

SWAT THE FLY AND SWAT THE MAN WHO PERMITS IT TO BREED

Here are the mathematics of our greatest menace: The fly + the milk + the baby = the grave. The man who willfully permits the flies to breed on his property by not removing or screening all filth should be looked upon as a destroyer of human life and dealt with accordingly.

THE TONGUE OF TREACHERY

The fly lives and thrives on the bounty of mankind. He repays kindness by bringing death and disease into our homes. Man should be the fly's most dangerous and persistent natural enemy.

Flies in the dining room precede the doctor in the sickroom.

HOW TO KILL FLIES QUICKLY AND CHEAPLY

Professor R. I. Smith, entomologist, North Carolina agricultural station, says: "Formalin is a very successful poison for flies in spite of many reports to the contrary. I have recently used it extensively with excellent results. The method that I have found most successful is the use of formalin in milk with the following proportions: 'One ounce (two tablespoonfuls) of formalin; sixteen ounces (one pint) of equal parts milk and water.

"In this proportion the mixture seems to attract the flies much better than when used in sweetened water. The mixture should be exposed in shallow plates. A piece of bread in the middle of the plate furnishes more space for the flies to alight and feed and in this way serves to attract a greater number of them.

"I first used this poison in a milk room where the flies were very numerous and poisoned over 5,000 flies in less than twenty-four hours on several occasions. Over a pint of flies were swept up in this room each time the poison was used.

"Another experiment was used in a large calf barn where the flies were numerous. I exposed six ordinary sized plates of the formalin poison mixture and killed about 40,000 (four quarts of flies) between 12 o'clock noon and 8 the next morning. This is only an illustration of what can be done with formalin around stables where flies are breeding. I could cite a number of cases where the formalin poison mixture has been used in unscreened kitchens and dining rooms and resulted in killing practically all the flies.

"A good place to use this formalin is on the front and back porches, where flies are frequently numerous and waiting to enter whenever the doors are opened."

PLAN OF CAMPAIGN FOR FLY FIGHTERS.

- Keep the house free from flies. Every fly should be considered a possible disease carrier and should be destroyed.
- Keep the windows of the house, especially the kitchen windows, carefully screened during the spring, summer and autumn.
- Protect children from exposure to flies and do not allow nursing bottles to be exposed.
- Protect milk and foodstuffs from contact with flies.
- Keep the garbage outside of the house carefully covered.
- Abolish open drains near dwelling places.

HOW TO FIGHT THE FLY IN THIS TOWN

First.—Educational work should be begun at once in schools, women's clubs and other civic organizations, because if you wait until the flies appear by the million while you are doing organization work that ought to have been done during the cold weather. This committee, as in former years, will co-operate with local committees, furnishing literature and answering questions as to methods of individual campaigns, etc.

Second.—In your movements for passing of general cleanup and anti-fly ordinances first secure the interest of the state health department. If you find difficulty in doing this by mere force of suggestion, employ other legitimate means of stirring it to action—petitions from local or state organizations, boards of trade, women's clubs, town improvement societies, etc. If the head of the state health service is not cordially co-operating with you he can be shamed into it.

Third.—Employ similar tactics, if necessary, with the health authorities, aldermen and other officials of your city or town.

Fourth.—Get ordinances passed (state if possible, local at any rate) for the screening of foodstuffs, the chemical treatment and removal of manure, etc., but do not think that because you have an ordinance it will enforce itself. Eternal vigilance is the price of freedom from filth and flies. Probably even the most energetic and sympathetic health officer will be unable with the force of inspectors at his command to discover all the violations of the ordinance. You must help him by volunteer inspection and reports. If then he is lukewarm in the prosecution of offenders make his position uncomfortable. If the magistrates refuse to impose fines for proved violations make it uncomfortable for them too. It's all very simple if you are in earnest.

Fifth.—Colorado and Texas have instituted the custom of state wide "cleanup days." Induce the governor of your state by proclamation to set aside a day for such a purpose, and if he cannot be induced to do so—but he probably can if proper representations are made to him—at least get your mayor to proclaim a local "cleanup day."

