

ATLAS PORTLAND CEMENT

PERMANENCE means ECONOMY.
Permanent fencing protects both stock and crops, and reduces labor. Permanent feeding floors save food and save stock health. Farming, like any other industry, shows greatest profits from proper equipment.

Your local building material dealer deserves much of the credit for modern farm construction. His capital, tied up in comparatively slow moving building materials, has kept on hand the means of community improvement.

With such an investment on his part he naturally has selected such materials as he could safely depend on. For concrete construction, whether fence posts, feeding floors or silos, he is apt to recommend Atlas Portland Cement, "the Standard by which all other makes are measured."

MR. OWNER OF COUNTRY PROPERTY

Have you ever carried fire insurance on your buildings and allowed it to lapse?

Do you remember how much more comfortably you slept while your home was insured and how much easier you felt those hot, dry summer days when you were away from home?

WHY WAS IT.

It was because you knew that if your home should be burned you would have the money to rebuild it.

Let us insure you that comfortable feeling by insuring your home against fire, wind and lightning.

No Worms in a Healthy Child

All children troubled with worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROW'S FASTEST CHILD FOOD given regularly for a few days will reach the blood, break down the worms, and act as a General Strengthening Tonic to the whole system. Worms will then come off or digest the worms, and the child will be in perfect health. Pleasant to take. 60c per bottle.
