

Some Ways of Using Milk

Milk is a food as well as a drink. It is a food to be compared with meat, bread, and potatoes. Of course, every child should have milk to drink with his meals as well as prepared dishes containing it. When the child tires of milk, the occasional addition of a small amount of cocoa to milk will change the flavor and increase the use of milk.

Cereals such as oatmeal, rice, cornmeal and hominy grits may be cooked in milk instead of water. A double-boiler is used in the cooking. A creamy, healthful dish is the result.

Milk combined with vegetables makes excellent soups, creamed and scalloped dishes, souffles, and croquettes. Creamed toast and gravies also require the use of milk.

Healthful, nutritious desserts for children usually have whole milk for their foundation. Ice cream, corn starch, bread, tapioca, and junket puddings contain much milk and cream.

Cheese dishes furnish the adult with the body-building protein of milk. Of course, these belong largely in the diet of the older child and the grown person. Milk is a safeguard in their diet and they can use many milk products. To the young child, however, milk is a necessity if he is to have proper health, strength and energy.
