it and the benign expression depicted on his face gives force to the "Merry Christmas," "Health to All."

This is a sale in which all can have a part for even the poorest little child can invest a penny seal, and the richest corporations can spend its hundreds of thousands of dollars as did the Metropolitan Life Insurance company.

For every dollar's worth of seals sold, seventy-five cents remains right in the community, and the remaining 25 cents goes to State and National Tuberculosis associations. Children here in Graham who seemed fit subjects for the dread disease were supplied with milk and soup paid for out of the proceeds of last year's Seal sale. No one will deny that the need for the giving of such help is greater this year than it was last.

Let every man, woman and child invest in Seals to the extent his means will allow. Up-to-date business men in the cities have Seals places on every letter that is sent out from their offices from now until Christmas. Surely we have men who will follow their example and become a part of that very potent influence of the times—"What everybody is doing."

Miss Mary E. Parker, Chair.
Mrs. W. A. McAdams, Asst.

J. A. W. THOMPSON

From The Chatham Record

Two or three weeks ago the Record expressed its estimate of the work and character of the late Professor J. A. W. Thompson, and it was exceedingly gratifying to hear that estimate confirmed by scores of his old students at Oakdale and Siler City at the great reunion of students of the Thompson school, held at Siler City last Friday. No more feeling utterances of the appreciation of the big-heartedness and devotion to his fellow man could be so generally expressed by ones who knew another as well as these men and women knew Professor Thompson. The only pity was that the old teacher might not have seen such a reunion before his death. No man in fifty years has done more for education in North Carolina than J. A. W. Thompson. When J. A. Campbell and W. T. Whitsett attribute to him the inspiration for their careers as educators, and scores of others do likewise, then one must add to the sum total of the influence directly brought to bear upon the minds and spirits of two thousand young men and women who attended the Thompson school, the influence of Campbell, Whitsett and others upon swelling hosts of young men and in the case of Campbell's College an influence that should go on for generations, and through the lives and work of the tens of thousands of students of Thompson school men the tide should reach, and has probably already reached every country in the world. The Thompson school was a pioneer among the low-cost academies that sprung up in all sections of North Carolina and prepared the soil for the educational advancement for which credit has already gone to more conspicuous propagandists of public education, whose agitation would have been almost utterly ineffective without the soil preparation of the devoted men and women who gave their very lives to the education of the ambitious youth of the state.

best regulated houses, will be exposed to a greater infection than when first stored and for this reason alone the sweets should never be handled after curing strats, he says.

The early cool fall season together with an abundance of moisture in some areas has greatly favored the parasite and in many cases the infection has been carried into the curing house on potatoes that were affected but did not show any signs of decay, says Dr. Poole. This infection cannot be helped but the spread of the fungus can be checked by proper heating and ventilation, and the exercise of proper precaution in handling, he says.

Thirteen, Four of Theme Negroes, Get Prison Sentences—Seven Go to State Prison and Six to Roads.

After three busy days superior court closed Wednesday afternoon. Among the cases disposed of the following were given prison sentences.

Edgar Taylor, negro, for assault, 12 months on roads. It was he that hit Policeman Hallie Moore in the face about four weeks ago.

Son Andrews, assault, six months on roads. He it was that threw a bottle at Sheriff Stockard's head the night before the election. He gave Stockard a close call.

Clarence Brown and "Deal" Holman, negroes, housebreaking and larceny; the former five years and the later three years in the state's prison.

James Williams, negro, Tom Dixon and Nathan Pike, housebreaking and larceny, 6 months, 18 months and 18 months, respectively on the roads.

Jack Brinsfield and Boyd Parrish, stealing autos, 18 months, and 2 years, respectively, in the state's prison.

R. C. Roberts, confidential employee in the office at Glencoe cotton mills, abstracted \$19,519.76, according to an audit of the books, and was given a 5-year sentence to the penitentiary.

