

U.S. Royal Cords

BALLOON ~ BALLOON-TYPE ~ HIGH PRESSURE
Built of Latex-treated Cords

TIRE building took a big step forward when the makers of United States Tires invented the Latex Process.

The added strength and wearing quality given by Latex-treated cords is something that the user of Royal Cords can tell you about from his own experience.

Royal Cords are the standard of value in cord tire equipment—even more certainly today than ever before.

And this holds good whether you are considering a High-Pressure Tire, a Balloon-Type Tire to fit your present wheels and rims, or a Balloon Tire for a 20 or 21 inch wheel.

WOMAN PRESIDENT? NOT YET. WORLD GETTING SMALLER. THREE AGES OF BARBARISM. STONE, BRONZE, IRON.

This is the political stage of "rosy reports." They pour in on La Follette, Davis and Coolidge. Coolidge is told that Ohio, Iowa and Kansas are already his. Davis is told that with the South and New York, Massachusetts, Illinois, etc., he is ELECTED NOW. La Follette's followers say they have "twenty-five States sure." The "rosy" days are pleasant, only some one is sure to be disappointed.

The Government has ordered a group of flying machines that can travel through the air, on the water and on land. Only one step remains, the amphibian and submersible flying machine pulling in its wings and becoming a submarine. That will come also.

John B. Voorhis, oldest officeholder, aged ninety-five, predicts a woman President. She will come, but not in fifty years. Many women in the United States would make Presidents better than any, with the exceptions, since Thomas Jefferson. But man, proud man, dressed in a little brief authority, will take a long time to get over his SUPERBILITY COMPLEX. Men of low intelligence sincerely believe that they are in some mysterious way woman's superior, and such men make Presidential elections.

The world in eighty days" was a fairy story. Around the world in six days or less will be REALITY, before 2000 A. D.

The scientific world notes the discovery in France of a new anesthetic called "sommifaire." With no bad after effects this anesthetic makes possible the longest operations. It is injected into the blood, causes the patient to remain half conscious for thirty hours, which is excellent for major operations. It is hard to believe as you read of scientific methods for avoiding pain that when anaesthetics were first used they were savagely denounced as works of the devil. Earnest preachers declared that God WANTED us to suffer and it was a sin to thwart His divine will.

Joseph Greenberg, of New York, will return to his home with new knowledge of this country and greater respect for the size of Texas. He left Brooklyn in a little automobile to bring his son back from "somewhere in Texas," and told his wife he would be gone "about three days." He will be surprised to find it will take him about as long to cross Texas as to cross all the rest of the American continent. When you've entered Texas on one side and come out on the other, you have covered almost half the distance from ocean to ocean.

When historians write of the three great periods of barbarism development, the stone age, bronze age and iron age, they will say: "The full industrial development of the iron age, reached at about the year 2,000 of the period humorously called 'the Christian Era,' may perhaps be called the beginning of civilization."

Man had developed faint ideas of right and wrong. But while they had begun to leave their great fortunes to education and science instead of seeking to bribe their debt and buy eternal bliss for their own worthless souls, they retained the worst features of earlier barbarism. The discoveries of science in anatomy and physics were used for the murder of a gigantic soul. "The dogs of the race committed murder with their own hands. The so-called upper classes lived in shameful luxury, utterly indifferent to poverty, disease and ignorance around them. They even herded young children of the poor into factories and mills, grinding them into profits for their own use." "On the whole, that culminating period of the iron age was inferior in dignity and decency to the stone age."