Sixth.—If you must have "fly swatting" contests to stimulate interest in your local campaign let them be held as early in the spring as possible, while there are comparatively few flies. If you could find and kill all the spring flies, as of course you cannot, there would be none to trouble you in the summer.

Seventh.—Be careful to brush up any flies that may be lying around with their feet up in the air looking as if they were dead; they may be "playing possum." The only safe way is to burn them. Do not throw them out or into the garbage can, as they will become active as soon as the temperature rises.

A fly in the milk may mean a baby in the grave.

JEKYLL AND HYDE

The fly enters your home as a harmless insect. But once inside he becomes transformed into a monster of horrible proportions, carrying disease to the members of your family. One fly carries over 6,000,000 germs about with it.

A screen in time saves many lives.

The KITCHEN CABINET

TO BE as good as our fathers we must be better. Imitation is discipleship. When some one sent a cracked plate to China to have a set made, every plate in the new set had a crack in it. —Wendell Phillips.

SOME WINTER DISHES.

Cut up two chickens and remove all the large bones, fry in a little hot fat for five minutes with a sliced onion. Use a slice of salt pork for the fat, finely cut. Put the chicken into a deep saucepan with just enough boiling water to cover; cook until tender, drain and arrange in a baking dish. Beat the yolks of three eggs, add a cup of milk, a tablespoonful of butter, salt and cayenne, and flour to make a stiff batter. Fold in the whites of the eggs, beaten stiff. Pour over the chicken and bake until brown; thicken the stock in the pan with flour, and a few mushrooms or oysters, and this gravy will be a great addition to the chicken pudding.

A few slices of nice salt pork dipped in corn meal or flour and fried brown and crisp are good, served with baked potatoes and a gravy made with milk and the fat left in the pan. **Baked Corn and Cheese.**—Take two cups of corn, mix with a slightly beaten egg, two tablespoonfuls of melted butter, a cup of milk and salt and cayenne pepper to taste. Put into a well buttered baking dish, cover with grated cheese and fine bread crumbs, dot with bits of butter and bake until brown.

Sponge Cake With Jelly.—Cut out the center of a round sponge cake, leaving the sides and bottom thick enough to hold a pint of jelly. Prepare an orange or lemon jelly, with bits of nuts and fruit. If liked, turn into the cake when it begins to get thick. Set on ice to mold and serve with sweetened whipped cream spread over the top.

Shapleigh Cheese.—Cut stale bread in half-inch slices, spread with butter and cut in finger-sized pieces. Stand the pieces close together around the edge of the baking dish and pour in the following mixture: Beat two eggs and add a cup of thin cream, a tablespoonful of butter, one teaspoonful of salt, a pinch of mustard and cayenne and a half pound of soft, mild cheese cut in small pieces. Bake thirty-five minutes.

Nellie Maxwell.

Same Speech Thirteen Years. M. D. Andrimont, a member of the Belgian chamber, celebrated for his speeches on questions of the consular service, was appealing eloquently for a reorganization of the service when the foreign minister said: "That is the same speech you made last year." "Just so," replied the deputy calmly. "I have made it annually, word for word for thirteen years. Nobody noticed it before."

Pains in the Stomach

If you continually complain of pains in the stomach, your liver or your kidneys are out of order. Neglect may lead to dropsy, kidney trouble, diabetes or Bright's disease. Thousands recommend Electric Bitters as the very best stomach and kidney medicine made. H. T. Alston, of Raleigh, N. C., who suffered with pain in the stomach and back, writes: "My kidneys were deranged and my liver did not work right. I suffered much, but Electric Bitters was recommended and I improved from the first dose. I now feel like a new man." It will improve you, too. Only 50¢ and \$1.00. Recommended by Aycock Drug Co.

NOTICE

Having qualified as administratrix of Peter Collins, deceased, late of Franklin county, this is to notify all persons holding claims against his estate to present the same to the undersigned on or before March 31st, 1914, or this notice will be plead in bar of their recovery. Persons owing said estate will make immediate payment. This March 31st, 1914. Mrs. MARYE GUYTON, Administratrix.