Harvy Barnes, took a borrowed automobile from Burlington to Alabama, where he got stranded. He got 6 months on the roads for the escape.

Jack McCulloch and George Smith, wholesale store robbers and looters of Alamance Hunting lodge, were sent to the penitentiary, the former 2 to 3 years and the latter 7 to 10 years.

USE LARD FOR UDDER AILMENTS OF COWS

Home-made lard as a remedy for ailments in cows, while old-fashioned, answers the same purpose as many high priced lotions and also carries out Governor Gardner's idea in "living-at-home."

"In fact," says Prof. R. H. Ruffner, head of the animal husbandry department at state college, "many dollars could be saved each year by North Carolina farmers if they would use hog lard for these ailments instead of the high priced patent remedies. Hog lard put up in one-pound containers costs from 15 to 25 cents a pound while the patent remedies put up for special purposes, but which are really no better than the lard, sell for 80 cents to \$1.80 per pound."

According to Mr. Ruffner, there is nothing better for garget than two tablespoonsful of turpentine mixed with one pound of lard and applied to the udder three times a day. For hot and tender udders the pure hog lard should be used and applied by hand after each milking. Severe cases of chapped teats may also be cured by the application of pure lard, he states. The application, however, should be thorough and a good coating of the lard left on the udder and teats.

Warts, which frequently appear on the surface of the teats may also be removed with this remedy. These warts are not only unsightly but often become troublesome through irritation. A generous application of pure hog lard smeared over the surface of the warts after each milking will relieve this irritation and will eventually remove the wart.

Mr. Ruffner states that hog lard can also be used very satisfactorily on cuts, scratches, and bruises as well as for the udder troubles. As the majority of dairy farmers in North Carolina make lard at home, it should be used in every way possible, not only for economic reasons but because it aids in the prosperity of the state, he says.

Using the extension service formula for tobacco fertilizer, O. P. Hilburn of Council, Bladen county, produced 1,388 pounds of leaf an acre and sold it for \$313.12. He used the fertilizer at the rate of 900 pounds an acre and says he will use the same formula next season.

SUCCESSFUL HOMEMAKING

By GRACE VIALL GRAY

Self-Rising Flour a Time-Saver to Woman in Kitchen

Within the last few years there has been a steady, ever-increasing interest in solving homemakers' problems. Anything that would cut the working time in the kitchen has met with great favor. All sorts of modern machines, such as the power washing machine, the pressure cooker, the dishwasher and the vacuum cleaner are now recognized equipment for the modern home.

In the matter of foods, considerable progress has been made to lighten woman's work. Possibly no one food material has contributed to greater efficiency in cooking than self-rising flour. There is no doubt but that self-rising flour is a great time saver in cooking. For example, laboratory experiments prove that a cake calling

Self-rising flour makes the mixing and baking of biscuits a simple matter. Hot breads are always welcome on the table and with this efficiency flour, containing the leavening agent and salt properly blended in the right proportions with Soft Wheat, hot biscuits can appear frequently on breakfast, luncheon, or dinner tables.

For three cupsful of flour can be mixed with self-rising flour in eight minutes against the fifteen minutes required for the same cake made of plain flour.

Of course the explanation for this is as follows: Self-rising flour is sift-

ed once only, there is no baking powder to measure, the eggs are added unbeaten, and the cake is mixed as quickly and gently as possible.

In addition to being a time saver, self-rising flour is dependable and this one feature, dependability, is worth its weight in gold to homemakers. To know that each day her products will be perfect and always the same is a godsend to every one of us who prepare three meals a day, 365 days each year.

In self-rising flour, a trained chemist has prepared the proper proportion of leavening, which is baking powder, and flour in a chemical laboratory, with the greatest of accuracy and with accurate weights and measures.

So the chemist in giving us flour blended with baking powder in the right proportion assures us of that accuracy that we cannot always get. In using self-rising flour, sift flour before measuring. Never add soda or baking powder.

