Unmarried men! take an insurance policy with us for the protection and for the building of your Estate. You can never tell what may or might happen. Married men, both old and young, should carry insurance, first because they owe the protection to their family; second, because it is a necessity requisite in all branches of business. When you are buying land if you haven't covered the liability by an equal amount in insurance, your family would have the responsibility of a great burden should you die before the debt was paid.

We shall be glad to call on you at any time, whether at your house or any place where you will favor us with a chance to show you our policies.

Call or write us at Louisburg, our office, over P. S. & K. K. Allen's store.
