Goat Farming Offers Profitable Sideline

Easy to Feed and to Handle on Small Space

While there are nearly six million goats in the United States, less than 500,000 of them are milch goats. Milch goats offer a source of revenue to the small diversified farmer. Practically immune to disease and costing less than \$3 a month to feed in winter, their addition to a project is worth consideration.

A cup of grain, handful of hay and a pinch of salt, together with a small lot for pasture, should produce 1,500 quarts of milk a year—milk that is in great demand by hospitals. Free from TB, with about twice as much iron as cow's milk, a naturally homogenized and easily digested goat's milk offers considerable opportunity to the small or large farmer.

A large milch goat will weigh from 130 to 150 pounds, and will produce three times more milk than a cow for her size. Good cottage, American and other cheese may be produced from goat's milk as well as a quality butter.

The most popular breeds at present are Toggengburg, Saamen, Rock Alpine and Nubian. Goat's meat,

Goats are becoming big business in American farming. or Chevan, is a healthy, tasty food. The goat has four stomachs, usually has on hand at least one day's food requirements, and the missing of a meal is often beneficial. Like any other animal, goats will respond to proper feeding practices. Contrary to public belief, goats do not eat tin cans. Female goats are free from "goat odor." It is not recommended, however, that the male be kept near the house, or in cities.

Ever Try Making Cough Syrup In Your Kitchen?

Quick Relief, No Cooking, Easy! If you've never tried mixing your own cough medicine, you've missed a lot. It's no trouble—needs no cooking—and gives you about four times as much cough syrup for your money. You'll say it beats anything you ever tried for coughs due to colds. And here's how it's done:—

Make a plain syrup by stirring 2 cups of granulated sugar and one cup of water a few moments, until it is dissolved. Or you can use corn syrup or liquid honey, instead of sugar syrup. Get 2½ ounces of Pinex from your druggist. Put this into a pint bottle and fill up with your syrup. This makes a pint—a family supply. Tastes like and never spoils. Children love it. And as for results, you've never seen anything better. It goes right to work on the cough, loosening the phlegm, soothing the irritation, and helping clear the air passages. You will like it for its results, and not merely for the money it saves.

Pinex is a special compound of proven ingredients, in concentrated form, a most reliable soothing agent for throat and bronchial irritations. Money refunded if it doesn't please you in every way.—Adv.

OLDER PEOPLE! Many Doctors Advise

HIGH ENERGY TONIC

Older people! If you haven't the stamper you should—because your diet lacks the natural A&D Vitamins and energy-building natural oils you need—you'll find good-tasting Scott's Emulsion helps build up your energy and resistance to colds. See this wonderful difference—buy Scott's at your druggist today!

SCOTT'S EMULSION

WNU-4 41-45

COLD PREPARATIONS LIQUID, TABLETS, SALVE, NOSE DROPS USE ONLY AS DIRECTED

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Call your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION

for Coughs, Chest Colds, Bronchitis

Improved Machinery Feed Crop Blower

This crop blower elevates chopped hay or cut straw, silage, threshed grains, shavings or other bedding materials to any desired height with a minimum of labor. The blower shown above, manufactured by Papec Machine company, Shortsville, N. Y., will put away a big load in short order with little or no hand labor.

Artificial Chicken

Insemination Tested

Scarcity of quality roosters of some desirable characteristic can be overcome by the application of artificial insemination. As one rooster can service 70 hens a week by this method of reproduction, it becomes of commercial importance within the industry.

Artificial insemination is also proving valuable in hybrid and cross breeding and in what would otherwise be forced or individual matings, or for hens kept in laying cages.

Other advantages are that older males may be used, new blood introduced from a distance, rapid flock improvement made and that much of the disease danger is eliminated.

KEEP OUT

FIRST STEP TOWARD INCREASED LEGUME SEED HARVEST IS TO KEEP ANIMALS FROM GRADING OF THE FIELDS AFTER THE FIRST CROP HAS BEEN OUT FOR HARVEST

VERONICA LAKE

Star of "The Hour Before the Dawn," a Paramount picture, is one of the many well-groomed, well-informed Hollywood stars who use Calox Tooth Powder.
