

ANNOUNCEMENT!

In answer to so many questions asked "Why can we sell Melrose Flour so much cheaper than others" will say that our flour was shipped direct from mills in ear to Louisburg—not shipped to Henderson or other local jobbers, and then trucked to Louisburg at an expense of about a dollar a barrel as so many others are doing. The estimated trucking cost is a satisfactory profit for us. Our flour is all frssh, not subject to storage in some jobbers store room.

The Shennandoah Milling Co. flour, is a good eat, guaranteed every barrel, shipped direct from Mill to us, always fresh, practically the same grade as Melrose. The price will be equivalent to prices you pay for ordinary flour.

BEST GRANULATED SUGAR, any quantiti. \$7.25

Learn the Government way to poison

For years the experts of the U. S. Department of Agriculture have been seeking a dependable and profitable way for the farmer to poison the boll weevil. After innumerable experiments and demonstrations, the Government announced the discovery of a method of poisoning with calcium arsenate, which, if properly done, will control the weevil and make cotton growing profitable in badly infested sections.

To help give the farmers first hand knowledge of the Government method of poisoning the weevil, we have employed one of the most experienced field demonstrators attached to the Government Laboratory at Tallulah, La., in which this method of poisoning was discovered. He will devote his whole time to demonstration work in North Carolina, and will conduct his work in conjunction with the county agents

The Government work has been carried on in the far South where the weevil first appeared and where the infestation is worst. But the weevil is in North Carolina now, and our farmers can save their cotton if they use the knowledge gained in Louisiana, Alabama and Mississippi.

This expert, Mr. J. O. Taylor will demonstrate this method in 12 or 15 infested counties of North Carolina.

Like everyone else whose prosperity is wrapped up in the growing of profitable crops, we are most anxious that Carolina farmers should be shown this Government method of poisoning before the weevil destroys our cotton.

Mr. Taylor's services are offered as a lecturer on poisoning at any farmers meeting in any part of the State, at no expense. He will, in addition, gladly advise any farmer who wishes to poison his own crop this season. All requests for his services should be made to the Farm Service Department, F. S. Royster Guano Company.

NOTICE

To Members of the Tobacco and Cotton Growers Co-operative Associations

Our dealings with the members of the Co-operative Association has been satisfactory for 1922 and to further show our confidence in the Association we are willing to furnish the members supplies if they merit credit, so far as we are able, for 1923.

We are taking this position NOW in order that the membership may know that they can deal with us and still deliver their tobacco and cotton to their respective Association.

CEDAR ROCK HIGH SCHOOL

News Of Interest To Teachers, Pupils and The Public Generally

By School Correspondent

We are very glad to have Lena Wester and Gray Byrd Murphey, who have been absent from school since before the holidays, back in school with us again this week.

Mr. T. H. Collier who has been ill for some time and who resided with Mr. J. O. Sledge instead of J. O. May as stated in last week's issue, died Sunday evening about seven o'clock and was buried in the old family burial ground Monday afternoon. The funeral services were conducted by Rev. L. E. Thompson of Louisburg Methodist church. He was interred in a casket of gray, as a tribute to the service he rendered and the color he wore in the war between the states.

Miss Bonnie Griffin spent the week-end with Miss Lucy Tharrington.

Rev. Blackwell, in the absence of Mr. Wallace, preached a very interesting sermon last Sunday morning on the subject of choice.

Miss Oma Bliss Lewis spent the week-end with friends in Louisburg College.

Mr. T. L. Stokes and Miss Ruth Fowler were happily married last Wednesday, Jan. 24. We wish them happiness in the new bond that they have formed.

The basketball team suffered a defeat at the hands of the fast Epsom quint on the Epsom court Thursday, Jan. 25, by a score 8 to 11. But they atoned for this defeat Monday afternoon of this week by taking the game on the local court by a score of 17 to 14. The locals took the lead in scoring and at the end of the first half the score was 11 to 3 in their favor, but the Epsom-lads staged a comeback in the second half that threatened to tie the score and the final issue was in doubt until the last whistle. The local team intends going to Red Oak for a game Wednesday, and then to Yonkersville for a game with the Yonkersville five Saturday night.

