

Passes Fifty Millions

C. T. Moody, of Bunn, has just returned from Winston-Salem where he was a guest of honor at the \$50,000,000 Victory Dinner of the Security Life and Trust Company. Mr. Moody was accorded special recognition for his outstanding accomplishment as a life underwriter. He also attended the annual meeting of the Company at which President E. L. Davis reported to the stockholders that the Company's new paid for business in the past year reached a total of \$14,267,000, an increase of 10% over the preceding year as compared to a decrease of about 15% shown by life insurance companies as a whole.

The insurance in force at the end of 1938 was \$50,184,394.00, an increase of over 125% in the past five years, as will be seen from advertisement in another column. As reported so far, the Security Life and Trust Company is the only company in the United States of comparable size and age which has more than doubled its insurance in force since 1933.

Officials of the Company gave high praise to Mr. Moody and the other members of the sales organization for their success in compiling such an outstanding record. Representatives of the Company from all over the territory reported unusually good business for the month of January and a most encouraging outlook for continued progress during the remainder of 1939.

EMERGENCY CROP AND FEED LOANS

Applications for emergency crop and feed loans for 1939 are now being received at County Agents Office, Louisburg, N. C., by C. H. Easton, Field Supervisor of the Emergency Crop and Feed Loan Section of the Farm Credit Administration.

The loans will be made, as in the past, only to farmers whose cash requirements are small and who cannot obtain credit from any other source. The money loaned will be limited to the farmer's immediate and actual cash needs for growing his 1939 crops or for the purchase of feed for livestock.

Farmers who can obtain the funds they need from an individual production credit association, bank, or other concern are not eligible for crop and feed loans from the Emergency Crop and Feed Loan Section of the Farm Credit Administration. The loans will not be made to standard rehabilitation clients whose current needs are provided for by the Farm Security Administration, formerly known as the Resettlement Administration.

As in the past, farmers who obtain emergency crop and feed loans will give a security first lien on the crop financed, or a first lien on the livestock to be fed if the money borrowed is to be used to produce or purchase feed for livestock.

Where loans are made to tenants, the landlords, or others having an interest in the crop financed or the livestock to be fed, are required to waive their claims in favor of a lien to the Governor of the Farm Credit Administration until the loan is repaid.

Checks in payment of approved loans will be mailed from the Regional Emergency Crop and Feed Loan Office at Columbia, South Carolina.

CARD OF THANKS

We wish to extend our thanks to our many friends and neighbors for the many kindnesses rendered us during the death of our son and brother, Benjamin R. Allen.

Mrs. Z. R. Allen and family.

START POULTRY SHIPMENTS
Columbus County farmers have begun their cooperative carlot shipments of poultry for the new year. C. D. Raper, assistant county agent, reports that 3,000 pounds were loaded last week at Whiteville and Chadbourn.

This Month On the Farm

FEBRUARY

Bolivar Pigg, he sez, sez he:
"This short month makes a hit with me;
If all cold weather months were short,
That would be somepin, you'll agree."
— Sez Bolivar P., sez he.

The following are good farming practices recommended by Extension Specialists of State College for the month of February:

SWINE
Brood sows that are to farrow in February should be provided with plenty of minerals and vitamins, says H. W. Taylor, State College extension swine specialist. If winter pasture is not available or is covered with snow, furnish vitamin A by feeding yellow corn or small amounts of bright green, leafy legume hay.

POULTRY
February is a month of hazards as well as a month of intense activity for poultrymen, says Roy S. Dearstyne, head of the State College Poultry Department. He advises starting chicks from blood-tested parents. Also remember not to overcrowd or overheat them. Provide a good starting mash and plenty of fresh, clean water. Rigid sanitation and strict culling are essentials in the poultryman's program.

DAIRYING
It's pasture seeding time once more, says John A. Arey, extension dairyman at State College. Spring seeding of permanent pastures should be completed by March 1 in the Coastal Plain and Piedmont areas and by March 15 in the mountain counties. Heavy seedings, usually 30 to 40 pounds to the acre, will bring best results. If pastures are started after the recommended dates, they may not be entirely successful.

AGRONOMY
Here are three or four suggestions for poultrymen, says Roy S. Dearstyne, head of the State College Poultry Department. Decide upon best quantities and analyses of fertilizers that should be used for each crop for greatest returns per acre; use improved seed of each crop

adapted to your section; break your land early and plant on a good mellow seed-bed after the season opens; and plan to handle your land so that it will be a little more productive each succeeding year.

FLOWERS
J. G. Weaver, State College floriculturist, says farm people must have their minds on summer flower gardens judging from the enormous number of seed catalogs which the mail carriers have been delivering recently. However, there's one thing the gardener should be careful of, Mr. Weaver says, and that's to avoid too many of the new novelties or so called "All-American" selections until they have been tested locally. The gardener who likes to experiment should buy only a small package of these

per acre from seed treatment, which costs only 25 cents, has been over ten dollars. Don't fail to have your seed treated before planting this year.

TOBACCO
One per cent rotenone dust has been found highly effective in controlling tobacco flea-beetles in plant beds, according to J. O. Rowell, extension entomologist at State College. The dust may be applied with a hand-operated duster or by a bellows-type hand duster at the rate of one-half pound to each 100 sq are yards of plant bed surface.

Why is it that a woman always lowers her voice when she asks for something and raises it if she doesn't get what she asks for?

\$50,000,000.00 CONGRATULATIONS! To C. T. Moody

for the special recognition accorded him at this Company's recent \$50,000,000.00 Victory Dinner for his outstanding accomplishment as a life underwriter.

Sincere Thanks

to the ever growing host of policyholders and friends who have made possible the outstanding growth as revealed by the following record of the Security Life and Trust Company:

ASSETS	YEAR	INSURANCE IN FORCE
\$3,501,316	1933	\$22,641,236
3,689,261	1934	26,724,959
3,990,932	1935	31,486,851
4,406,482	1936	36,716,876
5,076,647	1937	43,398,111
5,788,239	1938	50,184,394

For the year 1938 More New Business — More New Policyholders — More Assets — More Increase in Policyholders Surplus — More Insurance In Force — More Premium Income than ever before in the Company's history.