The following recipes are delicious, and illustrates the efficiency of self-rising flour:

Drop Cookies (50 Cookies).
4 cups sifted self-rising flour
1 cup milk
1/2 cup fat
2 eggs
1 1/2 cups sugar
2 tsp. flavoring

Place fat in a warm place until it becomes soft, though not melted. Combine with sugar. Stir in eggs. Beat well. Add alternately the flour and milk. Add flavoring. Drop small portions of the mixture on a greased baking sheet and bake in a moderately hot oven (375 degrees F.).

Doughnuts (40 Doughnuts).
4 1/2 cups sifted self-rising flour
1 cup milk
1 cup sugar
1/2 tsp. cinnamon
1/2 tsp. nutmeg
1/2 cup melted fat
2 cups sugar
2 tsp. vanilla

Combine melted fat and sugar. Stir in eggs. Add flour and milk alternately; add flavorings. Roll out the dough about one-third inch thick without handling it any more than necessary. Cut out the doughnuts and fry in deep fat hot enough to make a doughnut rise to the surface quickly and to brown each side in about one minute (about 375 degrees F.).

Under and by virtue of the power and authority contained in a certain mortgage deed executed and delivered by Hub Milling Company to Mrs. Annie Mitchell, Executrix of the Last Will and Testament of L. D. Rippey, and Mrs. L. D. Rippey, and duly recorded in the office of the Register of Deeds of Alamance County in Book of Mortgage Deeds No. 97, pages 99 to 101, default having been made in the payment at maturity of the note and interest thereby secured, and the holder of said note having demanded sale of the property hereinafter and in said mortgage deed described, the undersigned mortgagees, will on

INCREASE ACREAGE TO CERTIFIED SEED

Growers of purebred seed in North Carolina have more than doubled their production during the past year not only in acreage but in number of bushels produced. "Practically 80,000 bushels of crop seed have passed the field inspection this year," says G. K. Middleton, who made the inspection for the North Carolina Crop Improvement association. "This is about double the amount that was handled last year in all classes as there were only 42,626 bushels handled during that year. Of this amount 23,000 bushels were in the approved or lowest classification."

All seed to be eligible for sale under the authority of this association must pass the field inspection and must also be inspected in the bin, states Mr. Middleton. The seed are then classified as registered, certified, or approved. Due to a favorable harvest season, it is expected that a larger per centage of the seed this year will pass the germination and purity tests and that the final volume of certified seed will more than double that produced last year, he says.

According to Mr. Middleton, an increase in all crops has been made with the exception of Irish potatoes. A late frost in the heavy producing areas of this crop did considerable damage and the summer drought further reduced the yield. A normal season, however, would have shown a nice increase in the crop.

Crops showing the greatest increase were wheat with an increase over last year of 5,410 bushels, oats with an increase of 7,185 bushels, and cotton with an increase of 14,224 bushels. Probably the largest increase was made by lespeleza which has 6,373 bushels inspected this year as compared with on 200 bushels last year. With the exception of peanuts and Irish potatoes every crop showed an increase in purebred seed of over two hundred per cent, says Mr. Middleton.

FRIDAY, DEC. 19th, 1930, at 12:00 o'clock, noon,

offer for sale at public auction to the highest bidder for cash at the courthouse door of Alamance County, at Graham, N. C., the following real estate, to-wit:

Adjoining the lands of George Sutton and others, bounded as follows: Beginning at a birch tree on S. E. bank of Haw River, corner with said Sutton; running thence S. 12.10° E. 3.60 chs. to an iron bolt, corner with said Sutton; thence S. 78 1/2° W. 224 1/2 feet to an iron bar on E. side of said river, corner with said Sutton; thence up said river as it meanders N. 17° E. 155 feet, N. 41° E. 185 feet to the beginning, containing 77-100 of an acre, more or less, upon which is located the Mill and machinery commonly known as Hub Mill.

Increased bids may be placed as provided by law, only within ten days from date of sale.
