BOARD OF EDUCATION MEETS

The Board of Education met in regular session Monday with A. F. Johnson, T. H. Dickens, J. H. Joyner, W. A. Mullen and E. L. Green present. The minutes of last meeting were read and approved.

The Board agreed for a joint summer school for the negroes to be held in Henderson. Franklin county's part of the expense will be \$75.

The Board reported on its meeting in Raleigh, April 12 and also on its joint meeting with the Commissioners on April 13.

The financial report was gone over

in detail, this report included all receipts and expenditures to April 1, 1927.

The Board approved a loan for the Louisburg School Board from the 1928 State Literary Fund for \$3,950.

There being no further business the Board adjourned.

If men were as perfect as their wives, expect them to be there would be very little excitement in this world.

Many Irish potato growers in Eastern Carolina complain that their seed are rotting in the ground.

FEED Makes SIDE-MEAT— and COTTON, too

A LITTLE extra corn brings Mr. Shoat a running. He'll even lay off scratching when he hears the rattle of the ears and you know it pays because this extra feed turns into more pig.

Same way about your cotton crop. A little extra feed when it is needed turns into more cotton.

Kinston, N. C.
We use and have used Nitrate of Soda for years with results on cotton in 1925—86 bales on 75 acres, in 1926—100 bales on 100 acres, poor stand.
L. D. Moseley,
Edgewood Farm
Jan'y 8, 1927

Thousands of thinking cotton growers have proved the case for themselves. They have proved it for you, too, and you can profit by their experience.

They find that side-dressing cotton, 150 to 200 pounds of Nitrate of Soda at chopping time, actually feeds the cotton plant like corn feeds a hog.

They find they get an extra yield off their side-dressed fields as against those fields not side-dressed.

When bad weather holds the cotton back, this side-dressing pushes it ahead to early fruiting. And Nitrate of Soda side-dressing, they say, gives the cotton power and strength to carry through dry weather.

Side-dressing works the same way with corn.

Just cut out this advertisement and write your name and address in the margin. Then mail it to us. We will send you, without one penny of cost, our little book "Side-Dressing Cotton and Corn." Our manager is a practical cotton grower and knows just what conditions call for here in the Old North State.

Weldon, N. C.
"I have been using Nitrate of Soda for a number of years and have found that it always pays me a profit when used for cotton, corn and oats at the proper time with favorable weather conditions."
W. A. Pierce
(Mr. Pierce plants over 1,000 acres each year)

NEW CREAM MARKET IN CENTRAL CAROLINA

Raleigh, May 2.—Dairy farming received added impetus and the progress of the State towards further diversification and livestock growing was stimulated by the opening of the new creamery at Asheboro in Randolph county on April 12.

"The opening of the creamery attracted much attention," says E. S. Millsaps, county agent. "There was quite a rush of farmers to be the first man to deliver cream to the new plant. C. E. Kearns and B. S. Lawrence tied for first honors since one got on the grounds first and the other succeeded in having his cream weighed first. Both of these men are enthusiastic Guernsey breeders and although they have just started in the dairy business each of them have eight registered cows. At present, Mr. Lawrence is milking 10 cows and Mr. Kearns five."

Mr. Millsaps states that the new creamery will be of great help to the farmers and will aid in establishing a dairy cattle industry for the surrounding territory. He also believes that it will stimulate interest in poultry production since the creamery will aid in establishing a dairy cattle industry for the surrounding territory. He also believes that it will stimulate interest in poultry production since the creamery will handle both eggs and live poultry. This, he states, will keep the surplus from the general market between the cooperative car shipments which will be continued.

This is the third new creamery to be established in North Carolina during the past year. Last year, the production of the 16 creameries already in operation amounted to 2,000,000 pounds of butter which was an increase of 19 percent over 1925. The average price paid for butterfat was 45 cents per pound. Approximately 8,350 farmers were served by the creameries and the value of the butterfat purchased amounted to \$650,000.

