PUBLIC OPINION

In his speech before the Associated Advertising Clubs of the World at the British Empire Exhibition, Mr. W. E. Beatty, President of the Canadian Pa-cific Railway, told of the expenditure of \$67,000,000 by his company since ioi. by advertising. Mr. Beatty said in part—"Therein lies the strength of Canada's position. Canada has had the Phone No. 115
al Bank Building on advertising because she knows she has something worth while to offer."
The expenditure referred to was probably not all appropriated to newspaper Eye Specialist

Office in Hotel Building
Louisburg, North Carolina

I wish to advise my patients and the public generally that after the 1st of September my business will be on Cash basis when work is completed. able us to prepare to meet situations that do not exist.

Then to, the advertising columns of

the newspaper are a source of educa-tion to those living in rural districts. Peopl e in out of the way places are just as familiar with happenings of the times as those living in the great cen-ters of population. The wife and mother—the stabilizer of the home upon whom the burden and respon-sibility for the proper training and feeding of the family falls, depends largely on newspaper advertising in forming opinions and making decisions. Familiarity with advertising has given her a sensitiveness to anything that rings false. Therefore advertising copy of a genuine article must be free from exaggeration if it is to receive her favorable consideration. The most widely known and universially used builder of health. Scott's Emulsion, has been advertised in newspapers for fifty years. It has been recommended to the public as a tonic food for every member of the family and the credit for the phenomenal yrowth in sales from year to year is given to trutful advertising in the newspaper and the ability of the reading public to intelligently select the tenic best suited to their need. Scott & Bowne, makers of Scott's Emulsion and Ki-moids for in-digestion, state that this growth is surely tangible evidence that the public has been educated through the newspaper to know the medicinal value of pure Lofoten Cod-liver oil prepared in such a way as to be easily assimilated and pleasant to take. Com mendation of this kind is surely note-worthy and local merchants will do well to heed the method of those who have given many years to the study of d to 8 p. m. marketing problems. If the financial condition of your business will not permit of a large advertising expenditure it is to be remembered that a 1924 as compared with 17.3 slow and continued campaign will al-ginned to November 14, 1923. ways prove profitable. Let this paper show you what can be done.

THE GROWTH OF THE COLORED GRADED SCHOOL

The colored Graded School continues to grow in number and popularity, At present we have nearly five hun-At present we have hearly five hundred enrolled, the largest number of pupils in the history of the school. Since my connection with the school I have tried hard to do my duty and teach the boys and girls the right thing. I realize that in having this large number of children under my large number of children under my care it is a great responsibility and it takes good common sense and judgment to make good. I came to Louisburg twenty five years ago but with one aim and purpose and that was to help my people and to bring about a good spirit by teaching them the real necessary things i. e. industry, politeness and honesty and to know that in the South and especially in Louisburg the colored people have a fine chance to be real men and women if they will respect and have the proper consideration toward our white friends As long as I have charge of the colored schools in this community I shall teach and lecture to the boys and girls under my care along these lines, con-tact and experience has taught me that it pays my race to do right and remain in their places at all times.

I feel deeply grateful to God for the many white friends which I have mande and for their willingness to help me in every time of need. Ninety per cent of my own people have been very nice to me and have given me credit for the good things I have tried

I am still hoping that we will some time in the near future have a good industrial training school here. We are very much in need of such a school. The average attendance in the school continues to grow and I am wondering how we will accomodate the children after Christmas as we can scarcely accomodate the children

in our present school building.

The conduct of our boys and girls is very gratifying. Each week I can see a great improvement in their con-

Our good superintendent, Prof. W. R. Mills, has given me every encouragement that I could wish for. I am

always ready and willing to carry out any instructions that he may see fit GEORGE C. POLLARD.

COTTON REPORT

The tabulation of the card report shows that there were 12,766 bales of cotton, counting round as half bales, ginned in Franklin county, from the crop of 1924 prior to November 14. 1924 as compared with 17.343 bales
