**ECONOMY**—Despite unprecedented demand, Portland Cement remains the most economical building material. Comparison of prices of building materials and Atlas Portland Cement. Sources: Building material prices from U. S. Bureau of Labor Statistics. Atlas Portland Cement prices from the records of the Company.

**DISTRIBUTION**—Distribution of Atlas Portland Cement is direct and economical through close co-operation of efficient local dealers. A straight line is the cheapest distance between two points.

## ATLAS EFFICIENCY and DISTRIBUTION Insure Building Economy

THE cheapest of all products undergoing a complete manufacturing process is made available through simplified economical distribution to the user.

Between the Atlas plants and the user there is but one distributor—the building material dealer—and the directness of this marketing serves to bring Atlas to the buying public cheaper than any other method devised.

The Atlas dealer with his warehouse and yard storage safeguards building operations through an ample supply of materials, and with his trucks and general facilities he can make prompt emergency deliveries. Back of the Atlas dealer is the Atlas reserve storage capacity, greater than the output of the entire nation twenty years ago.

Thus, the one building material having the widest variety of uses, making possible rapid construction and providing fire-safety and permanence for any building, is brought to the user a few bags, or thousands of bags, through a distribution method that sustains building economy.

Ask your dealer for Atlas Building Helps

Through its dealer, Atlas supplies free books on concrete construction, written by Atlas Engineers recognized nationally as authorities. You are also invited to consult these Engineers on any building problem without charge.

If your dealer can't supply the book you want, write our nearest office.

IN a period of advancing costs, the price of Atlas has remained consistently low. Today it is cheaper than it was thirty years ago. All Atlas plants, operating under one central control, make only one grade of Portland Cement—the best that science and skill can produce—and every member of the operating group takes pride in helping to maintain Atlas as—
