

FATE?

By MINNIE M. TOWNSEND.

"Do you really believe that, Dave?"

the hot beach sand, turned toward his companion a little bit impatiently. "Sure. If two persons are meant for each other they will come together. Clothes and line looks have nothing to do with it. What is to be, will be."

MANY FAIRIES IN GREEN ISLE

Idea That the Gnomes Have Disappeared Is Declared to Be Altogether Erroneous.

There still are fairies in Ireland, declares the Ulster Folklore, which explains by saying: To many, perhaps, it is a strange thing to hear, of course, anyone who has never taken any interest in the matter at all knows that in the days gone by there were plenty of them from one end of the green isle to the other—are not their old haunts, the thorn bushes, their paths, forts, caves and souterrains still to be found in every corner of Ireland just as they have existed since time out of mind?

But it has been the general belief that the fairies themselves long ago, in one fashion or another, had forsaken or been driven from their secret places, the last being placed in the middle of the nineteenth century—the night of the big wind in fact when these were all supposed to have been blown into the sea with the exception of a few that landed in Scotland.

The origin of that belief, however, has been scientifically ascertained in a series of investigations pursued by Miss Isabel Andrews, F. R. A. S., of London, who has shown that the belief is entirely correct. The fairies were driven from their secret places by the great wind of 1839, which was the result of a volcanic eruption in Iceland.
