Gather Vegetables at Their Best

Do you know when to pick your sweet corn at its sweetest and juiclest? When your snap beans are snappiest? Your Swiss chard leaves most tender and the stems at their crispest?

Every vegetable in the Victory Garden has best stages for eating, before and after which their goodness is considerably less than one hundred per cent

Snap beans should be picked before the seeds inside the pods have formed. White. Spongy looking heads are past If some of them get past that stage their prime. before you can use them, let the beans flavor nor substance; too old, it is grow to full size and use them as green mealy and usually tough. It's exactly mealy and usually tough. shells. Peas should be picked when right when ears are well filled and the pods are plump and bright green.

When pea pods are somewhat wrinkled of a thumb nail.

continue to grow, always cutting before they are grown to full size.

they are grown to full size.

Be sure to cut sprouting broccoli while the buds are green and tightly closed. When they open and begin to show a hint of yellow, they have lost their fresh new goodness. Cauliflower, cousin to sprouting broccoli, should have heads that are firm and creamy for flavor unsurpassed.

North Carolina—

The diversity of soils and crops from the mountains to the oceans affords the state the golden opportunity of a well-balanced agri-culture and at the same time poses numerous problems of pro-duction, marketing and processing that require the best in genuity of research, teaching and extension, Essentially, North Carolina is three States in one. The Coastal plains with its sandy soils producing tobacco, cotton, peanuts, soybeans, corn, Irish potatoes, sweet potatoes, small

fruits and vegetables, hogs and v-he Piedmont with its rolling clay lands producing tobacco, cotton, corn, small grains, espedeza hay, dairy cattle, poultry, fruits and sweet potatoes the mountains with its fertile valleys and mountainsides, producing corn hay, fruits, regetables, potatoes, beef and dairy cattle, sheep and poultry-together they make a highly diversified North Carolina. Such a diversification requires the services of many specialists in the Agricultural Extension Divison of State College and it is the purpose of the Agricultural Foundation, Inc., to make it possible to bring to North Carolina the best specialists in each brauch of agriculture.

Lime is badly needed on most farm and pasture lands in North If you have property you want sold, get in touch with us.

when pea pods are somewhat withkied and show streaks of white, the peas are too old for enjoyable eating.

Cut the outer leaves of Swiss chard when they are no more than ten or twelve inches long. Let the inner ones that they are no more than ten or twelve inches long. Let the inner ones fully grown under cool moist constitute to grow always cutting before
