In Fashion

Large scarfs and large pocketbooks are back in the picture. Small bags which have been the fashion this past season are giving way to those that hold the numerous articles which women like to have on hand throughout the day. These large bags are a must for travelers and many people tend to rove around during the warmer parts of the year.

Scarfs may be worn around the throat or used as a sash around the waistline.

About Your Home

Built-ins are the order of the day. Not only the conventional closets but built-in beds, chests book-cases and desks are quite popular.

Built-in beds are found in many 16th century European paintings. The Victorian era is remembered by spacious rooms, four poster beds and great wardrobes, but no closets. It was during the 1880's that built-in closets came into general use.

The moderns are experts in planned space and wall use. Fine results are obtained in exceedingly small space by good wall use. Anyone building a home today should not overlook the possibility of furniture built into walls.

Built-in dressing tables and cabinets are frequently put into a recess in a room. A dressing shelf placed below a mirror on a closet door is useful.

Thoughtful closet planning can add much to a home. This planning is done with great skill. Closets in old homes can be replanned and made much more useful with little expense.

Garment bags, shoe bags and hat boxes can be bought in a variety of colors and materials and will help a great deal in taking the proper care of your clothes as well as bringing order and attractiveness to an old closet.

Even the closet of the man of the house should not be overlooked. Hat boxes and bags in colors suitable for a man will add much to the efficiency of his closet.
