

**FOUR IN THIS FAMILY BENEFITTED BY SARGON**

"I've been in miserable health ever since I began having attacks of acute indigestion seven years ago. A dis-

W. N. HYATT

ordered liver and constipation kept my whole system toxic. Headaches sometimes would last for a week and rheumatic pains in my arms and legs hurt me nearly all the time. Four bottles of Sargon rid me of every ailment I had! I've gained weight and have more strength and energy than I ever thought I'd have again. This medicine also helped my wife, daughter and son-in-law as much as it did me. "Sargon Pills didn't weaken or upset my system but completely overcame my constipation and straightened out my liver."—W. N. Hyatt, 437 Broadway, Asheville, well known contractor.

The corn crop of Onslow County will be increased by 2,000,000 bushels this season due to improved methods and the effort to decrease the shortage of 400,000 bushels existing last year.

**Oldest American?**

Major Bond, a colored man of Stamford, Conn., claiming to be 115 years old, is the oldest person discovered by the census enumerators.

**Excellent School Records**

The following article showing the growth of Epsom school from 1926 to 1930 has been prepared by Prof. J. A. Woodward, and shows a wonderful record as well as the appreciations of the public for a good school:

The following average daily attendance was made in the high school: 1926-27, Forty-one out of an enrollment of 53. 1927-28, Sixty out of an enrollment of 72.

1928-29, Sixty-nine out of an enrollment of 80. 1929-30, Eighty-two out of an enrollment of 93.

You will note the increase in enrollment, the increase in average daily attendance and the increase in percentage. Also that the cost of operation for 1926-27 and 1929-30 were the same, making the cost for 41 children the same as the cost for 82. Thus we see the efficiency of the school to the community depends upon attendance. Figuring, with that in mind, we find with a cost of \$60 a day, based upon the average daily attendance for the four years an economic loss of \$6,316.00. In other words, at the regular cost per pupil per day, \$6,215.00 worth of instruction was paid for and not received. It is also evident that the school, if 100 per cent efficient in 1926-27, was 200 per cent efficient in 1929-30.

In the elementary department daily averages were as follows: 1926-27, One hundred and fifty eight out of an enrollment of 207. 1927-28, One hundred and seventy-seven out of an enrollment of 220. 1928-29, One hundred and seventy-seven out of an enrollment of 225. 1929-30, One hundred and eighty-six out of an enrollment of 223.

Again you will note an increase in enrollment, an increase in average daily attendance and also in percentage. The enrollment here is not raised as much as it is in the High School but average daily attendance and percentage has made a marked increase. Using the same method of reasoning as above with a cost of \$16 per day we find an economic loss of \$1,177.60.

- Some reasons for our record are:
1. Close check on promotions. (In all grades).
  2. Better equipment.
  3. Co-operation of parents.
  4. Extra-curricular activities.
  5. Interest of teachers in individual child.
  6. School spirit.

By the use of a graph, not shown on this sheet, we have found that the months during the year when our attendance is lowest in the first, third and fifth, with the third leading the list. This shows us that we must pay extra attention to attendance during these months. (The above paragraph applies to the entire county) The following is a brief summary of other activities:

H. S. Library, 0 books to \$10; Elem. Library, 0 books to 300; Science equipment \$400.00; Finishing of science and teachers tables (work done by principal); Teachers table science \$25.00; Maps \$150.00; Kitchen \$175.00; Piano \$212.50; Playground equipment value \$50.00, built at practically no cost, tools \$30.00; Stage \$850.00; Grounds \$40.00, \$50.00 won from State, as second prize in N. C.; Lawn \$30.00; Rest room \$25.00; Pictures \$12.00.

**OUR RALEIGH LETTER**  
(Continued from Page Two)

term of from fifteen to twenty-five years for killing his wife. Another who might have departed is Larken Presnell who turned down the tender of a parole with the answer that he wanted a full pardon or nothing at all. He did not care for clemency with a string tied to it and will serve his time. Offenders violating a parole are brought back to serve the entire maximum of their sentences and Presnell not to have "that thing hanging over his head." And so the prison gates did not swing open for him.

The State Board of Health reports 142 violent deaths in North Carolina during the month of June, automobile accidents causing fifty, suicide 26, homicide 13 and 21 drowning. Fifteen died as the result of burns, three as the result of automobile and train collisions, 5 in railroad accidents, one from accidental gunshot wounds and

three from gunshot wound of an accidental nature. The birth rate for last month, according to health authorities was 27.2 per 1,000 population, while the death rate was 12.9 per 1,000 population, and for children under two years of age the death rate was three per 1,000 population. An increasing wave of pellagra cases is reported, or 222 from forty-seven counties. Diarrhea and enteritis caused 812 deaths during the month; pulmonary tuberculosis, 176; infant mortality under one year of age, 645; maternal mortality, 74; whooping-cough, 46.

North Carolina peaches are now rapidly moving toward the markets and prices are "not so bad."

The Smithfield Kiwanis Club financed the buying of six pure bred Duroc-Jersey pigs for 4-H club members of Johnston County.

A single camphor tree yields about \$5,000 worth of camphor.

**Over a Billion Deadly Germs in a Single Drop of Water**

Germs are so small that there may be as many as one billion, seven hundred million of them in a drop of water. And just a few of these tiny germs, if they get into your blood through a cut in your skin, may make you so sick you will be in bed for weeks—may cause the loss of a limb through blood poisoning—may even infect you with that most dreadful and fatal of diseases, lockjaw.

Just because you can see no dirt in a cut does not mean that it is clean. You cannot see germs. The only safe and sane thing to do, is to thoroughly wash every cut, no matter how small, with Liquid Borosone, to kill the germs, and then dust it with Borosone Powder, to hasten the healing. Liquid Borosone costs 30 cents, 60 cents, \$1.20 and \$1.50; Borosone Powder, 20 cents and 60 cents, and can be had at F. R. Pleasants, Drugist—Adv.
