GREGG URGES CANCELING VISITS IN POLIO CRISIS

Dr. A. D. Gregg, county health officer, today advised all persons who are planning to visit any section of the State to cancel their trips unless they are planning to go to the coast, as increasing reports of new cases of infantile paralysis have come to the health office.

"As yet there have been no cases reported in Vance County," Dr. Gregg stated, "but the safe thing to do is to stay at home, away from places of public resort or public entertainment. At the present time there is no danger to be feared from local gatherings of children, but my personal advice to parents is to keep their children at home for a few weeks until the progress of the epidemic is checked."

The people of this county are advised to ask no relatives or friends to visit them from counties north or west of Guilford and Randolph counties, or from any counties where cases have been reported, in an effort to keep the epidemic from reaching Vance county.

"The State Board of Health" has requested camps in the mountains to cancel all applications from infected counties," Dr. Gregg stated, "but we have no guarantee that the request will be strictly observed. And so there remains an element of risk in sending children to these camps. Then, too, those going to the camps must almost necessarily pass through infected counties to reach their destination, and there is danger that the germs may still be in the air."

The last two counties reporting new cases of paralysis to the State Board of Health were Wilson and Lee, Dr. Gregg stated, and expressed the hope that this county might remain free from infection.

"It is to the advantage of citizens that they be careful in taking their children to public places, and I believe with proper cooperation of the people of the county, we may keep Vance county safe from the infantile paralysis epidemic," Dr. Gregg declared.—Henderson Gold Leaf.

PULPWOOD

Every time a doughboy leaves for overseas it takes 300 feet of lumber to box and crate his initial supplies. It takes fifty feet a month from then on to keep him supplied. That is for just one soldier's personal equipment and does not include all the other armaments of war. Every 10,000 ton cargo ship on the Liberty type leaving our ports requires ten carloads of lumber for dunnage to brace supplies in the ship's hold. Farmers, help meet these lumber demands by cutting more sawlogs.

Yanks of the 37th Division Mop Up on Bougainville

Army Signal Corps Photo

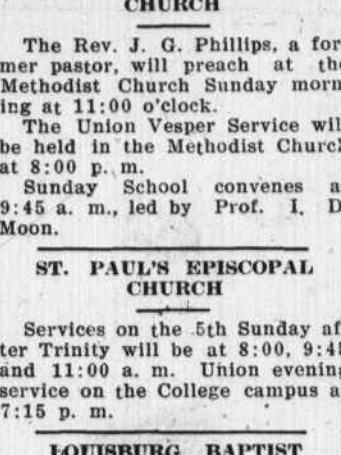

Cleaning up the Japs on Bougainville in the South Pacific was a tough job. On March 8 he counterattacked our forces and then, for three weeks it was a case of digging him out of his holes in the ground. Note the soldier on the extreme left, forward, getting ready to wipe out a Jap. These men of the 37th played for keeps. Nip losses ran into the thousands.

This picture, like all four in this set, was taken under fire, unreal as some may appear. Yet study the men closely and you will see alertness in every move. They are approaching the edge of a hole where a Jap is hiding. They got their man. It takes days to clean up these isolated snipers. Back the Attack with War Bonds.

Here are a couple of Yanks manning a machine gun, firing at a Jap pillbox. The slight haze is smoke. Our boys have found that the Japs almost always fight to the death. Are you fighting alongside our boys by buying War Bonds.

Morning in the jungles of Bougainville. Light slowly filters through the trees as these Yanks of the 37th Division wait behind a tank during the mop up. Just ahead is a Jap pillbox still manned by the little men of Nippon. It wasn't there long, however. Are you buying an Extra War Bond to back up these jungle fighters of ours?
