

### Carolina Druggist Pioneered Modern Way to Treat Colds

Developed Valuable Formula While Seeking Way to Avoid "Dosing" Children's Colds

While trying to find a treatment for the colds of his own children which would avoid constant "dosing," so disturbing to delicate little stomachs, Lunsford Richardson, a North Carolina pharmacist, developed Vicks VapoRub—the modern external treatment for colds.

Being applied externally, this modern vaporizing ointment cannot disturb the digestion. When rubbed on throat and chest it gives off medicated vapors which are inhaled direct to the inflamed air-passages; and, at the same time, it acts through the skin like a poultice or plaster.

As one enthusiastic mother told another about this better method of treating colds Vicks soon became widely known. In time adults, too, found by actual use that it is equally good for their own colds. Today, the whole trend of medical practice is away from needless "dosing," and the fame of Vicks has spread to over 60 countries.

The ever-increasing demand is shown in the familiar Vicks slogan. First announced when Vicks reached "17 Million Jars Used Yearly," and later raised to "21 Million," the figures have again been changed—as there are now "Over 26 Million Jars Used Yearly."
