Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—life itself—constantly produces a waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging headaches, persistent backache, attacks of dizziness, getting up at night, swelling, puffiness under the eyes—feel tired, nervous, all veins aching.

Profound, steady or burning passages may be further evidence of kidney or bladder disturbance.

"The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisons body waste. Dr. Doan's Pills, they have had more than thirty years of successful experience under the same old name. Learn of Doan's, best of all drug stores."

IN MEMORY OF MARY ALICE MURPHY

On Friday, June 23, 1939, as the old clock was approaching the sixth hour death shadows silently made its way through the group of loved ones, who were anxiously endeavoring to render some final aid to the precious one so nigh to the river, and bore her soul upward through the golden clouds to join the Heavenly throngs of blessed ones.

Mary Alice and I, being girls of nearly the same age, were naturally thrown together a great deal. We had our days of gladness and sunshine together. I feel that my life has been made better for having come in contact with hers. Her pleasant smiles and general laugh has driven gloom and shadowy days from my life.

For two years the hand of suffering bore heavily upon her, but she carried her cross with a smile. And her faith in Jesus never changed.
