HOME DEMONSTRATION DEPARTMENT

The kitchen, where the woman spends the larger part of her waking hours, should be the service-center of the house. Her efficiency in this, her workshop, is a financial asset and comfort a humane consideration.

In planning the house, kitchens are often an afterthought, yielding to the plan of the rest of the house. In the interest of comfort and good management the kitchen should be planned first, with consideration for desirable exposure, area size and fixtures; otherwise the stove, the sink and working-surfaces may have to be placed at a disadvantage because of plumbing, chimney, windows and doors.

The size of the kitchen is determined not alone by the number of centers and the amount and kind of work to be done, but by the number of workers. It is safe to say that it should be only large enough for comfort and convenience, since excess space causes unnecessary travel. Desirable areas for the small family kitchen are nine, ten, eleven or twelve by twelve feet; ten by thirteen or fourteen feet; or eleven by eleven, twelve or thirteen feet. Work cannot be easily done in a kitchen less than eight feet in width. If one person is responsible for the work, the kitchen should be near the other working-spaces for convenience in answering the door-bell and the telephone, caring for the baby, doing the cleaning and laundry work.

To furnish adequate light and air, the area of the windows and of glass in doors should be not less than twenty-five per cent of the area of the floor area. Windows should be arranged to secure a diagonal path of light and air and should be located as far apart as possible. If the doors are reduced to a maximum of three, there is left the much needed wall space to accommodate kitchen equipment, and windows should be high enough to have tables underneath them.

Screens for windows should be easily removed to facilitate window-washing.

The kitchen should contain no unnecessary furniture or decorations; its equipment should be simple in design, that it may be easily cared for; articles most frequently used should be in the most accessible places.

Since the preparation of food is the largest kitchen activity, equipment most used for that purpose should not be too widely separated. The stove and the refrigerator, however, must not have too friendly relation. The location of the dining room determines the location of the sink and the stove, since a short distance to travel in the serving of meals and the handling of dishes greatly lightens such work.

Any flooring used in kitchens should be smooth, even and without cracks. Linoleum, cemented to wood, with with stand long wear and prove an easy surface to work upon.

When a covering of any kind is used, it should be carefully fitted to prevent dampness underneath and to avoid a harboring of undesirable visitors.

Drain-boards, table space and cabinet shelves should be on the same level and arranged for continuous work, with small equipment placed where it may be easily reached when needed.

Every worker likes a sink that is large enough for two pans and that can be cleaned not only inside but also around its outside. A drain-board with a slope to shed water into the sink by means of grooves should have no crevices for hiding dirt.

For correct posture in dish-washing the worker stands straight, with her weight on the balls of the feet and the chest high. To insure this the sink must be set high enough to allow the worker to lay her hands on the inside bottom of the sink without bending her body. If the worker is permanent in the kitchen, it is worth while to raise or lower the sink to suit her height, even though it involves a change in plumbing.

Simple washable curtains which do not obstruct the light too much add gaiety and charm to the kitchen.

Surroundings to the kitchen should not be untidy. Clean yards, clean paths, a well kept garden seen from the kitchen door or window help to dispel fatigue and discontent.

AGED MAN DIES AT THE GUILFORD HOME

"Uncle" David Faulkner Aged 105, Succumbs to Infirmities Of Age.

"Uncle" David Faulkner, aged 105 years, died last night at 6:30 o'clock at the county home following an illness of about three weeks. Infirmities due to age was the cause of death. Mr. Faulkner, at the time of his death probably the oldest person in Guilford county, was born on June 16, 1818, at Hightower Hill, in Franklin county, about 10 miles from Louisburg. He had lived for a greater period of his time in Randolph county.

He is survived by a widow and granddaughter who live at Purlington and one son, David Faulkner, Jr., who lives at High Point. The remains were taken to High Point last night. Plans for the funeral and interment have not been announced.

At the time he went to the home his strength and agility struck many as being remarkable for one of his years.

When you run an ad in The TIMES we know that you want a good ad, nicely displayed. That is the only kind of an ad we want to give you, but it takes a little time to set good ads—so get out of that habit of waiting until the last day before even thinking about your ad.

Firestone

Will Not Increase Price
Solid and Pneumatic Tires
Until May 1st

Never has Firestone been so well situated to give operators the greatest measure of Cushion, Traction and Mileage at the lowest cost.

Today, economical manufacturing and distribution are showing the fullest results. Our favorable purchases of rubber, in advance of the 150% increase brought about by the British Crude Rubber Restriction Act, aid further in maintaining the old price levels.

Whatever the Truck Service—the Firestone Dealer Has the Right Tire

Firestone developments of the past two years have made pace for the industry and set new records in sure, economical performance. Five tires—the Heavy Duty Cushion, the Truck Type Cord, the Maxi-Cushion, the Giant Solid and the High Type—cover the needs of motor haulage in all its forms. Each has a distinct work which it does best. Each possesses a definite and special value for the operator.

Truck owners, using pneumatic tires, will find the answer to every demand of rapid, economical transportation in the Firestone Truck Type Cord with the tread that increases carrying capacity and improves traction, and the powerful gum-dipped carcass construction.

Let the Firestone Service Dealers Keep Your Trucks Moving

There are 800 Firestone Service Dealers, located in the principal trucking centers, fitted by natural ability and a thorough knowledge of trucking, to help you choose the right tire for your roads, loads and service.

Price Protection as Long as Stocks Last

Additional tires will be supplied to Service Dealers only so far as our present output will permit. Consult the nearest Firestone Service Dealer at once regarding your truck tire needs. He is in an advantageous position to give you an unusual tire—a specialized service—and prices which may not be duplicated in months.

Firestone Tire & Rubber Co., Akron, Ohio

The Firestone Dealer will supply you with Passenger Car and Truck Type Cords. If you need solid or cushion tires he will refer you to the nearest Service Station, which is equipped with hydraulic press for quick change-over. Make one of these Stations an active part of your trucking operations. You'll reap results in surer and more economical haulage.
