The Velvet Bean
 Washington, D. C., Oct. 17.—"In the velvet bean the South has a new feed crop of high value," said Fairfax Harrison, president of the Southern Railway System, today.
 "This bean promises to be one of the great agricultural assets of the South. The northern limit of its successful production is substantially the same as the northern limit of the cotton belt. It is grown in corn, increasing the yield of corn as it is a great nitrogen gatherer, and the cost of production is so small that it has been called 'the bean of the future' by the farmers of the South. In former years it has been grown extensively enough to demonstrate its great economic value, and this year its production has spread over almost the entire cotton belt, at least 5,000,000 acres being grown in the States served by the Southern Railway System.
 "As it is practically a new crop, there has been little exact scientific study of its feeding value at Agricultural Experiment Stations, but its practical use by feeders and dairymen has demonstrated that it gives results that compare favorably with those obtained from other protein feeds. The most economical way of feeding is to gather the corn and then turn the cattle and hogs into the field to feed on the beans, vines and corn stalks. If cattle alone are fed in this way many of the beans will be knocked to the ground, trampled and lost, but hogs will get all of these. It has been said that two acres of this pasture will carry four or five head of cattle through to spring grass, and in the spring the farmer has a fine lot of manure and vegetable matter to turn under. The beans may be gathered and fed to cattle in the pod, soaking the pods twenty-four hours before feeding. 'Velvet bean meal,' made by grinding the beans alone, or 'velvet bean feed,' made by grinding the beans and pods together may be fed. The latter is recommended as being the better way of feeding where it is impracticable to pasture the crop. About fifteen pounds a day is the maximum feed for a steer or dairy cow. An especially fine feed is made by mixing ground beans and hulls with about one-third corn and cob meal. This is highly recommended for dairy cows. When velvet beans are fed the amount of silage or hay may be decreased. If ground beans and pods are fed to hogs they should be ground

very fine. Velvet beans are not relished by horses or mules.
 "The ground beans and hulls contain 17.1 per cent of protein and the ground beans alone 29.8 per cent.
 "Mills for grinding the beans and hulls are being put in all over the territory where they are produced and the feed will be available for stockmen and dairymen in all parts of the United States."
COULD ACID STOMACH, BURNING HEARTBURN, GAS OR INDIGESTION
 The famous "Pape's Diapepsin" reaches the stomach all distress goes.
 Do some foods you eat hit back—some good, but work badly; ferment into acids and cause a sick, sour gassy stomach. Now Mr. or Mrs. Diapepsin do this down: Pape's Diapepsin helps neutralize the excessive acids in the stomach so your food won't sour and upset you. There never was anything so safely, quick, so certainly effective. No difference how badly your stomach is upset you usually get happy relief in five minutes, but what pleases you most is that it helps to regulate your stomach so you can eat your favorite foods without fear.
 Most remedies give you relief sometimes—they are slow, but not sure. "Pape's Diapepsin" is positive in neutralizing the acidity, so the misery never come back very quickly.
 You feel different as soon as "Pape's Diapepsin" comes in contact with the stomach—distress just vanishes—your stomach gets sweet, no gases, no belching, no eructations of undigested food, your head clears and you feel fine.
 Go now, make the best investment you ever made, by getting a fifty-cent case of Pape's Diapepsin from any drug store. You realize in five minutes how needless it is to suffer indigestion, dyspepsia, or any stomach disorder, due to acid fermentation.
 One usually gets hurt more during a friendly scuffle than in a real battle.

GREAT CALORIC BREADS YOU DEARLY LOVE
 Stop eating Calorics now before it snatches you! It's horrible!
 You're illions, slinging, complaining and believe you need vitamins, dangerous caloric to start your liver and clean your bowels.
 Here's my guarantee: Ask your Druggist for a 50-cent bottle of Deaton's Liver Tonic and take a spoonful tonight. If it doesn't start your liver and straighten you right up better than caloric without griping or making you sick I want you to go back to the store and get your money.
 Take caloric today and tomorrow you will feel weak and sick and nauseated. Don't lose a day's work. Take a spoonful of harmless, vegetable Deaton's Liver Tonic tonight and wake up feeling great. It's perfectly harmless, so give it to your children any time. It can't salivate, so let them eat anything afterwards.
