## Hunt "Dead" Man

Police of New Haven, Conn., faced an unusual mystery when they began search for De Lafayette Flint, school principal, reported dead in New York hospital. Hospital failed to verify report but no trace of Flint could be found.

## EVERY TRACE OF FLU DISAPPEARS

Dreadful After Effects Entirely Overcome, States Atlanta Citizen; Gains 18 Pounds.

"I have reaped such great benefits from taking Tanlac that I can tell the world it is a truly wonderful medicine," recently declared A. W. Wheeler, 185 Peachtree St., Atlanta, Ga., special representative of the Wright Co., dealers in hotel equipment. "I suffered with nervous indigestion a year or more, lost nearly twenty pounds and became badly weakened. Then in this run down state, I was stricken with 'flu' and it left me in a very critical condition. I had no appetite, could not digest properly the little I did eat, and was too nervous to sleep. "Hearing of Tanlac through some friends I concluded to test it for myself. It ended my indigestion, built me up eighteen pounds, and ever since it set me right I have enjoyed excellent health. I gladly recommend the treatment, not only what it has done for me, but also the good it has done a number of my friends and relatives." Tanlac is for sale by all good druggists. Take no substitute. Over 35 million bottles sold.

## Sherman Summarizes Boll Weevil Facts.

Raleigh, March 13.—"In answer to numerous requests, I am giving once more in simple outline, the genuinely proven methods for meeting the Boll weevil problem," says Prof. Franklin A. Sherman, Chief in Inimology, North Carolina Experiment Station. "I know of no substitute for study and careful work in this or any other big problem, and I have no short cut to complete success, nor is there any 'secret element' involved in it. We have those in the state who are grasping at the easy ways to set forth by glaring advertisements, and they may go their way, for such remedy has my recommendation," he says. Continuing, Mr. Sherman states, "The main steps are these:—(1) Cultural methods for securing the earliest possible setting for the largest possible crop. These have been explained by Professors Williams, race, Garren and Winters of our Division of Agronomy, in articles appearing in the papers and at meetings held out over the State. (2) The dust-poison method, which is applied chiefly in late July and August. (3) For those that cannot dust, or who are in sections where injury is less severe, the picking up and burning of fallen squares until the end of July, is recommended. "The dust-poison method does call for considerable investment in machinery beforehand, and gives best results when done at night. The farmer who studies the directions and who watches the progress of infestation in his fields has a fine chance to make his dustings highly profitable, while he who merely 'dusts' blindly and without system or understanding may waste his poison and not control the weevil. We had seven tests of dusted and undusted cotton side by side in 1922, and in each case there was a net profit after allowing for all costs. The average net profit on dusting for all seven tests was over \$22 per acre. It certainly pays for one to know when and how, and we appreciate the slogan 'Do It Right or Not at All,' better than before our last year's experience. There are always plenty of ways to attempt a thing wrong, but very few ways to do it right. We are prepared to send the information to those who apply and it is now high time to be placing orders for the poison and machines."

**To Stop a Cough Quick** take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues. A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup. The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough. Both remedies are packed in one carton and the cost of the combined treatment is 25c. Just ask your druggist for HAYES' HEALING HONEY.

WILLIAM TELL Flour has been sold in Louisburg for many years. J. S. HOWELL.

## KEEPS CHILDREN WELL AND STRONG

THIN, pale, impoverished blood makes children frail, backward and delicate. Gude's Pepto-Mangan creates a bountiful supply of pure, red blood, restores bodily strength, brings back color to the cheeks and builds firm, well-rounded flesh. For over 30 years Gude's Pepto-Mangan has been recommended by leading physicians as a tonic and blood enricher. Your druggist has it—liquid or tablets, as you prefer.

## Gude's Pepto-Mangan Tonic and Blood Enricher

Prepare Garden Soil Well.

Raleigh, March 13.—"Deep, open, light and mellow as possible" is the way C. D. Matthews, Chief of the Division of Horticulture describes a good garden soil, and since the condition of the soil is a most important factor in successful gardening, it should be looked after immediately, he says. Plowing, disking and harrowing will help to get the soil in good condition. Where the land is heavy, liberal amounts of stable manure, the use of lime and better drainage will further help to improve soil for vegetables. Where the soil is light, the use of stable manure and green crops plowed under and lime will also assist.

Not many people know that lime is good for garden soils just as it is for land planted to legumes and the other field crops, Mr. Matthews states that lime may be used with profit on practically all soils in the eastern part of the State and on many of those in the piedmont and mountain sections. He says, "On gardens which are acid or when green manure crops are turned under, ground limestone at the rate of two or three tons per acre is recommended. If lime is applied at the same time stable manure or mixed fertilizers are put on the ground, it may cause the loss of nitrogen. For this reason lime is best applied in the fall. However, it is felt that ground limestone will improve garden soils if applied a few days or two weeks before adding the nitrogen-carrying manure or fertilizers. He states also that if Irish potatoes are disinfected before planting, there is not much danger of "potato scab" occurring on soils where liming makes conditions favorable for this disease.

Mr. Matthews cautions prospective gardeners to keep in mind that the garden is supposed to be cropped intensively and for that reason should be well supplied with fertility and humus as well as put in good physical condition. Garden crops respond more readily and economically to fertilization than do other crops.

## RESALE OF VALUABLE LAND

Under and by virtue of the power contained in a certain deed of trust from J. T. Wilson and wife to J. G. Mills, trustee, which said deed of trust is recorded in the office of the Register of Deeds of Franklin County in Book 225, Page 23, default having been made in the payment of the notes secured by the said deed of trust, I will resell the land described in said deed of trust, an upset bid having been made at the price named in the first sale, at public auction for cash to the highest bidder at the Courthouse in Louisburg, N. C. on Monday, March 26, 1923, at 12:00 M.—the said land being described as follows: A certain parcel of land lying in Harris Township, Franklin County, North Carolina, and adjoining the lands of Samuel Harris, Perry and Patterson, Joe Young, J. T. Wilson and others, being the land conveyed to

W. B. Timberlake by Caroline Timberlake by deed recorded in the office of the Register of Deeds of Franklin County in book 71, Page 145, and conveyed afterwards to J. T. Wilson by Emma Timberlake and others, and containing 280 acres, more or less. This the 9th day of March, 1923. - 3-16-23. J. G. Mills Trustee.

A safe investment—a well prepared garden.

Among other things that haven't been getting better and better are parodies of Mr. Coué's prescription.

The boy who once wore dad's cut-down pants now has a son who uses dad's old car to make a strip-down.

On the other hand, America's status as the richest nation on the globe will never be confirmed by an examination of income tax returns.
