CEDAR ROCK HIGH SCHOOL

News Of Interest To Teachers, Pupils and The Public Generally

By School Correspondent

The Senior Class play "The Adventures of Grandpa" presented last Thursday night, proved a big hit with the large crowd present. It was a play of unusual merit and was perhaps the best rendered here this season.

Miss Cople Taylor from Castalia, spent last week-end at Cedar Rock with her sister, Mrs. Smith.

We are very glad to report that Mr. John Smith's baby is rapidly recovering after a long spell of flu and pneumonia.

Mr. Royland Dosier and Miss Lois Boone, the charming daughter of Mr. and Mrs. Penny Boone, were happily united in marriage Thursday evening, Feb. 8. We wish them a happy and successful life.

Mr. Glover Hunt and family are planning to depart for New York in a short while. They plan to make their future home there.

Miss Lamb is quite ill with the flu at the present writing.

Our neighbors say "he that plants thorns shall not gather roses." Don't make a mistake in what you plant.

Miss Bertha Dement spent the week-end at Justice with Miss Vivian Wheeler.

Mr. Grey Byrd Murphy, one of the high school pupils, is spending a few days in Richmond.

We are glad to note that Mr. Clyde Leonard, who has been absent for several days, on account of sickness, is back in school again.

Misses Beulah Stallings, Oma Bliss Lewis and Elmer Lenter in company with Mr. and Mrs. John Insoce, Jr. motored to Rocky Mount Saturday.

With the warm days of sunshine comes the baseball fever. We are at work on our baseball diamond and expect to have it ready for use in a few days. The squad began work this week with a little light practice on Monday. We expect to open our season away from home with a game with Red Oak on March 20.

Only two basketball games have been played since last writing and both of these were won. The first was with the strong Bunn quint on Friday night, this was won by the locals by a score of 33 to 30. The game was the best played on the local court this season; it was clean and hard fought throughout. Cedar Rock opened the game with a goal from the field but Bunn came back with a rush that netted them three successive field goals. During the remainder of the first half the ability of the Bunn boys to cage the long shots kept them well in the lead and the half ended 21 to 14 in favor of Bunn. But in the second half things were different; the home boys staging one of the rallies for which they are getting to be noted, this being the fourth game in which they come from behind and won over a good lead. From the first whistle the locals carried things their way, caging the ball successfully from almost any angle.

For the first fifteen minutes of the second half Bunn was unable to score except on fouls while the Cedar Rock quint established a lead. However in the last few minutes the visitors staged a comeback that gave them two field goals and threatened to tie the score but a long shot by Harris and a foul shot by Sturdivant carried the locals out of immediate danger. Both teams showed fine form both in passing and in caging the ball. Line-up: Bunn Cedar Rock Chamblee Jennings

Seymour Right Forward Dickens

Parkerson Left Forward Sturdivant

Hagwood Center Harris

Whit Right Guard Bledsoe

Feld goals Chamblee 4; Seymour 5; Purkison 1; Hagwood 1; Jennings 2; Sturdivant 6; Harris 5; Fouls Chamblee 8 out of 11; Sturdivant 5 out of 7. Referee Insoce.

The second game was played with the Youngville Armory team at Youngville, Saturday night. This was won by the Cedar Rock quint by a score of 19 to 12. The Cedar Rock boys took the lead early in the game with two successive long shots by Harris. The lead once gained was never threatened the first half ending 11 to 4 in favor of the local boys.

In the second half the Youngville boys staged a comeback that gained them three field goals but the lead was too much to be overcome. Neither team was up to its standard in caging the ball, time after time the ball rolling on the ring and dropping off. Both teams showed good form in passing. For Youngville Pearce played a good game at guard and made two field goals. For Cedar Rock Jennings and Harris tied with four field goals each. Dickens played a good floor game.

Line-up: Youngville Cedar Rock Alford (2) Jennings (8)

Pearce (2) Right Forward Dickens

Winston (2) Left Forward Sturdivant (3)

Pearce (7) Center Harris (8)

Perry Left Guard Bledsoe

Referee, Carlyle, W. F. C.

