YOUNGSVILLE, N. C.

Bad Color (liver trouble)

"OCCASIONALLY I am troubled with spells of constipation and inactive liver," says Mrs. John L. Pence, Broadway, Va. "I always use Thedford's Black-Draught when I feel a spell of this kind coming on, for it saves me a bad headache. My color gets sallow at times. I get real yellow, showing that the trouble comes from the liver."

"I have found Black-Draught to be the finest kind of a remedy for this. I take Black-Draught and make a tea out of it, and take it, along in small doses for several days. I have never found anything that served me so well."

"Since I have known about Black-Draught, I have not suffered nearly so much with headache, caused from indigestion. If I find my tongue is coated, and I wake up with a bad taste in my mouth, I know I have been eating indiscreetly, and I immediately resort to Black-Draught to straighten me out."

TOMATO WILT CONTROLLED BY CHANGING GARDEN PLOT

Raleigh, July 5.—When wilt attacks the tomato plants, the growers must stand idly by and see mature plants, some full of fruit not yet ripe, wilt, turn yellow and finally die. Nor can the grower do anything about it for the three organisms causing this trouble are well inside the tissue of the plant where spray materials will not penetrate.

"The sad part about these wilt diseases, is that they are most severe at a period when the plant has reached its best growth and begins to ripen its fruit," says Dr. R. F. Poole, plant disease investigator at State College. "Most of the fruit ripens prematurely and is worthless. Too, the diseases are worse in small gardens where the tomatoes are grown year after year on the same soil. This greatly multiplies the causal organisms, which live over in the soil, to such an extent that satisfaction is rarely obtained with tomatoes."

There are three organisms causing the trouble, states Dr. Poole. The bacterial organism has been so baffling that a satisfactory control has not been found. Where this is present, the only suggestion is to change the soil. If this cannot be done, some other crop should be grown. The verticillium fungus is another organism for which no control is known. This fungus also attacks okra and eggplant but it is not so widely prevalent. The third cause of wilt is the Fusarium fungus which is now safely under control due to the work of breeding with resistant tomatoes. Varieties like the Marglobe and Marvona are wilt resistant and seed saved from the most vigorous plants of these varieties will withstand the Fusarium wilt. Constant watering will also help in the small garden to grow most any variety as this particular kind of wilt does its worst damage under drought and extreme heat conditions.

ADMINISTRATORS NOTICE

Having qualified as administrator of the estate of W. E. Evans, deceased, late of Franklin County, North Carolina, this is to notify all persons having claims against said estate of said deceased to exhibit same to the undersigned at Franklinton, N. C., duly verified on or before the 25th day of June, 1927, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate payment.
