Restore Pan

Though no treatment will make a badly burned pan like new again, many a pan that looks hopeless may be restored to use if proper care is taken in cleaning. First, let the pan cool gradually. Never pour cold water into a hot, dry pan. This is likely to make the metal buckle and leave an unsteady pan. When the pan has cooled, fill it half full of cold water and heat the water gradually to boiling. Baking soda added to the water may help soften the burned material. After heating scrape out loosened material, add more water to the pan, and repeat the heating process as long as necessary.

Bonds Over America

CAESAR RODNEY  
After a ride that rivals Paul Revere's, Caesar Rodney broke a tie vote in Delaware's delegation to the Continental Congress at Philadelphia on Lee's resolution for independence. Late on July 1, 1776, he arrived home after quelling a revolt in Sussex County where he received an urgent summons to Philadelphia. Mounting a horse, he rode through the night and arrived in the northern city in time to place Delaware with the other colonies backing the resolution. That spirit of service animates Delaware people in buying War Bonds today to insure liberty for future generations.

Rotary Meeting

The Rotary club has raised \$500 toward its \$1500 goal for an all-round athletic program for Graham public schools. Bert McIntyre is chairmann of the physical education program of the club. This amount was solicited entirely from members of the club.

The drive for an athletic fund, which started several weeks ago, is for the purpose of furnishing the necessary funds to allow Graham school to be represented by a football team and a complete physical education program. School authorities here state that they have long needed a well-rounded program of physical education, but have been handicapped by the lack of funds.

Plans call for the local Rotarians to pay whomever is procured for the head coaching duties a substantial supplement in addition to what salary he would derive from the state.

Behind Your Bonds Lies the Might of America

MEAT  
The huge plants in Chicago's "Packing Town" every day pour dollars into the national treasury to back your War Bonds. John B. Sherman opened the first centralized stockyards, Bull's Head yards, in 1868. In 1868 he organized the Union Stockyard and Transit Company. The growth of this business developed rapidly with the development of refrigerator cars and improved organization of the big packing firms. The city's chief industry in the value of its products, it processes annually 12 million animals valued at \$250,000,000.

Kitchen And Aluminum Ware

The prospect that long-scarce aluminum pots and pans will soon be available in quantity and at 1942 prices was held out last week by Theodore S. Johnson, OPA director.

"Shoppers should remember, however, that kitchen and aluminum ware have been off merchants' shelves for a long time, and there is a large demand for them."

For many months stocks will not be at the point they were before the war.

"We are concerned with seeing that the consumers are protected against unnecessary price increases in the reconversion period," Johnson declared.

SAYS SECRETARY OF AGRICULTURE:

Despite Victory Used Fat Saving Must Go On!

Every woman in America should know that our country continues to face a serious fat shortage. And victory over Japan won't solve the problem immediately. We must keep on saving used fats in our kitchens!

If you have any thought that saving used fats is one of those wartime chores we can drop, now that Victory is here, please consider these facts and tell them to your neighbors.

America still needs salvaged fats. Not even at the peak of our war effort, when fats were required for mountains of shells and bombs and medicines, in addition to the ever-present need for soap, were our needs for salvaging fat greater than now. Our stocks have been drained by four long years of war, and there isn't enough on hand to meet all requirements.

Don't let "Victory psychology" blind you to this national need! If housewives stop saving fats now, the shortage will become even more critical.

Don't let a single drop of used fats go to waste! Little trimmings of fat left on plates, even the skimmings of soups and gravies are important. It is the consistent saving of these small amounts that counts.

Don't turn in fats that can be re-used! But some fats, such as those rendered from lamb and mutton, are not suitable for re-use. Put them immediately in the salvage can. And, with other fats, after you've got all cooking good out of them, there is always a little left. No matter how little it is, save it.

Your butcher will still give you 4c and 2 red points for every pound you turn in. Save consistently — save every drop you can — every day — until Uncle Sam says the job is done.
