Much better yields of peanuts are being produced where the seed were treated with arasan and good, early stands were obtained.
 Flea beetles, horn worms, and budworms can be satisfactorily controlled with cryolite. Paris green and lead arsenate are hard to get.
 We favor things that begin on time; we'd favor our execution taking place on time.

Thirty-one counties will take part in the Eastern Junior Dairy Cattle Show at Raleigh on September 26.

From where Life by Joe Marsh

Matt Doerly Versus the Tomato

Matt Doerly's skin broke out in a rash last week. He finally admitted to Doc Hollister he'd eaten twelve tomatoes in a row just the day before.

"Shucks," said Doc. "That's all that's the matter with you. That kind of eating would turn anybody red."

So now Matt has not only cut out all tomatoes for himself. He's forbidden his family to eat tomatoes. And won't even have them in the house. Says tomatoes are anti-social and ought to be prohibited by law.

Funny how some people rush off to extremes like that. They take a wholesome thing and overdo it till it disagrees with them—or maybe find they don't happen to like it—and then they want it banned for everybody.

From where I sit, folks ought to realize there's a middle ground in everything—a middle ground of moderation on the one hand . . . and tolerance for our neighbors on the other.