Don't forget the Music Carnival to be held at Cedar Rock Friday night, March 30. Everybody come.

(Work In Primary Dept.)

WHAT MY CLOCK TELLS ME

"The Clock" is a very interesting subject for a series of language lessons to be taught in the second grade. In the first lesson the children and I talked about how we tell time now, also how people told time long ago. Pictures of the clock, sun dial, hour glass and candle were shown by me. Then for seat work, the children drew and cut the things that had been shown to them. In the next lesson the children talked about different ways in which

the clock is useful. They mentioned the people who are most dependent on the clock, as engineers and store keepers. They were interested in the fact that everybody is dependent on the clock to tell when to do a thing. Then they were asked to tell four ways in which the clock helped them each day. They told these in clear cut sentences without using too many "ands." Four of these sentences were written on the board by me. After the children had read these sentences, they were erased. Paper was given to the children and they were told to write a short story about what their clock tells them each day. Before writing one child told the things they should remember in writing their story—capitals, periods, margins. The children were allowed to write what they wished. Below are some stories that were written.

WHAT MY CLOCK TELLS ME

My clock tells me what time to get up in the morning.

My clock tells me what time to go to school.

It tells me when to eat my food.

My clock tells me what time to go to bed.

(By Mary Johnson).

WHAT MY CLOCK TELLS ME

My clock tells me when to go to school.

It tells me when to come home when I go to see somebody.

My clock tells me when the sun rises and sets.

It tells me to go to bed at eight o'clock so I will be healthy.

(By Nell Stallings).

WHAT MY CLOCK TELLS ME

My clock tells me what time to get up.

It tells me when to eat my breakfast.

My clock tells me what time to go to school.

It tells me what time to go to bed.

(By Ada Lou Sledge).

WHAT MY CLOCK TELLS ME

My clock tells me what time it is every time I want to know.

It tells me when to get up.

It tells me what time to go to school.

My clock tells me when to eat and when to go to bed.

(By Clyde E. Parnell).

Student Editorial—Obedience

(By Nina Leonard, 10th grade)

There is nothing so nice as obedience as for boys and girls to obey their parent not only their parents but everybody else. They should obey rules in school, at home and abroad.

We often get mad because we can't do like we want to all the time. But it's best to listen to older people, because they know best for us but we don't think so. We must learn to obey people when they know best for us. You can look at a boy or girl and tell when at home they are taught to obey their parents, when being asked to do something. Just lag around and have to be told two or three times and have to be made to do it. But when a child is not trained at home to obey he will not obey parents or anybody else.

Sometimes take a notion to leave home, and being led astray by some other boy or girl, so it is best to obey always. The bible teaches us to obey our parents in the sight of the Lord for it is right. How much better it is to obey father and mother, than to do as we wish all the time.

Lavoiser Chemical Society IRON INDUSTRY (By Boons Eyes)

What does our progress in manufacturing depend on? It depends entirely upon iron. And a nation is not and can not become rich, unless it has iron mines. Iron is the most universal of all metals. Man has found it in many parts of the world, and used it since before the dawn of history. But we have of late turned to the earth's stores of iron with renewed eagerness and within a few decades increased our use of it many fold. Most everything manufactured is almost universally produced by machines of iron or steel. Iron ores are plentiful, they

THE SNOWMAN THAT WON'T THAW

Notice To Owners of Cars and Fordson Tractors of Franklin County

We can serve you night or day, when in trouble with your automobile or your Fordson Tractor, as Messrs. H. G. Leonard and N. B. Medlin, known as Herbert and Nobe, are with me, and Mr. Leonard is known as the best Fordson Tractor mechanic in the county, also for Ford cars. Mr. Medlin is known to be one of the best mechanics in the county for all large cars such as Hudson's, Essex, Dodge's and Buick's and all other large makes of cars. We can serve you as well as any Garage in the county. We carry nothing except genuine Ford parts for

your Ford and can serve you as quick for parts for large cars as any Garage in Louisburg as no Garage carries stock for other cars except in small quantities. When in town call to see our stock of castings, inner tubes and accessories as we carry the largest stock in the county except the Louisburg Motor Co. Don't forget when in trouble call day Phone (No. 7), at night (No. 237) and we are always on the job. We serve you for gas, oil and all accessories on Sunday as well as Monday.