TENDER VEGETABLES MAY NOW BE PLANTED

Raleigh, May 2.—The warm, balmy weather of early May notifies the home gardener that tender vegetables may be planted or set in the open.

"Such crops as tomatoes, egg plants, peppers, celery, and sweet potatoes may be planted in early May," says E. B. Morrow, extension horticulturist at State College. "Seeds of snap beans, sweet corn, cucumber, cantaloupe, watermelon, okra, squash and many others may be planted in the open. It is a good idea to have succession plantings of sweet corn and snap beans. The sweet corn does best when planted in blocks, rather than in long rows. When there are only one or two long rows in the garden, the corn is poorly pollinated and only a few scattered grains are on the cob as a result."

Planting dates for all vegetables are given in extension circular 122 which is the home and garden manual for North Carolina. Mr. Morrow advises each home gardener in the State to get a copy of this publication and those who have entered the garden contest need it especially, so as to make plans for the year around garden.

But while planning for the garden this year it is a mistake not to plan for some flowers also. One of the prize winners in the garden contest reports that while she grew vegetables to keep the bodies well and strong, she also grew flowers and each day for 365 days she had a vase of fresh flowers, direct from the garden, in the center of the dining table. The flowers added as much to the enjoyment of the meal and to the beauty of the home as did the vegetables to the health and strength of the family.

BARACA PHILATHEA UNION

The Franklin County Baraca-Philathea Union met with the classes at Maple Springs May 1st.

The meeting opened with a song after which Rev. Brown led in prayer. Address of welcome was given by Miss Temperance Baker, that made all the classes feel welcome. Devotional exercises were conducted by Mr. Ruben Strange, who left with us some good thoughts. Rev. Chas. B. Howard gave a splendid address on "Christ for our youth and our youth for Christ." After this came the reports of the secretary and then the reports from classes were heard with much interest. Fifteen classes were present. Committees were read. Dismissal by Rev. Howard and then the crowd gathered where a bountiful dinner was served.

At 1:30 the afternoon session began with a song. Devotional was conducted by Mr. Clyde Moody, he gave a helpful talk from the 13th chapter of 1st Cor. Music was rendered by the White Level quartette which was enjoyed immensely. Mrs. J. S. Howell made a very impressive talk her topic being God's demand and man's objection. Rev. Brown of Wake Forest then gave a short talk speaking mainly to Baraca and Philatheans. This talk was enjoyed.

The last thing was the reports of committees. The White Level Philathea and Baraca and the Sandy Creek Junior Philathea classes were the banner winners, being the third time the White Level Philathea class has won the banner. They have won it to keep.

The following officers were elected: President, W. F. Hayman, Spring Hope; Vice-president, Mr. E. M. Stallings; secretary, Mrs. E. M. Stallings, Louisburg.

The next meeting will be held at Pine Ridge the first Sunday in November.

W. F. HAYMAN, Pres.,
MRS. E. M. STALLINGS, Sec.

Piles Cured in 6 to 14 Days
Dreaded and money if PAIN OINTMENT fails to cure itching, blind, bleeding or protruding Piles. Instantly relieves itching Piles, and you can get restful sleep after first application.

Never before — So many fine car features at such low prices!

The Most Beautiful Chevrolet embodies the largest number of fine car features ever offered in a low-priced automobile.

Bodies by Fisher, for example... beaded, paneled and finished in attractive colors of genuine Duco... smartened by narrowed front pillars, upholstered in rich and durable fabrics... completely appointed—and enhanced by such marks of distinction as full-crown, one-piece fenders and bullet-type headlamps.

And, in addition, the Most Beautiful Chevrolet provides many mechanical

improvements. A new AC oil filter and AC air cleaner add to the performance and dependability of the Chevrolet motor. A full 17-inch steering wheel, coincidental steering and ignition lock, improved transmission, new gasoline gauge, new tire carrier—all of these are now standard equipment on the new Chevrolet.

Come to our salesroom and see the new car that is breaking every precedent for popularity. Learn for yourself why it has everywhere been acclaimed as the greatest automobile value of all time.
