INSURANCE A NECESSITY INSURANCE ACTUALLY DEALS WITH EVERY HONEST BUSINESS UNDER THE SUN

Fire insurance has come to be not only a householder's security, but a national necessity. The home owner must protect his family and provide shelter; the renter must guard his household goods. Business concerns, factories, churches, schools, colleges and corporations must protect their property investments. The man who can thus provide the security of a community against financial loss from fire is its insurance agent, through his companies.

How To End a Cough Quickly

Specialists say to actually end a cough in the shortest possible time the medicine should not only soothe and heal the soreness and irritation, but should also loosen and remove the phlegm and congestion which are the real cause of the coughing. When this is done the worst cough quickly disappears.

This "double-action" method has been brought to perfection in the prescription known as Dr. King's New Discovery for Coughs. A few drops stop the coughing spells almost instantly, and people who have hardly been able to sleep at night for coughing usually get their full night's rest even after the first dose. It has been very successful, too, for children's spasmodic croup, for bronchitis, laryngitis, bronchial asthma and hoarseness. On sale at all good druggists. Ask for

Carelessness Or Caution
Highway fatalities are on the increase, according to the United States census bureau. The increase of three killed for each 100,000 population during the past year is due to 2,776 more fatalities from automobile accidents.

But even the 16,452 deaths charged against the automobile do not tell the whole story, as deaths resulting from collisions between automobiles and trains and automobiles and street cars are charged to the heavier vehicle.

Train grade crossing accidents cost the lives of 2,268 persons last year, it is estimated.

Indiana has realized the seriousness of the situation, and at a safety conference adopted a set of practical suggestions that will be incorporated in the governor's message to the legislature.

The conference recommended that a member of the public service commission be designated as "commissioner of safety," that an advisory council of seven members be designated, representing the public and industries, and that legislation to give the commission right to eminent domain within 300 feet of a grade crossing to remove obstructions be enacted.

Successful Tarheel farmers are studying the bulletins issued by the State College Experiment Station and

These suggestions are all very fine and some of them are already being used in other states, but no amount of legislation is going to save the lives of people at grade crossings unless they themselves are concerned enough to be careful.

It has been proposed, even, that automobile drivers be compelled to stop before crossing a railroad or interurban line, but no one has found a feasible way to compel its observance.

In the last analysis, the terrible loss of life from this cause can be reduced only by the drivers of automobiles themselves. The fatalities will continue to mount year by year, so long as carelessness instead of caution, rules in the minds of the drivers.

Profit from cows is dependent on the milk they give and the best way to increase the milk producing capacity of the herd is to use pure bred bulls, say dairy extension workers of State College.
