Gulls Protect Airport?

Milwaukee--Airport Director Stewart D. Moast reports that by feeding treated grain to gulls the jet engines at General Mitchell Airport are safer. The treated grain has an inebriating effect on the gulls causing them to send out distress calls which, in turn, warn other gulls to stay away.

Only The Best

The surgeon was discussing a forthcoming operation with a wealthy patient.
"Would you prefer a local anesthetic?" he inquired.
"I can afford the best," replied the wealthy patient. "Get something imported."

In Fashion Now

Spring suits are lovely in their pastel shades and in white. Some have narrow collars and lapels while others are collarless with rather high necklines.
The popular length for the sleeves of the jackets is about four inches above the wrist. Short gloves or those that reach a place under the sleeve are both worn.
Isn't it funny how petty habits become so important, once they're habits.
