As advertised in LIFE

NEW... Johns-Manville Shingles

hold tight

even in HURRICANE WINDS

Proved on over 300,000 homes!

Here's the Secret!

Patented Seal-O-Matic® Asphalt Shingles have a continuous stripe of adhesive on the underside of each shingle. The sun's heat seals down the entire edge...bonds it firmly against gale winds and driven rain.

THE COCKROACH AT WORK

Why Unseen Danger May Be Lurking In Your Home!

- Cockroaches in your kitchen cabinets crawling over dishes, pots, pans and food leave behind over 200 types of bacteria, many of which are harmful to man. This bacteria will live for five (5) weeks or more.
- A cockroach in itself is harmless to health. It is the bacteria it leaves behind that is the danger.
- Insects and rodents are the carriers of most of the diseases common to man.
