

Fishing Season Opens In State

Department of Conservation Gives Limitations on Angling in State

North Carolina's fishing season opened Wednesday and from now until next March 31, anglers are free to dip their lines, unimpeded by restrictions, except purchase of proper licenses and a few items necessary to induce the members of the finny tribe to take the hook.

The trout season opened some time ago and will close August 31. The small-mouth bass season will not open until June 10 and will end September 30, in counties west of Alleghany, Wilkes, Rutherford and Highway No. 18 in Burke and Caldwell counties. There, too, the open season on all other species of fish is from June 10 to April 14, following. Lake Santeelah is closed to all fishing from October 1 to June 10, except on specially chosen days.

Requirements for licenses apply to both sexes above the age of 16. Any person fishing outside his home county must have a resident state license, which costs \$2.10 or daily permit, at a cost of 60 cents. License requirements extend to all inland waters and to all commercial waters except the Atlantic ocean, the sounds, Cape Fear river below Wilmington, Neuse and Trent rivers below New Bern, Tar river and Pamlico rivers below Washington and New river below Jacksonville.

Non-resident fishing licenses cost \$5.10, and a non-resident daily permit \$1.10. Some counties require county licenses, which cost \$1.10 for residents. Among the counties requiring them are Alleghany, Ashe, Avery, Buncombe, Caldwell, Cherokee, Clay, Haywood, Henderson, Jackson, Madison, Macon, Mitchell, McDowell, Polk, Rutherford, Swain, Transylvania, Watauga, Wilkes and Yancey.

It is unlawful to buy, sell, offer for sale or ship at any time, any game fish.

It is unlawful to fish or take any fish in inland waters other than by rod and reel or hook and line except that seining may be done for coarse fish in certain designated muddy waters and under supervision of county game and fish protectors during July and August.

It is unlawful to dynamite, poison or pollute waters in any manner which endangers the lives of the fish therein.

It is unlawful for any person to use more than two poles at any one time in inland waters.

It is unlawful to fish or take

fish by "jiggering," traps, baskets or set hooks.

The bag limit and size limit of various species are as follows: Rainbow trout, 12 daily, 8 inches; brook or speckled trout, 12 daily, 6 inches; brown trout, 12 daily, 8 inches; small-mouth bass, 8 daily, 12 inches; large-mouth bass, 8 daily, 12 inches; Mattamuskeet Lake bass, 8 daily, 10 inches; Muskallunge, 8 daily, 12 inches; rock or striped bass, 8 daily, 12 inches; red fin, 20 daily, 8 inches; perch, brim, crabbie, robin or sunfish, 20 daily, 6 inches; white and grass perch (Lake Waccamaw), 12 daily, 8 inches; white perch (all inland lakes), 20 daily, 8 inches.

It is unlawful to take in any one day more than 12 trout of all species or more than a total of 40 of all species of above listed game fish.

Violations of the fishing laws or regulations of the Department of Conservation and Development are punishable as misdemeanors and for the first offense the punishment is a fine of not more than \$50 or imprisonment for not more than 30 days, or both.

HEALTH DEPARTMENT

Dr. R. F. Yarborough, County Health Officer

Health Items

A Pre-School Clinic will be held at Mills School, Tuesday, May 23, at 10 A. M. Children who will enter school for their first time this fall will be given a physical examination and all defects noted and parents will be advised how these defects may be corrected. Parents are urged to bring such children to this Clinic. It is especially requested that parents accompany children as they can give valuable information that small children do not know.

Any school or P.T.A. wishing such a Clinic if application is made to the Health Department a date will be made for same.

Typhoid, Diphtheria and Smallpox

On application to the Health Department a Clinic as above will be arranged. Vaccination against Typhoid Fever, Diphtheria and Smallpox is a practical guarantee against such diseases.

Skinner—Old Diggs isn't much good, is he?

Bonevizer—No, all he does is to earn a lot of money for his family to spend.

Nelle—Gracious, but you and Jim were gone a long time. Have a blowout?

Maudine—No, he never spent a penny.

Whither the Young Graduate? Maybe This Holds the Answer

How the average high school student will be occupied one year from this June has been determined by a recent survey of 1,000 of last June's graduates. Teachers colleges, business colleges and vocational schools will absorb 140 graduates from the school surveyed, all in towns of approximately 3,000.

Clerical jobs in grocery stores, filling stations, shoe stores, etc., will be filled by 236 graduates. This total includes delivery boys and "handy men," most of whom serve part time in a clerical capacity. Thirty-one salesmen also received the sheepskins this year. The latter includes house-to-house canvassers.

Students numbering 171 will attend college or university the first year, with a large percentage failing to return the second year. Lack of industrial opportunity has increased college enrollment. A total of 162 will remain at home without finding work. This figure includes girl graduates not planning to work.

Agriculture will claim 199 graduates, many of whom are returning home to work. Included also are youths who are going to work on a farm for the first time. Seventy-seven are listed under a miscellaneous heading, including truck drivers, CCC enrollees, mechanics, waitresses and odd-job workers.

Uses Water in Place of Gasoline

DALLAS, Texas—Henry (dad) Garrett, 76, electrician, inventor and supervisor of the municipal traffic signal system here is pictured with his electrolytic carburetor which, he says, will make one gallon of water run an automobile as far as 2,000 gallons of gasoline would run it. A solution of water and common house lye is introduced into the carburetor.

DOLLARS SENT AWAY FOR PRINTING Never Come Back Let Us Do Your Printing

MONEY FOR YOU IMPROVE YOUR HOME

We are glad to announce to the farmers and home owners of Franklin County that we have received appointment as Agent for the F. H. A. in Franklin County and can offer you plans whereby you can repair and remodel your home and surrounding and install most any electrical equipment desired. This will include water systems with bath room and lavatories, water heaters, covering or painting houses, building fences, garages or adding rooms. The payment for this is extended over a three-year period at low interest without mortgage, no down payment and farmers do not have to make any payment until the fall.

"WHEN IS A FARM IDLE"

The basis for determination of an idle farm as set forth in Question No. 9 of Interpretative Memorandum ECR-ADM-354 is as follows: "Any farm with respect to which a wheat, tobacco, or cotton allotment is established shall be deemed to be idle in 1939 if the county committee determines that such farm is idle within the usual meaning of the term in the community in which the farm is located. Provided that a farm shall be considered as idle unless normal cropping operations are carried out on the farm in 1939. Normal cropping operation will not be deemed to have been carried out on the farm unless an acreage of land equal to not less than one-half the acreage in the total soil-depleting allotment for the farm is devoted to one or more of the following uses:

1. Seeded to a crop for harvest in 1939.
2. A crop (other than wild hay) is harvested in 1939.
3. Devoted in 1939 to seed legumes or grasses (other than those seeded in the fall of 1939).
4. Seeded to small grains to be pastured in 1939 (other than small grains seeded in the fall of 1939).

Except where the State Committee finds that such cropping operation was prevented by causes beyond the control of the operator.

This information is issued to the farmers of the County for the purpose of avoiding disappointments when the Agricultural Conservation Payment is expected where cotton and tobacco is allotted but not planted in 1939. Recent information issued has advised that largest Conservation Payments for cotton would be made without consideration of the provision 80% of cotton allotment being planted. The exception to this rule is where cotton is allotted but is not planted on a farm classed as idle in 1939.

W. C. BOYCE, County Agent.
