### LIKE THE PROVERBIAL CIRCUS

Raleigh, Jan. 27.—Rainy weather has ceased to be the bugaboo of the North Carolina Cotton Growers Co-operative Association. Like the proverbial circus, the big Tar Heel co-operative continues bright or shine.

Six weeks of cloudy days put all sorts of kinks into the grading department, but the sunshine since Christmas has given opportunity for the classers to catch up. No cotton is graded when Old Sol hides his face. Uniformity of grades is one of the main assets of the association, it is explained, and all cotton is graded in the sunshine.

JUST as the force of graders was doubled to take care of the big rush of cotton, the rain set in, and many weary days were spent by the cotton association officials while they waited. Cotton couldn't be sold and negotiable warehouse receipts couldn't be completed without grades. The grading end is an important link in the association's business chain.

While the 130,000 bales of cotton already graded shows on the average to be above ordinary, Chief Classifier P. H. Hart says there is plenty of room for improvement in the quality of cotton grown in North Carolina.

The Association is putting on a drive this month for One-Variety cotton communities. It is proposed to get 25,000 growers in certain counties or sections to get the same kind of improved seed. This will insure better grades and uniformity of grade, which is considered fully as important.

### BOLL WEEVIL INJURY THIS YEAR

Raleigh, Jan. 31.—All of the area north of a line drawn through from Hickory in Catawba County to Salisbury in Rowan, across to Raleigh in Wake and to Washington and Belhaven in Beaufort and straight through Hyde County to the coast was first invaded by boll weevil in 1922 and is due for only light injury this year, says Franklin Sherman of the Division of Entomology, N. C. Extension Service. Mr. Sherman says that the injury will be heavier near the line and to the eastward but it will be in 1924 before this section will be seriously hurt and that the cotton grower has this one other chance to make nearly a full crop of cotton if he uses good cultural methods and picks up the fallen squares.

The heavy damage of 1923 will be south of the line mentioned. West of a line from Monroe to Raleigh the cotton farmers will lose from 10 to 20 per cent of their crop, with heavier loss to the south. Here good cultural methods, picking squares once each week to the end of July and use of the dust poison in the more heavily infested areas should be practiced.

West of a line from Lumberton to Greenville, the injury will probably run between 20 to 30 per cent, and east of this line, the injury will be from 30 to 50 per cent. On the west side, good cultural methods should be practiced to the fullest extent and the dust method used. East of this line, though the farmers do not depend so greatly on cotton, they should make still further reductions in acreage and fight the weevil for the remaining acreage by using the dust method, better seed, better cultivation and fertilization and pick the fallen squares and burn them.

Mr. Sherman will be glad to furnish information about the boll weevil to any farmer who will write him at Raleigh or who will call at his office. He states that now is the time to make preparation for fighting the pest and the farmer should inform himself correctly about the best methods.

### The Profitable Way to Keep Hens Only One Feed to Buy

Many people claim that it costs more to feed poultry than they return in meat and eggs. This is largely due to the use of an unbalanced feed. Grains and scratch feeds made from grains are not a balanced feed.

No flock, large or small, will ever pay a profit on an unbalanced feed. While on a balanced feed, which costs but little more, the same fowls will furnish enough eggs and meat to liberally reward their owners.

Using two different feeds—one a scratch made of grains—the other a mash of concentrates, was the usual way of balancing the rations, but it is too troublesome for the average person. It doesn't balance the ration for every hen, consequently it is used by only a few. The two-in-one method, a mash and scratch all in one, a feed that can be fed like wheat or corn, is the real solution for the average man. Gubernut Laying Feed is just such a feed—a perfectly balanced feed. Many users call it a real discovery. The longer you use it, the better you like it—those who have fed it constantly for a year or more are its greatest boosters. Ask the person who has fed it, or order a sack and be convinced. Money back if not satisfied. Gubernut Laying Feed for sale by McKinnis Brothers, Louisburg, N. C.

# New Spring Goods Now Arriving Daily

We have just received some of our New Spring Merchandise in Ladies and Childrens Spring Millinery, Womens and Childrens Dresses, Coats, Coat Suits, Shirtwaists and Blouses, Skirts, Dress Goods and Sweaters, and Womens, Mens and Childrens Oxfords and etc.

### SERVICE AND SATISFACTION WITH EVERY TRANSACTION

# F. A. ROTH COMPANY

THE STORE THAT ALWAYS SELLS THE CHEAPEST

LOUISBURG, NORTH CAROLINA

Mr. J. A. White Says "If You Have An Automobile, Keep Rat-Snap"  
"If I knew about RAT-SNAP last winter, would have saved \$120. My car was in the garage for a few weeks during bad weather; when I went to take it out, found that rats had eaten great holes in two new tires. Got them later with RAT-SNAP." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Cash Grocery and Market.

Keep the young pigs growing continuously from the time of birth to maturity is an important item in successful hog raising.

Space to a newspaper is as shoes to a shoe dealer; it is the sole stock in trade. One must pay for news space in news values, and for advertising space in cash.