Student Editorial

"Why Every Boy and Girl Should Take Part in Athletics"

(By Nida Leonard—10th Grade)

Every boy and girl should take some part in athletics. In going to school of course we get exercise but not always the right kind. We need exercise for every part of the body and we get this through athletics.

Athletics train our bodies and develops them so that our health may be good. Not only do we get physical strength and development from athletics but we get mental training as well. For all games require quick thought and decisions and will give us such useful training in this way. From these reasons we get pleasure from participation in the

different games, and thus our school work is likely to be more effective.

Autobiography of James William Ashley Jenkins.

My father was born in Granville county, Jan. 4, 1835. At the age of four he moved to Franklin county and was reared in the neighborhood of Centerville. My mother was born in Franklin county, April 27, 1839. They were married March 24, 1909 and lived at Centerville about four years, then moved to Cedar Rock neighborhood where they still live.

I was born Feb. 22, 1913 and have lived in the same community all my life.

I have one sister about three years older than I am. I have two brothers smaller than I. We like to play together sometimes and then again quarrel with each other.

I started to school when I was six years of age and have not missed very much since. I am nearly ten years old now and in the fourth grade. I like to go to school and study.

I went to spend a week with my uncle Ferrel once. He left me with the mules and they became frightened at a billy goat. I cried and called for somebody to come to my aid.

(Fourth Grade.)

Autobiography of Marvin Peyton Sykes

On Sept. 23, 1912 I was born in a little cottage on the farm near Cedar Rock, Franklin county.

My father, Eugene M. Sykes, married Miss Minnie G. Bobae. They both are trying very hard to rear me in such a way that my life will be a success in both this world and the world that is to come.

I have three brothers and two sisters. My oldest sister was burned to death when she was only three years old.

When I was six years of age my parents started me to school at Cedar Rock. I still continue to go and am now in the fourth grade.

The funniest and meanest incident in my life was when I was so overjoyed at my father's new shoats that I got over in the pen and began running them, as was my way of playing with them. The shoats were frightened at this and one of them ran up by the side of the pen and stuck a long splinter in his side. It was so bad that several stitches had to be taken in it. This frightened me so bad that I ran the other way squalling to the top of my voice. Never since that time have I played with my father's shoats.

(Fourth Grade.)

Autobiography of Margaret Stallings

My father's name is George Byron Haywood Stallings. He married Christiana Lacy of Halifax, Va. She is sister of Mr. T. H. Lacy who lives in Rocky Mount. They have been married twenty-six years.

I was born at Stallings, N. C. I have been living at home ten years with my parents.

I have two whole sisters, and four brothers, and two half sisters. Both are married. The older one married Mr. A. H. Sulter. They live in Rocky Mount. The other married Mr. W. R. Lambertson of Winston-Salem.

I started to school when I was six. I have made a grade a year except when I was smart enough to make the second and third grades in one session. I like to go to school, even though my lessons are hard I do my best. I am in the fifth grade this year.

One incident of my life was when I was about two years old. My red headed brother was riding me on the bicycle and both of us fell off. It skinned my face badly, but it seemed to have hurt him more. Another incident happened in 1920. We were ready to go to school when a cloud came up. Mama told us to bring in some wood. I got ready before my sister did. I was running to the wood pile and looked back to see if she was coming. I saw a stream of blood coming from my foot and went back to the house. When mama found out about it she let it soak in water. We never knew what was the matter until I had to have it lanced. The doctor said there was fine glass in it like an electric light bulb.

(Fifth Grade.)

NOTICE

Having qualified as administrator of the estate of A. W. Perry, Sr., deceased late of Franklin county notice is hereby given all persons holding claims against said estate to present them to the undersigned on or before the 2nd day of February 1924, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please come forward and make immediate settlement. This Feb. 1st, 1923.

W. R. PERRY, Admr.

COTTON REPORT

The tabulation of the card reports shows that there were 14,282 bales of cotton, counting round as half bales, ginned in Franklin county, from the crop of 1922 prior to January 16, 1923 as compared with 11,276 bales ginned to January 16, 1922.