HUDSON'S GARAGE
R. W. HUDSON, Proprietor
Louisburg, N. C.

oven dissolve from every hillside by leaching rain waters. And where a stream of water with iron in solution enter a stream of water with lime in solution iron ore is deposited. For this reason we have a string of iron deposits in the U. S. from Northern Vermont to Central Alabama. The U. S. is the leader in iron manufacturing in the twentieth century. And the ore exists in the districts of Pittsburg, upper Ohio valley along the shores of Lake Superior, Northern Alabama, Birmingham and other minor districts in the U. S. It occurs as oxides, sulfides and carbonates.

The process of manufacturing iron is: The iron is melted out of the ore by being put in a large stack or furnace sometimes one hundred feet high and filled from bottom to top with roaring fire that rushes upward through layers of coke, ore and limestone. The draft is provided by a blast of air driven by pumping engines. This is the place we get the name Blast Furnace. The limestone makes it melt at a low temperature and unites with the dross to form slag or cinder, which is much like lava. The iron being heavier settles to the bottom and is drawn off at intervals of a few hours. From the time the ore is dug until it is manufactured into iron, it is never moved by human hand until it is finished iron or steel. The motto is "up by steam and down by gravity."

The two methods of making iron is the Bessemer process and the open hearth process. In the Bessemer process the carbon and silicon is removed from the cast iron but not the phosphorus and sulphur. While in the open hearth process phosphorus and sulphur are both removed as well as carbon and silicon. This of course is much better than the Bessemer process because any desired composition of steel can be produced.

The different kinds of iron are: Cast iron, wrought iron and steel. Wrought iron is made from cast iron and is soft, malleable and ductile. Its strength is greater than that of cast iron, but less than that of steel. Steel like wrought iron is made from cast iron it is very soft, but resists rusting, and can be made as pure as 99.95 per cent, and the higher the temperature is raised the better the steel is. The U. S. produced in 1908-10 over forty-six million tons yearly.

In Loving Memory

On Mar. 6, 1923 the death angel visited the home of Mr. T. C. Collins and took therefrom his beloved wife Emma (familiary known as "Essie") Her illness was flu developing into pneumonia and only a few days of suffering before the end came.

She was the daughter of Mr. and Mrs. Jesse Collins of Franklin County, and was married to Mr. T. C. Collins Feb. 1, 1882, who now survives her. She was the mother of four children two of whom are now living, Mrs. Herbert Bartholomew and Mrs. J. E. Honse. Mrs. T. D. Dorsey preceded her to the grave four years ago, the other one in her infancy. She was a sister of Messrs. Whit, G. T., H. A. and Ollie Collins, two sisters Mrs. Nick Wood and Miss Mollie Collins, only one of them survive her, Mr. H. A. Collins.

Sister Collins was sixty nine years old. She united with Sandy Creek Baptist Church at about the age of thirty, and was a consistent member until she moved her membership to White Level Baptist Church of which she was a faithful member the remainder of her life.

Sister Collins possessed peculiar charms as a young lady beloved and admired by all. To her husband she was the joy of his home, anticipating his wants and making his home happy, she was truly a model wife presiding over her household with queenly grace and dignity. Her children were the joy of her life, over whom she tenderly watched with a mother's care, feeling their pains, and joying in their health, watching their development with a mother's anxious concern. She had a large circle of friends drawn around her by the magnetic power of her own attractive graces. Her christian life shone out as the light of morning made soft by the graces of faith, hope, and love. This beautiful life is ended here. May a kind Heavenly Father be near, merciful and good to Mr. Collins and the dear children, and may they all as one by one they leave this world be prepared to meet the dear departed one in Heaven, and remember she is not really lost but only gone before a lovely Treasure in Heaven to draw them there.
