Six big navy seaplanes hopped off from San Francisco yesterday for Honolulu, a non-stop flight of 2,400 miles. Rather perilous undertaking, but it is hoped will be a success.

Business continues to improve, a survey of the country over shows. During the month of December business was marked in many lines—better than for several years past. Cotton is higher—for July 11.14. Wheat gained nearly two cents yesterday. Tobacco prices have been good. All these help, and the country is gradually getting on higher ground. Everything cannot be done in a day, a month, or a single year, but hope is returning and dread is vanishing.

Charlotte people got right much "het up" the first of last week when brought to law for failure to provide 1934 license tags for their automobiles. A sort of indignation meeting was held and resolutions were passed. About 160 years ago Mecklenburgers held a protest meeting and passed the "Mecklenburg Declaration of Independence" and some of that same spirit seems to have trickled down through the generations. But this latter demonstration had not the same justification as the former. Auto owners were warned there would be no days of grace. Even if there had been fully ten days, on the 11th day half of the delinquents, no doubt, would have been without the necessary license plate. Hence it is doubted that an extension of time would have helped much.

United Dry Forces to Hold Conference
In Greensboro January 16th.

The United Dry Forces of North Carolina will assemble in a State-wide Conference at Greensboro, on January 16th, for the purpose of perfecting a permanent organization to continue in North Carolina a constructive program of education in favor of temperance and against the evils of alcohol. The county and other local units of the organization that fought to keep North Carolina dry in the recent election desire to conserve the benefits of the recent campaign and to continue their efforts to keep legalized liquor out of North Carolina, and to improve enforcement of our present prohibition laws. Many local units have already become permanent, and it is anticipated that the Greensboro meeting on January 16th will set up a permanent State-wide organization. All persons in North Carolina interested in the promotion of temperance are invited to attend the Conference, and all members of the Central Committee, all candidates, county chairman and managers of the United Dry Forces are urged to be present.

Timely Farm Questions
Answered At State College

Question—What benefit payments are provided for burley tobacco growers under the reduction contract?

Answer—For each acre taken out of production a rental payment of \$20.00 an acre will be made. Two adjustment payments will also be made. The first will be not less than 10 percent of the net sale value of the 1933 crop provided this is reduced 3-1-3 percent in 1931 or not less than 15 percent of the net value of the 1933 crop if it is reduced 50 percent in 1931. The second adjustment payment will be not less than 15 percent of the net sale value of the 1934 crop for a 33 1-3 reduction and 35 percent of the net sale value for a 50 percent reduction.

Question—What causes my dairy cows to eat dirt or chew on wood and bones?

Answer—This habit shows that the animal is not getting the right feed and that the ration is deficient in mineral matter. This element is supplied by legume hays, such as cow pea, soybean clover, and alfalfa when grown on lands not deficient in lime and by a grain ration that contains as much as 30 percent of wheat bran, cottonseed meal and soybean meal. In addition to this ration about two pounds of a mineral mixture containing equal parts of finely ground limestone and steamed bone meal should be added to each 100 pounds of concentrate. Cows and young cattle should have access to a simple mixture composed of one part of salt to four parts of steamed bone meal.

Question—Will the feeding of milk in clabber form to the poultry flock cause stomach trouble?

Answer—The feeding of clabbered milk in pans or shallow receptacles, unless cleaned and scalded daily, will cause loose, yellowish voidings. Where the clabber is fed it is best to have two sets of drinking vessels so that one may be thoroughly cleaned each day. The best way, however, is to feed the milk before it clabbers which will eliminate any accumulation of the bacteria.

Question—When should heifers be bred for best calf production?

Answer—No arbitrary age can be set for breeding heifers as this is determined by the maturity and breed of each animal. Jersey and Guernsey heifers, if properly grown out, should be bred to freshen from 24 to 30 months of age. The Ayrshire and Holstein heifers should be bred so as to freshen from 27 to 32 months of age. Heifers that are fed liberal grain rations in addition to the roughage will mature more quickly than those receiving a limited grain ration and this must be considered when breeding.

At a meeting of early Irish potato growers at Washington, Beaufort county, last week an agreement was signed to reduce and, as far as possible, to prevent an increase in acreage to the crop this season.
